### A "SAFE" AFFAIR.

Philip Marsden, senior partner of Marsden & Rylotty, bankers, sat alone one evening in his counting house. The season had been a very prosperous one, for much money had changed hands through the unsettled state of the public mind, occasioned by bank failures and the explosions of public companies, but Marsden & Rvlotty's bank had stood unshaken, for it was conducted upon a sound financial basis, with a large capital, and had become quite as old-established institution.

In consequence of the aforesaid fallures, the receipts at Marsden's had expanded enormously, and Mr. Philip. whose heart and soul were in the lifelong work which his great grandfather stayed behind for an hour or so of late set to work with a will." in his eye, prophesied that Marsden safes in use. would assuredly die in the harness.

form you that a daring robbery is contemplated upon your bank to-night." "Never!" said Mr. Marsden, starting aghast. "Why, these premises are proof against anything."

"You may think so, but you don't know these men. To go into the matter, sir, it came about in this way: We were on the scent of a notorious little gang of three expert bank robbers and safe-breakers a short time since, and therough smart fellows, too. But, unfortunately, we only succeeded in running one to earth-the others eluded us. The prisoner was convicted and sentenced to ten years' penal servitude; but, like similar cases we have known it subsequently came to his knowledge that his confederates had since his incarceration not acted up to their promise in making provision for his aged mother out of their ill-getten gains, so he, in a spirit of revenge, peached upon them, and furnished us with full information concerning their whereabouts and future intentions. You ask any wool dealer who has ever handled New England wool and he will tell you the clippings of sheep from the same breed on opposite sides of the Connecticut River, one in New Hampshire and the other in Vermont, differ from each other. On one side of the river is a granite soil and on the other a limestone soil, and the difference in grass grown on these two soils makes a difference in the wool. Now, the rich black prairies of Illinois make a wool from the same family of sheep which is quite a little coarser than the wool of the sheep branch to grow up as a good branch grown on the finer grass of Ohlo and Pennsylvania. A Californian's Letter Drew Crewd to the Gold-Fields

Owing to the unsettled state of affair a Venesuels, I departed for Britisi secure. On arriving at Georgetown, the beautiful capital of the colony, with about sixty thousand inhabitants, I found a hundred Californio miners stranded and full of indignation. They had been lured to Guiana by a letter which had found wide circulation in the newspapers of the Pacific coast. A man who had served as cook in a California mining camp had gone to Guiana and had found a good position as manager of a placer-mine on the Barima River. Elated by his good fortune, he wrote a glowing account of his pros-pects to his wife in California. She showed the letter to the editor of the local paper, who published it as an item of important mining news.

This letter within a short time had the effect of starting groups of men from the coast mining fields, some of them even from British Columbia. It was a time of depression in the mining industries of the Pacific coast, and a great many miners were out of employ-ment. Though the writer of the letter had no intention of attracting others te his El Dorado, the Californians, who had assumed that it would be as easy to prospect for gold in Guiana as in California, regarded him as the author of their misadventure, and indulged freely in threats of vengeance. No harm came to him, however, because it is not a light matter to violate the laws n British Gulana. As these stranded miners had no money, they were unable to prospect, which requires a more or less expensive outfit; and they could not find employment in the diggings for the reason that white men are not employed on the placers, except as man-agers; and in fact nearly all the managers, like the laborers, are colored

The Californians had great difficulty in getting away; some of them reached some as stowaways; a very few obtained situations. One of them was engaged for six months as manager of a placer-mine on the Potaro River, March. How can I tell? Bewaret There is a new kind of bug, and it is a corker. It is spreading over the country from the Southwest, and hisman beings are its chosen prey. Already it has invaded the Mississippi Valley in great numbers, and many persons have nearly died from its bites. Not a whit more cheerful does this news become when it is explained that the insect in question is a giant specles of bed-bug. It comes from Mexico and Texas, and it measures a full inch in length.

## TIRED SALESWOMEN.

EMPLOYERS SHOULD BE MORE CONSIDERATE.

ing Statement by a Young Lac

in Brooklyn In the vast retail establishments of large cities, many women are employed as saleswomen.

Men formerly held the positions that

they are expected to do the same work. Their duties compel them to be on their feet from morning to night, and many of them, in a short time, contract these distressing complaints called "female
