

WEDNESDAY, JUNE 19, 1895.

B. F. SCHWEIER, Editor and Proprietor.

PRESIDENT CLEVELAND issued a proclamation: On the 12th inst., against filibustering against Spain on the island of Cuba.

The people of Newburgh, N. Y., think so much of the name of their town that they have refused to drop the "h" from it, upon the order of the postmaster general.

The Pennsylvania law makers this year failed to appropriate money for the holding of farmer's institutes and the institute will languish if the farmers themselves refuse to foot the bill.

The charitable institutions of the State and the penitentiaries are to be searched by a legislative committee to learn how many unfortunized persons, and persons of foreign birth are quartered upon the State.

It was the members of the Legislature, who wanted large appropriations for charitable institutions, who led to the State appropriation to the schools a million dollars. They did not succeed in reducing the State appropriation for the Schools.

The day after his first wife of General Keop Off The Grass Coxe, and his Chief Marshall Carl Brown were secretly married by a Justice of the Peace at Massillon, Ohio, last Friday evening while the General was at Atlantic City. The bride is 18 and the groom 45 years old.

A Lancaster School Board has set the Lancaster Garb Law at defiance by electing a Dunker woman to teach. We wish the Dunker success with their case in the courts. Where would Wm. Penn come in under the Religious Garb Bill, if living now under its provisions, the founder of this grand Commonwealth would be ruled out of the schools as a teacher.

They Defy the Garb Bill. Lancaster, Pa., June 13. — The Lancaster School Board to-night defied the Pennsylvania Legislature by unanimously re-electing Miss Lena Hegg, a Dunker teacher, and promoted her to the intermediate grade. She was also elected a night school teacher. While nothing was said about her gowns, the members will still be made to oust her in the event of the garb bill being signed.

She always wears a little white cap in the school room, but is regarded as a first-class teacher.

PHILADELPHIA MARKETS. June 15, 1895.—Wheat 79 to 80c; corn 55 to 57c; oats 34 to 37c; live hens 10c; roosters 7c; spring chickens 15 to 26 cents a piece according to size; butter 12 to 13c; old potatoes 30 to 55c a bushel; Southern new potatoes 75c to \$3.75 per ton; mixed tomatoes 75c to \$1.75 a bushel; cucumber per basket \$1 to \$1.25 a bushel; strawberries 3 to 8c a quart; whortle berries 5 to 6c a qt; goose berries 6 to 7 cents a qt; cherries 5 to 8c a qt; Georgia and South Carolina peaches \$1.50 to \$2.00 a basket; straight rye straw \$1.50 to \$1.6 a ton; tangled straw \$8 to \$9.50 a ton; clover hay \$9 to 9.50 a ton; mixed clover and timothy \$10 to \$10.50 a ton; timothy hay \$13 to \$15 a ton.

PHILADELPHIA MARKETS, June 15, 1895.—Wheat 79 to 80c; corn 55 to 57c; oats 34 to 37c; live hens 10c; roosters 7c; spring chickens 15 to 26 cents a piece according to size; butter 12 to 13c; old potatoes 30 to 55c a bushel; Southern new potatoes 75c to \$3.75 per ton; mixed tomatoes 75c to \$1.75 a bushel; cucumber per basket \$1 to \$1.25 a bushel; strawberries 3 to 8c a quart; whortle berries 5 to 6c a qt; goose berries 6 to 7 cents a qt; cherries 5 to 8c a qt; Georgia and South Carolina peaches \$1.50 to \$2.00 a basket; straight rye straw \$1.50 to \$1.6 a ton; tangled straw \$8 to \$9.50 a ton; clover hay \$9 to 9.50 a ton; mixed clover and timothy \$10 to \$10.50 a ton; timothy hay \$13 to \$15 a ton.

