Far, dim-guesed realm of Somewhere, Be ond the present's pain,
Where dailying sails that come there
No'er leave thy ports again—
When life is done, and striving's o'er,
May some strong hand upon thy shore
Reach out a welcome evermor.
To pligrims serking Bomewhere!
WILL T. Halz, in Memphis Commercialpeal.

## A FAITHLESS WIFE.

The summer day was dying in the west; along the low, far-off line of the horizon the sky was full of flaming brightness, that mirrored itself in the blue waters that seemed to meet it. Higher up, the sky was full of purple shadows, shot through here and there with lines of gold.

Two persons walked along the beach-a man, who saw only the brightness in the face of the woman by his side, realizing in a vague way from her features, that held such a charm for him, the splendor of the sunset pageantry.

She was looking out to sea. The sunset fires seemed to glow beneath diance made her cheek bright and touched her hair with shifting lights. "I shall be gone three years," he said, softly, his eyes still on her face. "Three years are a long time," she

answered, slowly.
"I know that," he said; "but they cred like a guilty thing. cannot be longer to you than they will

She did not reply, but kept her eyes upon the fading brightness in the "You will write often, I know," he

said, taking her hand. "Your letters will help to make the time seem short-"But you are not sure of getting

them." she answered. "You are going far away, and into a country where one doesn't enjoy the means of correspondence with a great deal of certainty or reliability."
"But I shall know you have written if I do not get your letter," he said,

trustingly. John Derwent had a vast amount of faith in Agnes Brent. He loved her;

consequently he trusted her. "And you are going to-morrow?" She asked the question with a little prepared to state authoritively tha chadow in her face.

"Yes, I start to-morrow," he cluded from the public schools fo answered. "I shall not see you again. I have come to bid you good-by." She dropped the long lashes of her incredible, yet such are the plain eyelids to hide the tears that gathered cold facts. there. Her betrothed husband was going away for three lonesome years. She should miss him.

Like most women, sweet words and tender caresses were pleasant to her. as many as 9,000 children since Sep No one had ever cared for her before tember last. as John Derwent did. To know that she was loved by some one-that in that person's regard she was the one woman in the world-was a knowledge fraught with pleasant emotions.

They walked up and down the beach, while the sunset died away into sombre grayness, and till long after the yellow moon had started on her voyage children who sought to gain a little up the sky.

Then John Derwent kissed her goodby. She hung upon his neck, her this peculiarly pressing need. warm tears falling swiftly, and would , have kept him back. But he must go; and, with his kisses on her lips, he smaller towns are, as a rule, in bette whispered his words of parting-and

The writer adds that Cyrano anticl-

pated many aeronautic inventions, and was, of course, considered by his contemporaries as a verveau brule, or, in English, "somewhat off." This, as well there is nothing new under the sun. The Decimal System.

A modification of the decimal system for the division of time and angles is proposed by M. de Sarranton. The hour must be retained as the unit of time because it is universally accepted and it is hopeless to try to change it. Every hour, however, is divided into 100 minutes, and each minute into 100 sec onds. The new minutes would be 36 seconds long, three-fifths of the old minutes, and the new seconds a little over one-third as long the present see onds. Time would then be expresse in decimals: thus, 8.3348 would read hours 33 new minutes 48 new seconds For angular measurements he propose dividing the circle into 240 degrees instead of 360, with the same subdivision into 100 minutes of 100 seconds as for

Wolff Brothers of Kreu nach, have natented and put on the market a mute violin for the use of beginners on that instrument which remove the annoyance caused to listeners by he constant exercises of musical neighbors. The violin consists only of a mahogany frame without bottom like a violin. This unique instrument is not entirely mute, however, at produc s an exceeringly soft one, audible only to the player. The ound is delicately pure withal, as only in this way can it be of real value to the students -St. Louis
