During the campaign that resulted in Cleveland's election, the Republicans were charged with all manner of legislation in the government establishment of manufactories. The Knights of Labor have a great deal more sense than their President Sovereign, who ordered them to strike. They refused to obey. What right has Sovereign and Debs to order men to throw down their implements of work and step out of employment where they are making wages to support themselves and families. Out upon such despotisms, and then worse than all the bosses claim to have the right to say that no other men shall take the places that they would not allow their own secret order men to work in.

Senator Peffer is on the political road to a monarchy, and don't know it. He advocated in a speech in the Senate, government control of railroads, coal fields and a single tax. He advocated the abolition of the United States Senate and Lower House of Congress, and the centralization of power as nearly as can be, into the hands of one man. Peffer, Debs, Sovereign, Allgeier & Company are a strange mixture, but if left to their plans would soon knock the life out of the Republic, and wouldn't realize it till the change had been accomplished.