PHILADELPHIA MARKETS, June 15, 1895.—Wheat 79 to 80c; corn 55 to 57c; oats 34 to 37c; live hens 10c; roosters 7c; spring chickens 15 to 26 cents a piece according to size; butter 12 to 13c; old potatoes 30 to 55c a bushel; Southern new potatoes 75c to \$3.75 per ton; mixed tomatoes 75c to \$1.75 a bushel; cucumber per basket \$1 to \$1.25 a bushel; strawberries 3 to 8c a quart; whortle berries 5 to 6c a qt; goose berries 6 to 7 cents a qt; cherries 5 to 8c a qt; Georgia and South Carolina peaches \$1.50 to \$2.00 a basket; straight rye straw \$1.50 to \$1.6 a ton; tangled straw \$8 to \$9.50 a ton; clover hay \$9 to 9.50 a ton; mixed clover and timothy \$10 to \$10.50 a ton; timothy hay \$13 to \$15 a ton.

PHILADELPHIA MARKETS, June 15, 1895.—Wheat 79 to 80c; corn 55 to 57c; oats 34 to 37c; live hens 10c; roosters 7c; spring chickens 15 to 26 cents a piece according to size; butter 12 to 13c; old potatoes 30 to 55c a bushel; Southern new potatoes 75c to \$3.75 per ton; mixed tomatoes 75c to \$1.75 a bushel; cucumber per basket \$1 to \$1.25 a bushel; strawberries 3 to 8c a quart; whortle berries 5 to 6c a qt; goose berries 6 to 7 cents a qt; cherries 5 to 8c a qt; Georgia and South Carolina peaches \$1.50 to \$2.00 a basket; straight rye straw \$1.50 to \$1.6 a ton; tangled straw \$8 to \$9.50 a ton; clover hay \$9 to 9.50 a ton; mixed clover and timothy \$10 to \$10.50 a ton; timothy hay \$13 to \$15 a ton.

BIRDS LIKE TO TRAVEL.

The Reason They Annually Leave Northern Climes and Fly South. Why do the birds fly southward each autumn and return again with every spring? No one knows, but science, the person of Professor Wang, the eminent Austrian ornithologist, has just disclosed that the usual flippant answer to this question, "Because they like to travel," is not far out of the way, after all.

In a lecture that Professor Wang recently delivered at Vienna he gave some extremely interesting details regarding the migrations of birds, all of which are alike in their habits. They follow the most direct line southward, and are made with almost incredible rapidity. Numerous observations have been made at Heligoland, which is the principal stopping place of birds of passage from northern countries, and of Egypt, which is the winter home of many, and these observations have established some facts hitherto unknown. The blackbirds traverse the 4000 nautical miles which separate the place of Heligoland in a single night, which is at the rate of more than 40 geographical miles per hour. The swallows' speed is over 2 1/2 miles per minute, or nearly three times that of the fastest railway train. Even the younger birds, 6 or 8 weeks old, accompany the others in their journey.

Professor Wang asks himself what is the impulse which causes the birds, after their long and toiling season in the north, to quit our northern climate. He does not think it is fear of cold—for many species quite as delicate as those which migrate southward easily withstand the rigors of the winter—but that they have an irresistible impulse for traveling. This is his idea of the fact, but he can give no explanation.

FIRST SHOT OF THE WAR. Fired by the Cadets of the South Carolina Military Academy. The first shot in the late war was fired by the cadets of the South Carolina Military Academy, which occupies a spacious and formidable looking building called the Citadel, which was originally constructed for an arsenal. The organization and curriculum of the academy at West Point. After the ordinance of secession was adopted the cadets were ordered to report for guard duty and were manning a battery on Morris Island, when, on Jan. 9, 1862, the Star of the West attempted to enter the harbor with supplies and reinforcements for Fort Sumter. The impulsive boys took the responsibility of driving her back, firing shot after her bows to give warning. The steamer immediately returned to the United States flag and increased her speed. The shots fell thick and fast around her, and when one struck her in the stern the commander thought it prudent to retreat and turned his vessel seaward. The cadets of the institution believe that act entitles them to the honor of the south, and the prestige thus acquired has made them the objects of envy throughout that whole section.—Charleston Letter in Chicago Record.

Iron Tonic For Orange Trees. G. W. Prescott of Highland, who took the medal for the best box of packed oranges at the Boston State Fair, has been experimenting with iron filings in his young orchard. Being master mechanic of the Santa Fe system in northern California at San Bernardino, he knew more about iron filings than any other fertilizer. He is an admitted fact, I must confess, that the United States flag and increased her speed. The shots fell thick and fast around her, and when one struck her in the stern the commander thought it prudent to retreat and turned his vessel seaward. The cadets of the institution believe that act entitles them to the honor of the south, and the prestige thus acquired has made them the objects of envy throughout that whole section.—Charleston Letter in Chicago Record.

