BENTINEL & REPUBLICAN | A GREAT INVENTION.

IT IS TO CARRY ELECTRICITY WITH OUT LOSS OF POWER.

haust the Air From the Tube Which Carries the Wire, and You Have It-That Is, Until You Wake Up Again

"I've got the greatest thing in the world," remarked a prosperous looking individual who walked into the office of one of the most prominent consulting engineers and electricians in the country as an Express reporter was sitting in the outer office.
"What is it?" asked the engineer.

"I'll tell you," responded the pros-perous looking man. "It's an invenas caused the manufactureries to tion"-here the engineer began to look and throw the men out of em bored, but he smiled politely and his visitor continued-"an invention that will revolutionize the business of trans-

mitting electric power." Now if there is one thing that this particular engineer is more interested the firm had not employments for all in or knows more about than anything and sowed tares and the tares mission of electric power. He began to ang up and produced an ugly look a little more interested and urged by Provoking the men to believe his visitor to tell him what the scheme that they had been misled when they was and also to inform him what he

"Well, before I describe the invenfor McKinley, that the times tell you what we've done. We've discovered a way to transmit power with absolutely no loss in transmission-abpaign was on it was in one light so-lute-ly no loss. Do you realize what

"It means you'll own the earth if that McKinley legislation on you've got it," remarked the engineer. "Correct!" exclaimed the prosperou man. "As you so aptly put it, we'll own the earth. You will notice I do not admit that there is any doubt about the preposition. We knew what we have get. We have seen it work. There's

"What tests have you made?" "Tests? Why, my dear sir, we have reign goods have filled the ware made the most exhaustive tests. We at all the ports of entry in the bave built a mile of conduit, sir, and i States with foreign cheap the most delicate instruments fail to detect the slightest loss of power in detect the slightest loss of power in transmission. Oh, there is no question that the process works to perfection! ougcess, and the passage of his Now, what I want you to do is to give f hills will set the work shops us your opinion on it. Study the suband in motion, and thereby give ject, give your opinion in writing, and we'll pay you handsomely."

"Well, tell me what your precess is and I'll see what I think of it," said the engineer. "If I think you have a orld, where they get labor so practicable thing, I'd like to see your

alle them at the wages paid in the talk, sir; shows you are a conservative man, sir. I wouldn't give a rap for the for the McKinley administra | cpinion of a man who jumps at conclumake times better by contin- sions, sir. Now, I'll tell you what this ong Democratic tariff lines. great invention consists of. It's a vais to be a change in the cuum-nothing but a vacuum. You imong the manufacturers, it knew a vacuum is the most perfect insay be brought about by Repub | sulation, don't you? Put a vacuum ariff laws, and Cangress has around a wire and the electricity can't t passed such laws, and Demo- get away. Moisture can't get at the wire. Air can't get at it. Vacuum'll keep the current on the wire, won't it?" The engineer allowed that a vacuum,

"Well," continued the presperous countries of the old world, and looking man, "we just take this vaccuin men in Pittsburg rioted um idea and carry it to its ultimate tore down the picture of Me-conclusion, anderstand—to its last analysis, so to speak. It's casy enough to they were violently denouncing curround a wire with a vacuum. All President, who is the great cham. you've got to do is to put the wire in a isn't it? Well, suppose you pump away until you've got ail the air out; you've got your wire insulated, haven't you? Can't lose any current, can you? lard laws are continued, the prices But that's all. You've got the resistance wages will have to go lower and of the wire to deal with, and that's war, till they are so adjusted that where you lose energy. That is where eveling conditions between the our discovery cenies in. We know why States and Europe are the resistance exists, and from that it's

into harmonious work- easy to learn how to cure it. if the men who let themselves up of molecules, isn'tit? Molecules keep up of molecules, isn'tit? The only opium permitted to be used by the British Pharmacopæia is obtained from Asia Minor.

CHINESE SOLDIERS.

