Would you like to buy your family a home? f so, read the following:

I represent a Company that has emboded in its plan all the features enumerated above and many more. Can you see any reason why you should pay a large interest or money when you have good security? Can you present any good reason why it is not as well to receive profits yearly as to wait from 7 to 10 years as one does in many of the Associations? Is not the reduction of interest yearly better, than waiting many years for profits? Borrowers under the plat represented by me assume absolutely no risk as each \$1 00 paid on the loan is credited on the mortgage, thereby reducing it in proportion to the amount pald.
