ON NELSON and his cousin Harry Morton, were deeply inter ested in the rearing of pigeons Their fathers owned adjoining farms, and the houses were about a quarter of a mile apart. Many were the journeys that the boys made to and fro in order to compare notes and to exchange ideas in regard to the care and training of their pets.

Indeed, so urgent and pressing at times was the need of speedy communisation that they so trained several birds of the carrier species that a message could be dispatched and a reply received in an astonishingly short space of time. Each boy carried home every night a pigeon from the other's dovecote, which

KEITH'S ELEVEN TRAKE OLD. Keith's Theatre will begin on Monday next the 12th year (571d consecutive week) of its career. In addition to be-ing the most profitable amusement en-terprise in Philadelphia, enjoying a cli-entele equal to any other two theatres, this house is the only one in the United States outside of Keith's, Boston, which has given performances every day in the year, save on Sunday, during the past decade. And the summer season is more profitable than is the regular season of the average theatre. it a favorable opportunity for him to pay his cousin a visit, and had caught ap his hat with that intention, when his father, passing through the kitchen where he was, said:

"Tom, I am going to the village, to be sone several hours, and I don't want you to leave the house. I have noticed several tramps around here lately and they might be troublesome to your mother if they found her alone."

"All right, sir," said Tom, who felt somewhat disappointed, but he had long ago learned to not grumble about trifles

"I feel uneasy about that money George," said Mrs. Nelson, who had en tered the room and was looking anxlously at her husband.

'What money?" asked Tom. "Why," said his father, "the school poard at their last meeting made me

treasurer and handed me all the funds, mounting to a little over \$500." "Where is it?" asked Tom again.

"Safely hidden away where no one will be likely to find it." answered his father, laughing. "If you and your mother don't know where it is you will not be able to tell any one, that's cer tain," and he went off.

"I never feel safe with so large an amount in the house," said Mrs. Nelson, and she went about her work with preoccupied air.

ing around him. Tom, who was a slightly built lad of 15, did not seem a formidable obstacle to this burly rogue, for after one careless glance in the boy's direction he took the chair offered by Mrs. Nelson and sat down to his dinner. Tom, remembering his father's part

ing words, was in a sore dilemma. He

instactively feared the man. for he knew that he had not the strength to contend with him if violence was offered, and he felt sure there would be trouble when the tramp had refreshed himself. There were no near neighbors, and he could not leave his mother alone while he went for help.

While all this was passing through his mind his glance fell upon the note he had written, and he started as a thought entered his mind. Seizing the pen, he opened the note and hurrledly added:

"A rascally looking tramp has just come in. Mother is feeding him, but there is no telling what he will be up to when he gets through eating. Ask uncle and Mike to come over as quick as they can. Father is away."

Fastening the note securely to the pigeon, he went to the door, and openng it let the bird go. As he did so the man sprung from the table where he had been swallowing his food in great gulps, caught Tom by the shoulder and fung him across the room, saying, roughly:

"Set down, souny, and make yourself easy. Goin' to call the neighbors, was sooner than she will a man that sent

facture of fibroleum, a new paper product, which is the invention of G. Brigalant, of Barentin, in France. This is a sort of leather paper on board, which is made from waste cuttings of skins into

small bits, and then immersing them in a large vat containing an alkaline solution, which dissolves the glutinous matter, but leaves the fibers unaltered. The resultant fiber is then beaten and afterward pressed through a refiner.

Bridge of Sand Built by Ants. Home Companion Something new and interesting about ants was learned by a florist recently,

For a week or so he had been bothered The time of the Roman occupation of by ants that got into boxes of seeds which rested on a shelf. To get rid of the ants he put into execution an old

plan, which was to place a meaty bone close by, which the ants soon covered every one deserting the boxes of seeds. As soon as the bone would become thickly inhabited by the little creepers the florist tossed it into a tub of water. The ants having been washed off, the

bone was put in use as a trap again. Yesterday the florist bethought himself that he would save trouble by placing the bone in the center of a sheet of fly

paper, believing that the ants would never get to the bone, but would get caught on the sticky fly paper while trying to reach the food.