A young man from my native town entered the army, and by dint of hard fighting and real merit rose to the rank of brigadier general, but with him at every promotion rose his brother, whom I will call X., who had not met him for years and who was peacefully occupied as cook in a distant opium den. This is how it was done. The soldier, after each engagement in which he dis-tinguished himself, reported imaginary deeds of valor performed by his brother, and his word was taken. One day the cook in the opium den, who had never even seen a battle, read his name in The Gazette and found to his surprise that he had attained the rank of colonel in he imperial forces.

Military service is in many ways very remunerative to the officers. They enroll any men they like, and they always draw the pay for many more men than are actually in the army. About 70 per cent of the full number of men nominally serving and for whom pay is drawn is the average strength of the forces, even under Li Hung Chang's comparatively honest officers, while elsewhere 100 men on paper usually mean but 40 or 50 in the flesh. On review days the officers engage a sufficient number of soldiers by the day to make the army look all right. But there are other sources of profit besides dealing in dummy soldiers. The live ones have to wear uniforms and to eat, and both food and clothes are supplied at extortionate prices by the officers, so that of the 5 taels per month paid by the government for each soldier, about one-fifth or less reaches the pockets of the men. All this refers to the "braves" who are only engaged during wartime and are disbanded the moment the fighting is over wherever they may happen to be and nearly always without the means of returning to their homes, thus keeping up the supply of armed robbers all

over the empire. As to the soldiers of the standing army in times of peace, they are, with the exception of the Mantchoo garrison, so wretchedly paid that its strength exists only on paper. The men enlist and regularly draw their pay-3 shillings per menth-and have scarcely any further connection with the military service. The few that go on duty in the city gates live entirely on bribes. The Manchu force under the Tartar general, on the other hand, is well paid, but these soldiers do no fighting. They are only engaged in guarding the city against Chinese rebels. They live in a separate quarter to that occupied by the Chinese, on whom they often make unprovoked attacks. Thus fights between the Chinese and the Tartar soldiery are of common occurrence, and as these Tartar soldiers are not under the jurisdiction of the civil law their outrages invariably go unpunished. Naturally there is no love lest between the city guards and

the native Chinese. - English Exchange. Baseball Batting.

The ideal batter puts into his streke, first, body motion; second, upper arm meticn; third, ferearm motion, and fourth, wrist motion. The stroke begins with a strong body swing, which is followed by the motions of the upper and fore arm respectively, and ends with a short, quick snap of the wrists. Although this is the analysis of the ideal stroke, it is not precisely the one that I would recommend for the majority of their full extent against good pitchers requires an ability to judge the ball more quickly and accurately than amatenrs, with few exceptions, can do. The wrist and arm motions can be controlled more easily and quickly than the body swing, so that if most of the latter is left off the batter has a greater chance of judging the ball accurately. I therefore think, as accuracy is absoaround, you have seen one who is guilty vent the grip. of two breaches of correct batting principles. First, having entirely sacrificed the important arm and wrist motions, he has, with stiff arms and wrists, depended entirely upon a powerful body will be well to bear in mind that and 6 days. against any pitcher a good, clean hit can be made, even without any body motion, if the ball be hit squarely and with a quick arm motion and snap of

the wrists. - Harper's Round Table. His View of Our Women According to the Rev. Dr. F. E. Clark. American women are thus referred to by the Swami Vivekanenda, the Hindoo who was so popular with women while he was in this country: "When a woman tries her best to find a husband, she goes to all the bathing places imaginable and tries all serts of tricks to catch man. When she fails in her attempts, she becomes what they call in America an 'old maid' and joins the church. Some of them become very 'churchy. These churchwomen are awful fanatics. They are under the thumb of the priests there. Between them and the priests they make a hell on earth. They make a mess of religion. With the exception of these the Americans are a very good people. They loved me so much. I loved them. I felt as though I was one of them."-New York Tribune.

