THE democrats carried the state election last week in Alabama, electng a governor and other state oficers. The populists accuse them of raudulent voting.

The times are bad, but don't help to make them many times worse by roting the democratic ticket. Vote the republican ticket from the head of the ticket to the foot, and gradually the ship of state will right her self and times will grow better.

Our business men, our tatesmen, our politicians, our preachers, our teachers, our railroad men, indeed all the men in every depart ment of life in the United States are aboring men or the descendants of vorking men. Our prominent men are the descendants of working men and women. So then in the light of be fact of American life, Bryan's metaphor speech of a golden crown of thorns on the brow of labor, turns ut to be speech twaddle.

Wiles Bryan was making speeches the past presidential campaign, he port the so called Democratic party, pre--ivocated free trade on a taciff as cisely as in 1861 he refused to support it mar to free trade as could well be when it threatened the solidarity of the macted. BOGOTA, June 17.—As the money question seems to be the important question in

the present political contest in the United waukee and St. Paul railway, at rate States, I thought it might be of interes of about one cent per mile, good to retura until September 30th. to know what effect silver legislation has For further particulars call on the had upon the people of Colombia. About 1880 gold was at a premium, be cause the imports exceeded the exports, and as the balance had to be paid in gold

it required a small premium to get the gold for the purpose. Up to 1885 the gov-ernment continued to coin gold and silver. and at that time gold was at a premium over silver of about 20 per cent. In 1885 congress passed a law that made paper money a legal tender for all debts, return at rate of one fare for the round trup, from principal stations between East Liberty and Bryn Mawr, on the with gold.

From that time to this there has been no gold in circulation in Colombia.

The effect of this was to raise the premium on gold from 20 per cent. in 1885 to 100 corrected in 1865.

At the present time, June 17, exchange on New York is 140, the price of exchange depending wholly upon the number of drafts upon the market and the demand for them. Now, to show the service and specific rates application effect of this upon the people of Colombia I will give facts that are well auther

Prices Sour Upward.

In 1885, when gold was at a premium of 20 per cent., wages of workingmen on the plains of Bogota were forty cents a day, and in the hot country sixty cents a day At the present time wages are sixty and ninety cents respectively, an advance of 50 per cent. All provisions have increased in cost about 200 per cent. Meats at that time were seiling for from twelve to fifteen cents per pound. At the present time they sell for forty and fifty cents.

House rents have increased from 100 to 200 per cent. Small tenements, such as poor people occupy, could be had in 1885 for 83 a month; now the same tenements bring 88. In 1884 and 1885 the Protestant minister of Bogota occupied a house for which he paid \$50 a month; at the present time the same house brings \$200 a month Mean Quality of Goods.

In 1885 table board could be had at the best hotels for \$1 a day; now it is \$2 a day Duty of the Hour Is the Overthrow of and the proprietors all say there is much the Chicago Platform and All That It less money in the business than when ther received \$1. Wearing apparel has not increased in price la proportion to provisions, but this is because the people are too poor to buy the goods they were in the habit of wearing before, and the merchants have placed upon the market the poorest quality of goods made in Europe for the market. The reason that mer chants give for not buying more goods in the United States is that the goods are too good and the people cannot afford to buy

> It seems to me that if the workingme of the United States will study this object lesson they will readily see that what they want is an honest dollar that will buy as much in the markets abroad as the dollar of any other nation.

Two Dollars for One.

If silver is coined in the United State at the rate of 16 to 1, while the gold in a gold dollar is worth 100 cents in any country in the world, and the silver in a silver dollar is only worth 50 cents, is it no plain that the experience of Colombia, and in fact all South American countries where it has been tried, will be the experi ence of the United States?

The gold will all leave the country, and it will require two dollars of silver to buy one dollar's worth of goods in the markets of the world, where gold is the standard. The next question is, will the wages of labor be increased in proportion to the increase of the cost of living? The price of labor will always be governed by the law of supply and demand, while the cost

A St. Louis manufacturer has offered to pay his employes two Mexican dollars honest. Thousands of them, millions, if | for every dollar due them in American dollar that is worth its face value. Yet there is enough silver in nine Mexican dollars to coin ten silver dollars in this country, at a ratio of 16 to 1 with gold.
