THE DAY YOU WERE BORN.—Here is an infallible method of discovering the day of the week on which a given day of the month any number of years previous occurred. To the number representing your age at your next birthday, add one fourth for leap years; this amount divided by seven, and the remainder counted back from the day of the week on which you were born. For instance, on your next birthday you will be 24 years old, this divided by 4, and the quotient 6, added to 24 gives 30, the amount, which divided by 7, the number of days in a week, give 4 weeks and the remainder of 2 days. Now, if your birthday in 1876 comes on Monday, count back two days and you have the day on which you were born.

KEYSTONE ACADEMY.—The fall term of school at the Keystone Academy will close with Prize Declamations, Tuesday evening, Nov. 28th. Rev. W. C. Tilden, of Montrose, will deliver an address Monday evening. The examinations will commence Friday Nov. 24th, and continue Monday and Tuesday. It has been decided to charge an admission fee of 25 cents for the Prize Declamations, Tuesday evening; the proceeds to be invested in books for the library containing suitable selections for declamations.

That about one fourth of the school this term consists of students from Susquehanna county, must be an encouraging fact to those of your citizens who are interested in educational matters. Thinking that perhaps it will be read with interest at least by a portion of your readers, I append below the names of the students who are here from the different parts of Susquehanna county:

Jackson, Manlius W. Cargill, Edward W. Lamb and Frank W. Miller; Clifford, Emma Hobbs, Sarah Miller, Josie Rivenburg and Peter S. White; Dundaff, Milton W. Lowry; Glenwood, Cordean F. Sheridan; Lenox, John J. Manning; Harford, Mason F. Tingley; Ararat, Gustie E. Wallace; Friendsville Charlotte A. Stone; Montrose, Charles Denison; South Auburn, Solomon G. Dunmore; Brooklyn, Harry H. Craver; Lathrop, Amos G. Bailey; Hopbottom, Ernest A. Bell, Katie Dougherty; J. Thompson Leann, James B. Raub, George A. Sweet, Wm. B. Tiffany, Oren L. Utley and Monroe W. Whitney. Com.

THE CROPS OF 1876.—The October digest of the crop reports of the country has just been issued by the Commissioner of Agriculture. From it we compile the following of interest in relation to the crops of the past season:

The returns from the wheat producing States show that the yield of that cereal for the season is 245,000,000 bushels, a decrease of one-sixth. The figures may be modified by the November returns, when the results of threshing are more fully known. The Middle States increased their product 2 per cent, while every other wheat growing section fell off.

The rye crop is 4 per cent. less than that of 1875, the Middle States, which produce one-third of the entire crop of the country, showing a decrease of 5 per cent.

The oat crop shows a large falling off, according to the reports now in, the decrease being 23 per cent. Every section of the union is deficient, Pennsylvania, however, showing a yield equal to that of 1875. Rust, drought, severe storms, grasshoppers, &c., caused the decrease in this crop.

Buckwheat was a very short crop this year, but no figures as to the product are given.

The corn crop is not quite an average one.—Pennsylvania, owing to the drought in some sections, rain in others, and the grub in others, falls off 8 per cent. in her yield of corn this year. Potatoes, while average in yield in some States are, generally speaking, much below the average. The crop in Pennsylvania was smaller than known for years, consequent upon the long drought. California is the only State that shows a higher yield than the average, the crop increasing 7 per cent. over that of 1875. The average price of potatoes was 20 cents per bushel in 1875, while this year it is 75 cents. Cotton and tobacco show an average yield.

SCHENCK'S MANDRAKE PILLS will be found to possess those qualities necessary to the total eradication of all bilious attacks, prompt to start the secretions of the liver, and give a healthy tone to the entire system. Indeed, it is no ordinary discovery in medical science to have invented a remedy for these stubborn complaints, which develop all the results produced by a heretofore free use of calomel, a mineral justly dreaded by mankind, and acknowledged to be destructive in the extreme to the human system. That the properties of certain vegetables comprise all the virtues of calomel without its injurious tendencies, is now an admitted fact, rendered indisputable by scientific researches; and those who use the Mandrake Pills will be fully satisfied that the best medicines are those provided by nature in the common herbs and roots of the field.

These Pills open the bowels and correct all bilious derangements without salivation or any of the injuries effects of calomel or other poisons. The secretion of bile is promoted by these pills as will be seen by the altered color of the stools, and disappearing of the sallow complexion and cleansing of the tongue.

Ample directions for use accompany each box of pills. Prepared only by J. H. Schenck & Son, at their principal office, corner of Sixth and Arch Streets, Philadelphia, and for sale by all druggists and dealers. Price 25 cents per box. 47w6

OLD Newspapers for sale at this Office at ten cents per dozen.

HANDBILLS for Auction Sales, &c., printed at the DEMOCRAT office in first-class style and at reasonable prices.

BUTTER.—An unusual dullness has prevailed during the past month, and while we see nothing particularly encouraging for the immediate future, still, when we take into consideration the increased proportion of "Summer Butter," in the majority of dairies, we have no hesitation in predicting that the strictly fine will all be wanted at fully present prices. There is a distinction between fine and good dairies, and while the former are not plenty, the market is well stocked with the latter.

The advance, engineered by a few speculators, on the 26th of September, was not as profitable to them as was intended—one faction intending to get prices to a point that would enable them to market at an advance what they bought and contracted early in the season, while another undoubtedly hoped to cause an over supply by the extreme prices—a reaction and consequent decline in values, to a point that would enable them to purchase at low figures, and await a rise, to insure a handsome profit. As to the result with the speculators, we are nothing but such manipulations tend to deceive dairymen, and cause many to hold much longer than they otherwise would, in anticipation of realizing as much at least as some neighbor who had disposed of his make some time previously.

POULTRY.—Is in fair request, when fat and in good condition, but a great proportion of the stock thus far received this season might better have been left in the country, till better fatted.
