

TOWN, COUNTY, AND VARIETY.

Women's Temperance Prayer Meeting at the M. E. Church, on Thursday, at 2 o'clock, p. m.

We add thirty-seven new names to our subscription list since our last issue. We shall certainly "double our hay crop" at this rate.

Montrose Fire Company, No. 3, will hold their 8th Annual Reception, at Firemen's Hall, on Friday evening, Feb. 25th, 1876. The public are invited to attend.

B. C. Sayre has placed a very fine street lamp on the corner of Cherry and Turnpike streets. Mr. Sayre intends to keep it trimmed and burning every dark night.

Susquehanna Grange, No. 74, P. of H., will hold a Social and Mite Society at their Hall in Montrose, on Saturday, at 1 o'clock, p. m., Feb. 19th, 1876. All who can enjoy a good time are invited to be present.

The Ladies' Aid Society of St. Paul's Church, will hold a social at the residence of E. J. Webb, on Friday evening, February 18th. Refreshments will be served between the hours of 7 and 11 o'clock, p. m. Refreshment tickets 50 cents.

The Pennsylvania Coal Company resumed the mining of coal Tuesday the 8th, after a suspension of a week. The Company do not belong to the coal combination, and do not join in the five weeks suspension.

Rev. W. L. Thorpe's services as pastor of the M. E. Church, were duly acknowledged by a generous donation on last Friday afternoon and evening, notwithstanding the very rainy weather. The amount received was \$135.

Work has been suspended in the shops of the D. L. & W. R. R. Co. Scranton, and of the Del. & Hud. at Carbondale, and along the line, as well as at the mines, so that the suspension is very general with all employes connected with the mining and shipping of coal.

Homer says that he is afraid we will try to double our "hay crop" by claiming the credit of hastening the extension of the Montrose Railway. Hadn't it better convene the County Auditors upon this point? How very sensitive (or perhaps senseless is the proper word) some people are.

Quarterly meeting services will be held at the M. E. Church, next Sabbath. The Sacrament of Baptism will be administered; also the Sacrament of the Lord's Supper, in connection with the morning service. Rev. I. T. Walker, will preach in the evening. The Quarterly conference will convene Monday morning at 9 o'clock.

Says the Binghamton Republican: The Delaware and Hudson Canal Company are about to construct a new railroad from Nineveh, on the Albany and Susquehanna railroad, to Coventry, on the Chenango Valley railroad, a distance of twenty miles. Operations will be begun early in the spring. When built, the road will prove a formidable rival to the Midland.

Sylvester Slatter, the man who attempted suicide on the evening of the 5th inst., was examined at his residence by Drs. C. D. Spencer and L. T. Griffin, on Saturday last, as to his insanity. After a subsequent examination of the physicians by Surrogate Judge Edwards, the man was adjudged insane—cause religious mania, and financial troubles—and committed to the Insane Asylum at Utica.—Binghamton Times.

We notice that one of Susquehanna county's boys, G. G. Watrous, who is well known to many of our readers, and until about two years ago a resident of our town, is now, and has been for over a year, a member of the firm of J. W. Lyon & Co., Columbus, O. They are publishers of standard subscription books and Bibles, the specialty being the new work, "Polar and Tropical Worlds." Notices recommending this work will be found elsewhere.

The laying of a third rail by the Erie Railway between Waverly and Buffalo, will be in effect the first step taken by that road towards reduction of gauge. The tendency in all railroads is now toward narrow gauge, which is found to be quite as safe and convenient as broad gauge and much cheaper. In a few months the Albany and Susquehanna Railroad will be entirely narrow gauge; the Delaware, Lackawanna and Western Railroad are making arrangements for a similar change from Scranton to Syracuse; and it is safe to predict that ere many years a broad gauge car will be unknown in this locality.

The lecture on our National Centennial, delivered by the Rev. E. A. Warner, at the residence of Mr. Daniel Sayre, on Friday evening last, reflected great credit upon the lecturer, and was a decided success financially. The net receipts were \$60. Much credit for its success is due Mrs. D. Sayre and Miss Fannie Drinker, who had the matter in charge. The thanks of the Church are due Mr. and Mrs. Sayre for their kindness in tendering the use of their rooms for the lecture, thus saving expense and increasing the net proceeds. It was indeed a fine place for the entertainment, and there was an abundance of room to have seated in the most comfortable manner, some thirty or forty more persons than the number to whom tickets were sold.

