#### A FATHER'S SECRET.

MILY VANE sat in the drawingthe sea and the Cleveland hills, but she saw neither sea nor hills. She been now some five weeks at Saltburn, in a large house which Mr. Vane had rented for the summer. Henry Vane, Esq., owned a good-sized mansion in Belgravia, where he had lived for the past eight years during the London season, and an estate near Nottingham, amid picturesque scenery, where he generally resided when not in London. Each summer, however, he rented his house at Saltburn: for not only Emily. but himself too, was charmed with the quiet, beautiful Yorkshire watering place. From all of which it will be at once surmised that Henry Vane, Esq., was a man of wealth.

His money had been acquired abroad. and though of his family nothing or little was known in society, he was well received by some excellent houses; for even a titled person does not care panions like a coward. lightly to offend one whose income is £40.000.

Emily Vane saw neither sea nor hills. Her thoughts were wholly occupied by two letters in front of her. Both had come that morning, and both were proposals for her hand. The first of them was from the Earl of Seacroft. who for some time had been paying Miss Vane noticeable attentions, and who, both as regarded personal qualities and position, was indeed no bad match for any English maiden. He was yet young and fairly wealthy, and for some months-in fact, since Emily had "come out"-had been a victim to her beauty and charms. She admitted to herself that Lord Seacroft's proposal was not one to be lightly set aside.

the keepers swore that he had fired the shot. For himself, he knew not whether this was so; several of his fellow poschers said he was innocent, and that the real culprit had escaped. His sentence, however, was that of penal servi-tude at Botany Bay for life-probably the doubt alone saved him from being hanged.

"Naturally, his spirit was galled; he became morose, wild, severe in aspect as in temper, and his reputation on the convict ship was that of the worst criminal on board. He rebelled at his jailers, at his food, at his confinement, and felt ready for any dark deed. The chance soon came. deepest ocean. And that best sarsaparilla is——?.... There's the rub! You can measure mountain height and ocean depth, but how test sarsaparilla? You could, if you were chemists. But then, do you need to test it? The World's Fair Committee tested it,-and thoroughly. They went behind the label on the bottle. What did this sarsaparilla test result in? Every make of sarsaparilla shut out of the Fair, except Ayer's. So it was that Ayer's was the only sarsaparilla admitted to the World's Fair. The committee found it the best. They had no room for anything that was not the best. And as the best, Ayer's Sarsaparilla received the medal and awards due its merits. Remember the word "best" is a bubble any breath can blow; but there are pins to prick such bubbles. Those others are blowing more "best sarsaparilla" bubbles since the World's Fair pricked the old ones. True, but Ayer's Sarsaparilla has the medal. The pin that scratches the medal proves it gold. The pin that pricks the bubble proves it wind. We point to medals, not bubples, when we say: The best sarsaparilla is Aver's.