Money to Slice Up. A woman puzzled a Boston clerk considerably recently. Her husband is a bank president in Newburyport. The national banks receive their bills in sheets of 12, which are cut after being signed. The generous president gave one of these sheets to his wife, and she augh, near Williamsport, was killed naturally started at once for Boston. and skinned, the hind quarters car-After making some purchases in one of ried off and the skin and the other the large stores she drew the bills out part left lying in the meadow. Savof her pocketbook and calmly said to eral places were searched without the clerk, "Lend me your seissors, and success, among them those of Wm. I will pay you," thereupon cutting off Liddick and H. A. Kinley. Aftera bill. The astounded clerk at first re- wards Liddick and Kinley brough fused to receive such money from so open a manufacturer of currency, but finally the matter was explained .- Boston Record.

Wouldn't Do In Kentucky. "Now," said the lecturer on natural science before a Kentucky audience, "we will suppose a region in which nothing existed but water." "Nol no!" replied a dozen indignant voices at once. "We will suppose nothing of the kind."-Atlanta Constitu

In former times deformed people were frequently thrown into prison to be kept out of sight.

STRANGE THINGS AT SEA.

A Cloud Cradled Frog and a Cat That Would Not Drown. A remarkable story about the American ship Iroquois picking a live frog off a cloud in midocean excited a murmur a cloud in midocean excited a murmur of comment along the water front, and had the story come to port with almost any other man but Captain Taylor it might have been doubted. Taylor's reputation for veracity is well established in Portland, so the strange story was taken without a grain of salt and with only a few drinks of whisky. An unusual tale of the sea always brings to the only Pills to take with Hood's Sarsanarilla. nsmal tale of the sea always brings to mind another, and the frog story of the

Iroquois was no exception.
"There's strange things happen on board ship, sometimes," said Al Betts, the well known river pilot, "and scraping frogs off the clouds with a topmast is not the strangest. I remember an oc-currence on board the old clipper Plumduff, which was so remarkable that I am frequently accused of handling the trnth in a careless manner when I relate it.

"The Plumduff was en route from Calcutta for the Columbia in ballast, and I was first mate under Captain Timbertoes. Among other live stock aboard was a maltese cat. The cat behaved very well for the first week or two. but when we got over on the equator she made the night hideous with her incessant yowling. Old Timbertoes had the gout and did not sleep well anyway, and this infliction nearly made him crazy, so one night he came out, and finding the cat in a good, convenien position, kicked her over into the sound

"The only witness to the deed was lascar sailer at the wheel, and when he told the rest of the crew we almost had a mutiny on our hands, as they prophe-sied all sorts of bad luck would happen to the ship. Nothing came of it, however, and as we were in good ballast trim we came flying along in rattling shape, and about 90 days after leaving the Ganges our mudbook went down in tom house boat came out, and when the officers clambered aboard Denny Curran the boatman, slacked away on his lan yard and his boat came around under the stern. A mement later we heard yell, and Denny was coming up the ladder hand over hand as though the devil was after him, and in his boat, making a united chorus of 'meows,' was our old maltese cat and five half

grown kittens. "When Denny recovered his breath he stated that, as his boat swung around under the stern, the animals immediately sprang off the top of the rudder, and the unusual sight nearly charged 10 cents per line for each insertion, frightened him to death. We then went back and made an examination of the rudder and found that with her claws

The tions recommending candidates will be charged 10 cents per line for each insertion.

Will M. ALLISON,

Editor Juniata Herald. immediately sprang off the top of the the abandoned cat had scratched a cay ity out of the top of the rudder, and while the lascar sailors had been mourning her death she was engaged in rearing a family. The rudder, being high out of the water, of course prevented her getting wet very often, and a number of fishbones still reposing in Spruce Hill, March 17, 1897. the cavity indicated the diet which had kept her alive. She was taken ashore, and I think Scott Johnson, the Astoria stevedore, has some of her descendants yet, and to this day they will eat nothing but sea fish."-Portland Oregonian
