THE NAME CAME BACK. And For Awhile the Doctor Could No.

See the Humor of It. It is a familiar contention among psychologists that an incident once theroughly presented to the human mind cannot be effaced from the memory. In this connection Dr. Cyrus Hamlin, the well known missionary to Turkey and the founder of Robert college, Constantinople, is reported by the Wash ington Star as telling a humorous story.

Among Dr. Hamlin's friends and

Rock Fictures In Cregon. W. B. Whittenere while in Alturas, Or., recently discovered some remarkable hieroglyphics alout 15 miles northeast from the perih end of Warner valley on the edge of what is locally known as the "desert" in Lake county. Mr. Whittemore says the hieroglyphics had been cut with a sharp instrument in the surface of the hard basaltic rock. They cover the face of the bluff for a distance | plements. of about three miles and consist of pictures of Indians with bows, arrows and spears, besides deer, antelope, dogs and wolves, geese, ducks, swans and reptiles of various kinds. Intermineled with these animals are characters which, of course, he could not decipher. He says that the execution of the pictures was very good, and he is satisfied that it could not have been the work of ordinary Indians Throughout the entire distance the char

acters and pictures are in rows. The Indians of the vicinity have no knowledge of the meaning of the hieroglyphics or of the people who ages ago chiseled them on the surface of the rocks. From the description given, the picture writing bears a close resemblance to that found in Mexico and Central America. If this supposition is true, a careful study might reveal to the archæologist some insight into the origin or wanderings of a dead and forgotter civilization.—Cer. San Francisco Call.