THE DAY YOU WERE BORN.—Here is an infallible method of discovering the day of the week on which any person was born, or the day of the week on which a given day of the month any number of years previous occurred. To the number representing your age in years at your next birthday add one-fourth for leap years, this amount divide by seven, and the remainder counted back from the day of the week on which you were born. For instance, at your next birthday you will be 24 years old, this divide by 7, and the quotient 3, added to 24 gives 30 as the amount, which divided by 7, the number of days in a week, gives four weeks and a remainder of two days. Now, if your birthday this year comes on Monday, count back two days, and you have the day on which you were born, Saturday. Try it.

"MILLIONS IN IT."—It may not be pleasant to most of our readers to learn that unrefined sugar abounds in insects, which may readily be detected by putting a spoonful of raw sugar in a wine-glassful of water. The animalcules will come to the surface, and may be seen with the naked eye swimming about vigorously. These insects are never found in refined sugars. In buying refined sugar you pay for pure sugar crystals only; in buying coarse brown sugar you pay for animalcules, molasses, water, and all kinds of filth.

HORRIBLE ACCIDENT.—A shocking accident by which the wife of Mr. Welcomes Browning, was burned to death, occurred in Fleetville, Pa., recently. As Mrs. Browning was standing near the stove, the door was blown open by the wind. She stepped to shut it, and after doing so discovered that her clothes were on fire. In attempting to extinguish the flames about her person she set the house on fire and when she had put that out she was so badly burned that she had barely strength to go into the bedroom and fall upon the bed where she was found in an insensible condition. She died on the following morning.

RESPONSIBILITY OF RAISED CHECKS.—A decision of wide interest regarding the responsibility of makers of checks that are raised, has just been rendered by Judge Sharwood, of the Supreme Court. He holds that a maker who makes a note or check in such a way as to make alterations easy, or to invite it, is liable to a bona-fide holder who takes it before maturity for value. But if the maker had used the ordinary precautions he would not be so liable, any more than for downright forgery. Omitting to "scrawl" the blank space after the words and figures of the instruments, and signing contracts or other documents in such a way that they could be severed and a perfect negotiable note obtained, would be instances of negligence that would render the maker liable. The question whether proper precautions had been taken was one for the jury to decide.

SCHOOL DIRECTORS.—A short time ago we published a section of an act of Assembly requiring school directors to publish an annual statement of the finances of their districts in January. On closer examination we find a supplement to that act, approved April 13th, 1875, which changes the time of publication to the end of the fiscal year, which will be in June. The act requires that the authorities of the district shall then prepare and publish in at least two newspapers of the county, a statement showing in detail the actual indebtedness, the amount of the funded debt, the amount of the floating debt, the valuation of the taxable property therein, the assets of the district, with the character and value thereof, and the date of maturity of the respective forms of funded debt thereof; and a neglect or failure so to do shall be a misdemeanor, punishable by fine not exceeding one thousand dollars.

A CHEAP DIET FOR HARD TIMES.—In these times of slack occupation the experimental deductions of investigating economists become valuable. A working mechanic with reduced pay, says, I have tried hard to keep up with the times by lessened expenditure. Having read the newspaper accounts of the man who lived on \$5 a year, gaining twenty pounds, under a regimen of corn meal, we tried that article but found it insipid, and finally nauseous. The endorsement of buckwheat as a sustaining food by an eminent judge induced us to try it; we found buckwheat nonsusceptible of variety in cooking, and we soon "stalled" on slapsacks—Potatoes failed to keep up our bodily strength.

Next we tried oat starch, with this result:—My wife, son and self confined ourselves to rations of three pints of thick porridge per day, varying the "dip" dressing with butter, sugar, nutmeg, lemon-juice or molasses. We enjoyed excellent health, with regular digestion. At the expiration of two weeks I found myself four and a quarter pounds heavier. My wife had gained three pounds, while the lad had increased over five pounds. Our food outlay for fourteen days was exactly two dollars and eighty cents, or less than seven cents per day for each person.

We are now pursuing the same course, with an occasional "mixed meal."—Ledger.

