tensive openings had not been made. Since then Colonel Moorehead has BENTINEL & REPUBLICAN MIFFLINTOWN. WEDNESDAY, DEC. 23, 1896. B. F. SCHWEIER EDITOR AND PROPRIETOR.

IMPORTANT RAILROAD ROUTE.

There has never been a more opportune time to build the railroad om this place to Selinsgrove than the present time. It is the best natural route in middle Pennsylvania to connect with the through westward Ohio and the Pennsylvania Central Railroad. It is the best natural route through Central Pennsylvania from the New England States to Vir-ginia and southward. A railroad run by this route would open new fields of profitable work and prove itself the connecting link batween import-Blair's Mills The construction of is no watered stock in the enterprise. If the possibilities of this route were understood or appreciated, it would reach the Broad Top semi-bitumin ous coal field. With extensions east and west the anthracite coal can be brought west and the semi-bituminfrom the Susquehanna to the Poto

of such ores.

enlarged greatly upon the opening of one of the phosphate veins and ha of one of the phosphate veins and has run a railroad from his main line to the mine. In the State College Bulletin, Professor Ihlseng says: "Three clas-es of phospatic material have thus far been discovered. The first is a friable white rock locally known as "white vein," containing in typical specimens from *twenty nine to fifty four per cent* of bone phosphate The second consists of red nodules simi-

lar in appearance to the so-called "clay iron stones," but containing from forty to fifty-two per cent. of bone phosphate along with a consid erable percentage of iron and alumsonnect with the through westward ina. The third class of material con-bound trunk lines, the Baltimore & sists of blocks of what appears to be Ohio and the Penusylvania Central dense blue limestone, but which ap-

the connecting link between import- firmed what he had previously learnant distant business centers. It is a ed of the great and valuable deposite route of easy grades, shallow cuts In a letter to Hon. J. C. Crawford, and short bridges, and what is of great importance on this route is the fact that about midway from the Determined that the facts gained at my last visit Susquehanna and Potomac, twenty-seven miles of railroad has been built early report and views expressed early report and views expressed and is in running order doing a nice therein, and as there was nothing business between Port Royal and new to present I confirmed my prethis stretch of railroad is the work of one man. Thomas S. Moorehead on that the transition that the stretch of the director. I am still of the conceived and executed the work sin-gls handed. He has had the fore-sight to see the importance of this port of a profitable industry. It is opinion that you have a very promisnow a question of pick and shovel ability to execute the work, and there Active work should give you an output that will furnish a fair margin of profit, and the formers of the central counties a cheaper material of high not be long till the road would be ex- fertilizing energy than they now get tended to the Susquehanna and the from the south. I trust that Mr. Potomac. It will require only a Moorehead will make it possible to lateral extension of 5 miles to ship the material at competitive prices with the various goods now on the market."

It is thus shown by the highest scientific authority in the state that ous coal sent east. When opened the phosphatic malerial is of a high percentage: high as animal bone. mae, it would lose its local character. Professor Lebig the world wide reeistics and become a great highway ognized Agricultural chemist says between the richer eastern states and that the best animal bone does not the rapidly developing southern states. Locally considered it passes phate than fifty-five per cent. A great through a beautiful and fertile and deal of what is considered good anithickly populated valley the railroad mal bone falls a long distance below traffic of which itself will be of im that percentage. By other tests than portance on either or both sides of State College tests some of the Tusthe villey all along the line of the carora Valley phosphates run above route are fossiliferous and hematite the highest animal bone percentage. iron ores. The possibilities in these In this brief summary of the unde particulars have been overlooked by veloped resources lying along the men, who have a hand in the mining Tuscarora Valley Railroad and its
