THE DAYS AND THE YEAR.

What is the world, my little one?
Our world belongs to that eleck, the sun.
Steady it spins; while the clock beats true
Days and seasons for me and you.
And tick, tick, tock, goes the mighty clock,
While time swings on below.
Now left, now right, now day, now night,
With a tick, tock to and fro.

A sweet pink rose in the wind astir,
A maple leaf with a crimson blush.
Then falling snowflakes and winter's hush.
While tick, tick, tock, goes the mighty clock,
And the world swings on below,
Budding, blowing, shining, snowing. With a tick, tock to and fro. A little song when the heart is glad,

The pussy willow in coat of fur,

A little sigh when the way is sad, Whether the shadows or sunbeams fall, Sweet reat and dreaming at last for all, While tick, tick, tock goes the mighty clock, And the world swings on below, Smiling, sighing, singing, crying, With a tick, tock to and fro.

So is the way, my own little one, Our world belongs to that clock, the sun, And the hand that somewhere keeps the key Is the same that holdeth you and me, While tick, tick, tock goes the mighty clock, And the world swings on below,

A STOLEN SECRET.

How Minister Jewell Learned to

Jewell, like all men brought up to learn a trade, and who afterward gained prominence in affairs, made now and then unconscious revelations of his early training. During one of the campaigns in which he was engaged he found himself at a country hotel where the table was bounteous, but the rooms few and small. It was necessary in order that the whole party might be housed for each bed to be occupied by two persons. The governor's roommate was a young politician, who could not hide his surprise when the governor just before retiring rolled the sleeves of his night shirt even as far up as his shoulders, and then bathed his arms in cold water

"You wonder why I do this," said the governor. "Well, I couldn't sleep unless I did. When I was a youngster learning the tanners' trade, I used to have my arms in the vats all day long, and at night my skin would smart as though I had been stung by nettles. I could not bear to have any cloth touch them. So I got the habit of rolling my shirt sleeves as far as I could, and thus I have slept ever since."

MONEYLOANED.

Would you care to be so situated that you could reduce the mortgage against your home by paying off a small amount month ly and at the end of each year receive cred-it for all paid? With interest being charged only on remaining portion of loan.

Would you like to buy your family a home? If so, read the following:

I represent a Company that has embod-ied in its plan all the features enumerated above and many more. Can you see any reason why you should pay a large interest for money when you have good security Can you present any good reason why it is not as well to receive profits yearly as to wait from 7 to 10 years as one does in many of the Associations? Is not the reduction of interest yearly better, than waiting many years for profits? Borrowers under the epresented by me assume absolutely ne risk as each \$1 00 paid on the loan is credited on the mortgage, thereby reducing it in proportion to the amount paid.

Building Associations have benefited hundreds of thousands, so did the old cars of Patterson Borough, a Lunatic, now de- horse car system. My time is to much oc cased.

2nd. The first and final account of W. H. but those seeking information for the betterment of their condition will receive full information promptly. We offer an invest ment to those who have a small amount to save monthly that has no superior as t safety and seldom equaled for profits. Call or write. MAURICE LEONARD,
