### SONG OF THE STARS.

Then the daylight fades in the evening slales and the blue melts in the gray. We pitch our tents in the irmaments To guard the milky way. And we gather the broken sumbeams up That the day has left in its path. To kindle and built the glow, and gild What our sparking camp fires bath.

With fond caresses we jewel the tre-se

Of the moon as she mounts the shies; ind the Heavens we sprinkle with m twinkle

twinkle That lesps from our sparkling eyes. But when he storm cloud rolls his car In thunder across the sky, ind the lightning da bes in fitfal fisshes We hide, till the storm goes by.

The sum is our master, and no disaster Can come to his night of rest: For with constant eyes on the dim herizon We guard the East and the West. We sometimes find where the comet hides, And we frighten him out of his lair, full to speeds through the night like a for his fight. his flight. To his home in the great nowhere.

We sometimes pause in our journey because We see ourselves in the glass Of the silent lakes or the sea that takes Our picture as we pass But when the daylight quivers and breaks, And the gray melts into the blue. The tears we shed o'er our fallen dead Are found in the morning dew.

How long he sat beside me I don't remember, but after a time he slowly arose and walked over to the tele graph office at the farther end of the room. Before he came back a strong lunged individual in uniform stepped up to me and bawled out the names of the towns to which the train about to start was bound for. Hurriedly picking up my valise. I made straight for the gate and was soon aboard my train for the West.

The journey was made with the usual discomfort and monotony. The depot at N-Y-, Ind., where I had to stop over from 10 p m. till the next morning had been rebuil since my last visit to that town, and. remembering too well my hotel experience there a year before, 1 resolved to spend the night in the depot waiting-room with a few other passengers who shared my misfortune

All that night the face of the stranger who had occupied a seat be side me in the Cincinnati depo baunted me. There was something about him that reminded me of Tel ler Swope. He was just his size and build; his mustache, to be sure, wawanting, but that he could have shaved off this appendage was to b considered a matter of course. The gold spectacles he wore very much resembled those I had associated with the face of the intellectual looking teller, and I had observed on his fingers a number of rings, jeweirs that Mr. Swope was said to be ver partial to. As I turned the matter over in my mind the more convince I felt that 1 had lost a splendid chance of capturing the thief and se suring a \$10,000 reward.

When 5 o'clock at last came round I boarded the train for L-, not in the best of humor, and two hour later arrived at home feeling ver blue. After taking a slight break fast I went down to the office, where the big robbery was still the talk o the clerks. Each of them had a theory of his own as to where the thief had gone, and when they ap pealed to me for my opinion I dole fully recounted my experiences of the previous evening. Of course they upan imously agreed with me that I had very foolishly allowed the fugitiv teller to slip out of my fingers.

Just before going out to lunch messenger boy languidly entered the office and handed me a note from m wife. Thinking it was the usua commission to get a yard or two "goods like the sample inclosed," thrust it into my pocket and starte