RECORD YOUR DEEDS.—For the benefit of our readers we will just state that there is a very erroneous idea prevailing in the minds of some persons in relation to the recording of deeds for real estate. They appear to think that if they have a deed in their possession for any piece of property their title is perfectly safe; but in many cases this is a great mistake. There are laws on our statute books on this subject, and hundreds of persons have been put to great trouble and expense, and not a few have lost their property entirely, by not paying proper attention to them. If a person has a deed for a piece of land, and is an actual possessor of it, that is a notice of ownership until the contrary is shown, but if he is not in possession of it, and his deed is not recorded within six months after its date, and the vendor should sell it to another person who knows nothing about the first deed, the second purchaser would hold it, either by having his deed recorded first or by getting possession of the land. Again, if a man neglects to have his deed recorded, not being in possession of the property and judgments should be entered up against the vendor, they would become liens against the property, and the man who has paid his money and held this unrecorded deed might lose his land. And again, deeds are frequently lost by burning and otherwise, and rendering great trouble and expense necessary in duplicating the deed or perfecting the title. Every good business man sends his title papers to the Recorder's office the first opportunity, and no lawyer or judge will permit any deeds of real estate to be laid away, not even in an iron safe until they have been recorded. Our advice to parties holding old deeds which are not recorded and to all those getting new ones, is to have them recorded at once. Especially is this necessary in towns where fires and robberies are of almost daily occurrence, which might and does frequently sweep away traces of title that are not preserved on the public record.

MILD WINTERS.—The weather this winter has been so remarkably mild that everybody is filled with surprise and wonderment. "I never saw anything like it," says one. "It's astonishing," says another. "Something must be out of kilter," chimes in a third, and the fourth cries, "The clerk of the weather must be on a spree and has forgotten his duties." But it is not so astonishing, after all. There have been other winters just like this one, and even warmer. No matter how curious a season may seem to be, there have been others in the past just like it, and nobody need flatter himself that he has discovered anything new under the sun.—A deliver among the musty records of the past informs us that in 1112 the temperature was so high that leaves came out on the trees in January, and birds hatched their broods in February. In 1289 the weather was equally mild, and the maidens of Cologne wore wreaths of violets and corn flowers at Christmas and on Twelfth day. In 1421 the trees flowered in the month of March, and the month of April.—Cherries ripened in the same month, and grapes appeared in May. In 1573 the trees were covered with leaves in January, and the birds hatched their young in February, as in 1112. In 1585 the same thing was repeated, and it is added that corn was in the ear at Easter. There was in France neither snow or frost throughout the winters of 1538, 1607, 1608, 1617, and 1669; finally, in 1663, even in the north of Germany, the stoves were not lighted, and trees flowered in February. Coming to later dates, the winters of 1840-47, when it thundered at Paris on the 28th of January, and of 1866, the year of the great inundation of the Seine, may be mentioned as exceptionally mild.

BRITHDAY PARTY.—[The following was received last week but was too late for publication. Ed.] Matilda, wife of Thomas J. Tiffany, of Brooklyn, Pa., was 58 years old on Friday, Feb. 4, 1876. A party of relatives and friends convened at her home, numbering over forty, to show their respect and esteem, for one who had spent so useful a life. Among the guests were four children of Mr. and Mrs. Tiffany, two sons and two daughters. Mr. and Mrs. Anson Tiffany, Mr. and Mrs. Judson Tiffany, Mr. and Mrs. John Perigo, Mr. and Mrs. Bailey Thatcher, Mr. and Mrs. T. M. Oakley, Mr. and Mrs. Ralph Vail, of New Milford, Mr. and Mrs. Lyman B. Tiffany, Mr. and Mrs. H. M. Williams, Mr. and Mrs. John H. Tiffany, Mr. and Mrs. Dot Mackey, of Foster, Pa., Mr. and Mrs. Wm. Daly. Also S. B. Butts, Esq., of Bradford county, District Deputy, who is canvassing the county on temperance, and many others, whom I cannot now mention, and the writer.

The day was spent in lively talk and religious conversation, in singing the songs of Zion, and in general enjoyment.

The table was spread with the richest viands, and we ate and drank together with joy. When dinner was over, some presentation remarks were made, and "Mother" was surprised with a fine gold breast-pin, a gift from her husband.—A set of silver spoons, from her sons and daughters. O! her silver-ware, glass-ware, and green-backs, from Mr. and Mrs. E. M. Tiffany, Mr. and Mrs. H. M. Williams, and others. Mrs. T. expressed herself very thankful that she was thus remembered by her friends, and felt that she was not alone in the world. After which the singers in the company, of whom there were many, sang "Beautiful Home for Thee Mother," found in the "Revivalist," No. 122. The book can be had at the M. E. Parsonage, in Brooklyn, Pa., and at most of the Book-stores. The piece was exceedingly appropriate to the occasion, and rendered in such a way, as to cause the entire company to think of a "Home over there." Prayer was offered, and the friends separated, feeling that the day had indeed been well spent.

These "birth-day parties," "family gatherings," and "friendly reunions" are among the pleasant things in one's life. They are humanizing, and moralizing. They remind us that "we are brethren." "Let brotherly love continue."

