The idea of earning a livelihood out to commend itself at first glance to the female mind, and the ghastly associations of the occupation are to many in superably repellent. But embalming has for many reasons established itself in popular favor. It is the only sure means of preventing the spread of conases, through transmis tagious diseases, through transmission by the undertaker's ice-box or assist ants. It is a preventive against pre-mature burial in the case of a catalep-

possibility of shipping bodies a long distance with convenience. It is not generally known that throughout this country large numbers of women have adopted embalming as a profession, and the head college of embalming has a large proportion of women graduates. Far from showing any horror or unfitness for the business, women are said to be peculiarly deft and efficient in the duties involved, which in a general way consists only in opening several of the large arteries, pumping out the blood and injecting preservative fluids. Many of the women graduates have been trained nurses who saw an oppor she bave any standing in court?" tunity to make more money than at their former profession.