Does the Eye See? The question asked in the headline may sound odd to you if you have never taken the trouble to give the subject serious thought, but I venture the broad statement that you are not able to answer the question "Does the eye see?" It is an admitted fact, I must confess, that the United States flag and increased her speed. The shots fell thick and fast around her, and when one struck her in the stern the commander thought it prudent to retreat and turned his vessel seaward. The cadets of the institution believe that act entitles them to the honor of the south, and the prestige thus acquired has made them the objects of envy throughout that whole section.—Charleston Letter in Chicago Record.

Announcements. Editor SENTINEL & REPUBLICAN.—Please announce to the Republicans of Juniata county, that Uriah Shuman is a candidate for Representative Delegate to the next Republican State Convention. Mr. Shuman is a veteran Republican, and needs no introduction to the Republicans of Juniata county. —DELAWARE.

Editor SENTINEL & REPUBLICAN.—Please present the name of W. North Street of Patterson, N. J., as a candidate for Representative Delegate to the next Republican State Convention. —PATTERSON.

How Some Persons Make Pastoral Work a Burden to Their Pastors. Several well known clergymen of this city were chatting together the other day of a ministerial gathering a few days ago, when one of them remarked that one of the hardest things he had to contend with in his work as a pastor was the disposition of many members of his church to "broom handle."

Ready For the Cholera. Some years ago there was an outbreak of cholera in France, and instructions were forwarded to the mayor of a certain village to take all necessary precautions, as the epidemic was rapidly spreading.

Calm and the Storm. "Mrs. Dasher is a very quiet dresser, isn't she?" "Mercy, no. She storms at her maid until she can be heard away in the top flat."—Chicago Inter Ocean.

Ambition is so powerful a passion in the human breast that it has been known to reach even the most satisfied.—Machin-voli.

English leather gloves were sold over Europe in 1847. In obtaining alumina from clay, according to Heibling, supposing a clay of a known strength in the alumina, for each molecule of the latter there is incorporated with the clay three molecules of ammonium sulphate and an equal weight of neutral potassium sulphate. One molecule of the latter is theoretically sufficient, and the whole is well worked up and made into hollow bricks, to be baked at 270 degrees to 280 degrees. The ammonium sulphate is then decomposed into acid ammonium sulphate and ammoniacal gas, which may be collected in a condenser.

The manufacture of broom handles can be made profitable when the timber waste in making broom handles exceeds 50 per cent, while in the southwest it is usually less than 25 per cent. There are four factories in America, N. Y., one of which has a capacity of 1,200 finished brooms a day. They use hard wood handles from the south and west and get them for less than the bolts ready for the lathe can be furnished from native hardwood.

The handles are turned green and dried afterward. The large end on which the brush is wired must be thoroughly dry, or the broom will work loose. The drying of the upper part of the handle is of less consequence, except in the saving of freight.—Southern Lumberman.

Wool Bought. H. L. COOPER. No 3 NORTH FRONT ST. Correspondence Solicited. Philadelphia Long Distance Telephone 519.

A BALL AT THE ELYSEE.

How the Plain Dress of Our Minister There Distinguishes Him.

A modern ball at the palace of the Elysee, in Paris, where the president of France lives, is an extraordinarily brilliant and picturesque sight, for besides the military trappings and gold braid of the army officers and the exquisite, delicately tinted toilets and elaborate coiffures of the Frenchwomen, there are the varied habits of the many members of the diplomatic corps. These uniforms are so sufficient to furnish a brilliant mass of color and elaborate display. Described in detail and according to their nations, they are these:

Russia.—A green tunic, embroidered in silver and figured in blue. Germany.—A dark blue coat, embroidered in gold and green with gold ornaments. Austria.—A coat of green cloth, embroidered with a gold acanthus palm.

England.—A coat of dark blue, also embroidered with an acanthus palm of gold. Italy.—A coat of royal blue, embroidered with golden leaves. Spain.—A coat of blue, embellished with gold leaves and ornaments.

