OUR FROGS AND THEIR LEGS.

Porty Species Are Known, and Louis Forty Species Are Known, and Louisi-ana's Four-Pounders Are Largest. Forty species of frogs are known to the world, according to the frog man of the Smithsonian Institution, who has given the matter laborious attention. Less than a quarter of a century ago only a few people ate frogs, but now they are generally eaten. The overnment's frog man will not acowledge that Canada produces finer frogs than the United States. He con-fends that the marshes back of the Po-tomac, the Louisiana swamps and the swamps and marshes of New York and Illinois, are to be found the finest and nost succulent frogs in the known world. It is admitted, however, that the Canadians undertsand the art of preparing frogs' legs for market in manner superior to Americans, and that this fact has brought the Canada frogs prominently before the lovers of good things to eat. He believes that frog farming is certain to be one of the most profitable ludustries of many parts of the United States, and that already many men are engaged in it. Of the forty species of frogs known the largest is the gigantic bellower of the Louisiana swamps, which grows to four pounds' weight and is one of the most choice for table use. Next come the Potomac and the Illihois and New

flavor. There is not a State in the Union in which fine eating frogs cannot be found in abundance. It is asserted that the pickings on the body of a frog are just as good as the meat on the legs, but in the days before the deluge frogs grew to such size that the legs furnishing sufficient meat to satisfy all demands without eating the body, and apparently the custom has been kept up. Geological sharps have dug up petrifactions and fossils to prove that in those days frogs grew be as large as a man. The present day frog man gives little consideration reverence to such stories.

York frogs-all large and of superior

and there should be little wonder that he is a jumper. The frog is astonish ingly like the man in some physical respects, and therefore useful for some experiments. On the other hand, exments show that a frog deprived of his brains will live and eat and pursue existence in a sort of automatic

correspondent of the Philadelphia Press writes: "My right leg was taken off at the middle third of the thigh nearly thirty years ago, but since that time the sensation of the presence of toes, instep, heel, foot or knee is stronger than in the other leg, or stronger than it was before amoutation. To me it seems that when the leg is at rest. there is always more or less sensation in the stump. My leg was amputated in such a position that it seems when I stand to be flexed with the foot behind me. I have often tried to get it out of the way of a closing door or of persons passing me on the street. To this day I often fall by trying to put out my foot on the floor when springing juickly from a sitting position. Year by year, also, there is a sensation of shortening, the foot seeming to come nearer the body. If I make an effort as if to extend the knee a sensation

the rest of my body may be freezing.

of heat occurs in the stump, although

"Mit Lots of Feddars." had become self-supporting did he have a chance to pursue the regular or of bronze or gold in Ser studies which most people have in ear-lier life. When he began drawing for a living his workmanship was so excellent that he had no difficulty in securing orders. One day he delivered some sketches to an employer, who said: "By the by, Frank, I want a picture drawn in a great hurry. It is a novel thing, a boxing kangaroo." "Ja wohl," answered the artist. "I

will have it ready to-morrow for you." "You know what a kangaroo is, of Frank must have been thinking of an that, however, and, with more than 60,ostrich, because he answered with a

omplacent smile: "Ja, gewisslich. It is a long, tall thing mit lots of feddars." And "Feddars" has been his nickname ever since.—Philadelphia Post.

A Common Gender Pronoun It is still a marvel to writers, who most feel the need of an epicene pronoun, why the suggestion, years ago, made by Prof. Marsh, that then should fill the long-felt need, was not accepted. During the '60s another ingenious gentleman proposed such a pronoun, to be declined thus: Heesh-he or she. Hizzer-his or her. Himmer-him or John and Mary that he would punish himmer if heesh did not learn hizzen esson." Let us have a common gen der pronoun by all means. The writer's vote is in favor of thon.

"In the North," said the old man to a reporter, "the desire into the tent by crawling under it was is confined to the small box the South the entire cold tion comes to the ground and around day and night looking for opportunity to get in free. And crawl under the canvas seems to the to be the easiest way. Men and tramp around and around the tent looking for an unguarded point. We always put extra canvasmen on watch when we go to the South with our show. have witnessed more than one amu and exciting incident growing out of this desire of the negro to get into the circus without buying a ticket. They go literally circus-mad when the show comes to town, and they won't do a tap of work until it leaves. One reason why they don't step up to the ticket wagon and hand out their coin is that they never have any. There may be other reasons, but I have never inquire

further into the subject.
"I was with old Adam Forepaugh one fall when he took his show to the South for an extended season. Two new canvasmen nearly precipitated a riot for us at Lexington, Ky. They had been hired for the special purpose of keeping negroes from crawling under the tent, and they saw an opportunity to make a little money for themselves on the side. They were able to work out their scheme through the fact that they were favorably stationed for it. One was on the outside at the connection between the main tent and the menagerie, and the other on the inside, within the con-