WASHINGTON'S BIRTH-DAY LECTURE.—The Rev. Patrick Toner, of Towanda, Pa., who has made such a grand reputation in the lecture field and who has been so favorably noticed by the press of the country; will lecture in St. Joseph's Catholic Church on Tuesday, February 22d, (Washington's Birth-day) at 4 o'clock p. m. Subject—"St. Patrick's Mission to Ireland." Tickets, 50 and 25 cents. All are cordially invited to be present.
St. Joseph, Feb. 16, 1876.

A CARD.—The undersigned gratefully acknowledges the generous donation of \$100.00, given to himself and family on the afternoon and evening of Friday, Feb. 11th. Notwithstanding unpleasant weather and bad travelling, friends from a distance cheered him by their presence, and also by substantial evidences of friendship, which were grateful to the receivers, and blessed to the donors. To the friends and neighbors who interested themselves for Christ and his minister, would he express his warm appreciation of their kindness, and pray that this token of good will may be blessed a hundred fold to the givers.

THE COLOSSAL BRONZE STATUE OF VICTORY which stands in the Park at Lowell, before the tomb of the first soldiers that fell in the Revolution, is a lasting and beautiful tribute of art. It is one of the first objects sought by strangers visiting our sister city, which indeed many visit purposely to see this elegant object of high art. It was obtained from the King of Bavaria by Dr. J. C. Ayer, to whom his majesty was especially gracious in acknowledgement of what his remedies are reputed to have done for the suffering sick. It was donated by the Doctor to the City of Lowell as a permanent and speaking emblem of the victories both of Science and Arms.—Lagardtown (Md.) Press.

DONATION.—A Donation will be held at the Susquehanna Mineral Spring House, in Rush, on Thursday, Feb. 17, afternoon and evening, for the benefit of Rev. F. A. Douy. All are invited to attend.

Drugs and Medicine. WHAT IS

It is a liquid Linctus for House and stable use. A valuable combination, discovered by a celebrated English chemist and horse-farrier. Was introduced in the United States in the year 1856, and since that time, by its great success, in the cure of diseases, it has won for itself that world wide reputation it so richly deserves, and now stands at the head of all linctuses unrivalled.

AS A FAMILY MEDICINE. It has already gained the confidence and admiration of thousands of households for its many cures of diseases were external applications are of so much importance. It is especially admired as a family remedy for its peculiar chemical combination, consisting of the ingredients, like tincture of opium or red-pepper, of which cheap and valueless linctuses are largely composed, which increase instead of diminish the inflammation, making it of a speedy cure.

AYER'S CHERRY PECTORAL For Diseases of the Throat and Lungs such as Croup, Whooping Cough, Bronchitis, Asthma, and Consumption.

The few compositions which have won the confidence of mankind and become household words among not only one but many nations, have extraordinary virtues. Perhaps no one ever secured so wide a reputation, or maintained it so long as Ayer's Cherry Pectoral. It has been known to the public about forty years, by a long continued series of successful cures of the most distressing diseases of the throat and lungs, which have won for it a confidence in its virtues, never equalled by any other medicine. It still makes the most efficient cure of Croup, Whooping Cough, and all the diseases of the Throat and Lungs, that can be made by medical skill. Indeed, the Cherry Pectoral has really robbed these dangerous diseases of their terrors, to a great extent, and given a feeling of immunity from their fatal effects, that is well founded. If the remedy be taken in season, every family should have it in their closet for the remedy and prompt relief of its members. Sickness, suffering, and even life is saved by this timely protection. The prudent should not neglect it, and the wise should take it for the protection it affords by its timely use in sudden attacks.

AYER'S HAIR VIGOR, FOR RESTORING GRAY HAIR, TO ITS NATURAL VITALITY AND COLOR. Advancing years, sickness, care, disappointment, and hereditary predisposition, all turn the hair gray, and either of them incline it to shed prematurely. Long used as a Hair Vigor, by long and extensive use, has proven that it stops the falling of the hair immediately, restores its color, when faded or gray. It stimulates the nutritive organs to healthy activity and preserves both the hair and its beauty. This healthy, weak or sickly hair becomes glossy, pliable and strengthened, but hair regrows with lively expression; falling hair is checked and established; thin hair thickens; and faded or gray hair resumes its original color. Its operation is sure and harmless. It cures dandruff, heals all humors, and keeps the scalp cool, clean and soft—under such conditions, diseases of the scalp are impossible. It is a dressing for the hair, and the hair is paid for its grateful and agreeable perfume, and valued for the soft luster and richness of tone it imparts.