Portugal.—A coat of blue with golden leaves. It should be remembered that the rank of a diplomat is shown by the embroidery that adorns his uniform. The higher the rank, the greater the amount of gold that is upon his person. Ambassadors and ministers plenipotentiary have their collars and cuffs, their breast and the facings of their pockets set off with golden threads. The lesser grades of embassies and the various consular generals have just a shade less of adornment on their uniforms.

From an overplus of gold lace the conventional evening clothes of the American diplomat, who appears at a social and marked figure in the gay assemblies in his relief of somber black and white. The French presidents usually wear ordinary evening clothes, cut in the conventional style, their white shirt fronts are broken gorgeously by the broad red band of the Legion of Honor and the great star of that order.—New York World.

The manufacture of broom handles can be made profitable when the timber waste in making broom handles exceeds 50 per cent, while in the southwest it is usually less than 25 per cent. There are four factories in America, N. Y., one of which has a capacity of 1,200 finished brooms a day. They use hard wood handles from the south and west and get them for less than the bolts ready for the lathe can be furnished from native hardwood.

The handles are turned green and dried afterward. The large end on which the brush is wired must be thoroughly dry, or the broom will work loose. The drying of the upper part of the handle is of less consequence, except in the saving of freight.—Southern Lumberman.

GOOD HEALTH.

And a good appetite go hand in hand. With the loss of appetite, the system cannot long sustain itself. Thus the fortifications of good health are broken down and the system is liable to attacks of disease. It is such cases that the medicinal powers of Hood's Sarsaparilla are clearly shown. Thousands who have taken Hood's Sarsaparilla testify to its great merits as a purifier of the blood, its powers to restore and sharpen the appetite and promote a healthy condition of the digestive organs. Thus it is not what we say, but what Hood's Sarsaparilla does that tells the story and constitutes the strong recommendation that can be urged for any medicine. Why not take Hood's Sarsaparilla now? July 95's.

Ferguson & Son, will attend to the duties of their appointment, at their office in the Borough of Milltown on Friday, the 12th day of July, 1895, between the hours of 9 o'clock A. M. and 4 o'clock P. M., when and where all parties interested must appear, and prove their claims or objections, which will please present them for settlement June 15, 1895.

WILBERFORCE SCHWEIER, Auditor.

MURDER WILL OUT. LANCASTER, Pa., June 12.—After bearing the burden in silence for forty years of a double murder, Mrs. Hetty Good, an old woman, when confronted with the terrors of death, confessed to the crime committed in her youth. Mrs. Good lived in Bowmanville, a small place near here, and was 85 years of age. No shadow of suspicion of an awful crime had ever rested upon her and in the eyes of her neighbors, she was an unsuspected woman. For several years past, Mrs. Good had been slowly dying of consumption, and knowing that her end was drawing near, and probably harassed by the agonies of remorse, on Monday of last week, cut her throat. Her attempt at suicide, however, was a failure, and several days more of life were given to her in which to suffer. After her attempt at suicide, Mrs. Good asked that William Griffiths, who formerly lived at Bowmanville, but who is now a resident of Moresville, Berks county, be sent for. Griffiths is said to have been a friend of Mrs. Good's for years ago when she was a fair young woman and to have been the father of her illegitimate child. Griffiths obeyed the summons of his old sweetheart and to him Mrs. Good confessed that she had beaten out their baby's brains and buried it in the yard of her house.

The unusual crime of infanticide was not the only one that raged up on Mrs. Good's conscience. On Tuesday she sent for Rev. John Horning, a Mennonite preacher of Bowmanville, and to him Mrs. Good confessed that she had killed her grandmother, Mrs. Hutchison, by cowardly and secret means of poison. Mrs. Good said the crime had been committed with the full knowledge and consent of her grandfather, Mr. Hutchison, as the woman was old and decrepit and in the way.

After making her confession of her grandmother's mother, Mrs. Good grew rapidly worse and died last Friday. The details of the confession only reached here to day and it is rumored that there will be other startling developments. The woman's grandfather, who she accused of being a part in the crime, died of the same disease several years ago.

Itch on human, mange on horses, dogs and all stock, cured in 30 minutes by Woolford's Sanitary Lotion. This never fails. Sold by L. Banks & Co., Drugists, Milltown, Pa., Feb. 6, 1y.