"Among the vast crowd of negroes hanging about the show was a large number who had come to town expect ing to get in for 10 or 25 cents. The outside canvasman gave out a quiet tip that if any one had any change in his pockets, by giving it to the right person he could get into the show at cut rates. They began to crowd around him, tendering varied amounts of money, from 1 cent up to 45. He accepted all ten ders. He told them that he would have to put them in one at a time. He did. "The inside man was waiting for them. Just as soon as a black head

would appear under the canvas he would grab it, drag the rest of the person owning it inside and shove him out of the other side of the narrow connec tion. From here it was a long way around to the man who got the money. If one of the dupes found his way back which was uncertain, and wanted his money returned, he was prompily shoved under the canvas again and just as promptly kicked out on the other side. It was a kind of an endless chain "Why didn't the two men let then stay in? Well, old Adam Forepaugh

was about, and if he saw an unsua number of negroes in the tent he would at once have made the rounds to find where they were getting in. That was why. The show was about half over that night when an unearthly racke started at the connection. A minute or two passed, and we saw two canvasmen running for life around the hippo drome track with an angry yelling crowd of negroes after them. The audience enjoyed it immensely. Thought it was part of the show. We knew different. A lot of us jumped in and headed the negroes off. That gave the canvasmen time to escape. After we learned the cause of it we regretted our interference. We lost two promising can-

Put Out No Poleon It is said there is a law on the statute books which provides that anybody who shall expose any poisonous sub stance with the intention of taking the life of any domestic animal, said animal being the property of another, shall be sentenced to the penitentlary for not less than the year or more than four years, or pay a fine not exceeding \$1,000 or both. The law applies not only to dogs and cats, but to horses. cattle, chickens and even guinea pigs. Nor is it any excuse to plead that the polson was put in one's own back yard and if the domestic pets of a neighbor

not have gotten it. Gold Medal Prize Treatise, 25 Cents. The Science of Life, or Self-Preservation, 365 pages, with engravings. 25 cts., paper cover; cloth, full glit, \$1, by mail. MADE RICH BY SALTED MINE

Two Widows Get Wealthy After Being Imposed Upon by Sharpers.

A good story is going the rounds about how two prospectors had saited a mine in the Galena district in order to rob a couple of rich widows, which resuited in the aforesaid widows becoming much wealthier.

The prospectors had spent their last cent in digging a hole in the ground to the extent of sixty feet without striking anything but yellow clay. But one of them knew of two rich widows who were just spoiling to have their money sunk in a mine. Accordingly they spent two nights in salting their mine. They hadn't sufficient money to buy some paying dirt, but they stole this from a neighboring mine and hauled a lot of it over to dump into their mine. When several tons of this "paying dirt" had accumulated in the bottom of their mine the widows were sent for, and while one was talking about the increasing value of the district the other was dumping out all kinds of lead and sinc ore before their astonished eyes. The widows bought a half interest in that hole in the ground for \$1,500. The next day there was no more ore in the shaft and the fellows declared they would dig no longer. Then the widowbought the other half interest at a tota cost of \$2,000, and the men hiked ou for Missouri, laughing in their sleeve But the women, blindly believing tha there must be more ore, continued wit the digging, and at a depth of ten add. tional feet struck the richest vein of the whole belt, realizing \$75,000 in less tha

one year's time. Chinese Honor to an America The United States legation at Pekin, China, has sent to the Essex institute of Massachusetts an attested copy of the imperial edict making a dem of General Frederick Townsend Ward of Salem, who was killed in the service of Chine. General Ward was the creator of the Chinese army, afterward commanded by "Chinese" Gordon. The document referred to is authenticated with the seals of the Chinese and American governments and is believed to be the only copy in the original Chinese to be found in this country, as the State Department at Wash-ington has only an English translation

Buried with \$500 in His Pocket. It is not often that a man is buried with \$500 in his pockets. His relatives generally look to that. But such a case as actually happened.

A few days ago Don Sabino Trujillo died and was buried in Dolores on Monday last. After the funeral the niece of the deceased informed the relatives of the dead man that he had at the time of his death the sum of \$500 in one of his pockets; for he was buried in his ordinary clothes. She had seen him ay the doctor, a short time before his leath, some money and put the re-mainder, \$500, in his breast pecket. so one had thought of looking for the mency, and as the young lady was rostrate with grief at the death of her nece and so did not remember anyhing about the matter until after the funeral, the money was buried with the corpse.-Two Republics.
