A force of men are at work stretching additional telephone wires on the line through town. It was a queer act on the part of the town council that gave the right of way to the telephone company without a consideration. Trimmer's Rock, &c.

Those civil engineers of the "Penny" are still at work in this vicinity near Trimmer's Rock. Last week they ran a line from below this point across the river, thence through Howe township, striking the river again at Michael Oren's place, opposite Newport. This route, while it would necessitate the building of two bridges, would cut off at least a mile, and avoid the sharp curves, not alone at Trimmer's rock, but also above and below Newport. It would be much the safer, and probably less expensive in the long run. Gossip has it, that the company is thinking of running the line on the north side of the Juniata, striking the old canal bed at Millersport dam, and following it to a connection with the main line above Lewistown. This would be an important undertaking, but it is doubtful if the company is considering it very seriously. That something will be done, however, toward the obliteration of the dangerous curves at Trimmer's Rock and vicinity before long is pretty generally believed.—Newport Ledger.

The prosecutor J. B. McCahan was the star witness for the Commonwealth, and swore that he had seen the defendant in the act of committing adultery with William Leidy. Other witnesses swore to acts that were at least imprudent on the part of the defendant. Mrs. McNurlin charged the prosecutor with being jealous, because she refused him favors and also charged him with being guilty of an attempt to commit a serious crime against her. The jury rendered a verdict not guilty, but the defendant to pay \$100.00 costs, and the prosecutor the balance.
