STATISTICS AS TO DUELING.

Code Is Most Popular in Germany, with France Next. More duels are fought in Germany than in any other country. Most of them are student duels, which culminate in nothing more serious than slashed cheeks or torn scales, which look extremely ugly when healed and often cause much trouble to the sufferer while healing. Of all German university towns Jena and Gottingen are most devoted to the code. In Gottingen the number of duels averages one a day, year in and year out. Within the space of four and twenty cor secutive hours, several years ago, twelve duels were fought in Gettingen. In Jena the record for one day in recent times is twenty-one. Fully 4,000 student duels are fought every year in the German empire. In addition to these there are the more serious duels beween officers and civilians. Among Germans of mature years the annual number of duels is about 100. Next to Germany France is most

given to the dueling habit. She has every year hundreds of meetings "to satisfy honor"—that is, merely to give men the opportunity to wipe out insults by crossing swords or firing pistols in such a way as to preclude the slightest chance of injury. In the duel statistics these meetings are not reckoned, as they are far less perilous than even the German student duels. Of the serious duels France can boast fully 1,000 per annum. The majority of these are among army officers. More than half of them result in wounds and nearly 20 per cent. in serious wounds.

Italy has had 2.759 duels in the last ten years. Some 2,400 of these meetngs were fought with swords, 179 with pistols, ninety with rapiers and one with revolvers. In 974 cases the insult originated in newspaper articles or in public letters and scores were purely literary quarrels. More than 700 princinals were insulted by word of mouth. Political discussions led to 559 and religious discussions to twenty-nine meetings. Quarrels at the gaming table were responsible for 189. A summary shows that as regards numbers the sequence of dueling countries is: Germany, France, Italy, Aus tria and Russia .-- London Mail.

A Queer Calling. To-day, even the emotions have value in the money market. There are in London professional sympathizers who soothe and comfort the bereaved in return for pelf, performing the service for which they are engaged in so tactful a way that they soon become indispensable to their employers. One of the most prosperous of their sympathizera is a lady of unusual characteristics. She is a charming conversationalist, has a useful knowledge of medicine, and possesses a marvelous power of sympathy, which fairly fascinates those upon whom it is exercised. By these methods, combined with innate tact, she has contrived to secure the patronage of several wealthy ladies, upon whose bounty she thrives amasingly, giving them in exchange timely supplies of the suave and magnetic solace for which she is so remarkable.
