## From the Broome Republican. The Government Defied.

B. T. Cooke, Esq. our newly appointed Post master, this morning, served on Mr. Park, his predecessor, a Mandanus, signed by the Hon. Jacob Collamer, the Post Master General, and bearing the seal of his Department—informing him that he, the fice property and to account to the Department up to the time of delivery. This post office writ wasserved on, and its requirements peremptorily disobeyed the Management of three witnesses: By St. Paul—the work goes bravely on!" We have long thought that Binghamton was an ambitious place—thriving very. But the honor which it derives from being the residence of a U. S. Senator, of an ex-Member of Congress, and other important about any poles into a most sightly in by, Mr. Park in the presence of portant etceteras, now pales into a most sickly in-significance beneath the shadows of its valiant and

tatious postmaster. This "bearding the lion in his den," is a bold and mique performance. The authority and dignity of the General Post office Department, in the person of Mr. Collamer, selected by Gen. Toylor as a member of his Cabinet, are deliberately set at defiance: and the Post office of the village of Binghamton, under the afficial and officious counsels of high dignitaries, "learned in the law," has erected itself into an independent establishment-does business "on its own hook," and pokes contemptuously its little batoon of "brief authority" into the face and eyes of the Postmaster General! We must borrow the phrase of the Jeremiak of the Union - Nous cer-

## The Montreal Riot.

Advices from Montreal state that the disorders in that city continued without abate-

ment, and indicate very serious results. In consequence of the announcement that the Governor had given orders to put under arms five hundred French constables, and the fact that these men actually appeared in the streets, the mob became still more exasperated. A party, composed of twenty English gentlemen, formed themselees into a cation to body, and encountered these armed police or constables in the streets, when quite a fierce engagement ensued. Shots were exchanged, and in the conflict two men were badly wounded and others slightly. The Government authorities, preceiving that they had adopted rather an unpopular measure. and in order to preserve peace, countermanded the order in regard to the constabulary force, and had them disarmed.

A public meeting was held on Friday, and largely attended. Petitions which had been gotten up were presented to this meeting, numerously signed asking the Queen to recall Lord Elgin, and disavow the rebellion idemnity act

All the hotels of the city was guarded by armed forces. The garrison had been fully equipped for action, the soldiery put under strict discipline, and cannon planted in the on Thursday the 14th day of June next, at ten streets, at different points, for the purpose of o'clock in the forenoon, where all interested can at overawing the disaffected.

ANNEXATION IN CANADA.—A Montreal correspondent of the N. York Express, says: "I have spent considerable time as a spectator in hearing the debates in Parliament. I have mingled freely with the members. I am surprised to find the prevailing sentiment, not only among the leading members of the House' but also among the influential inhapitants, is decidedly in favor of annexation to the United States. Nor is it made a party question of both sides, but particularly the Conservatives are most clamorous for it. The general impression is, that if they should be annexed they would come into the 'Union as three States, viz: Upper, Middle and Lower Canada.'

RHEUMATISM AND GOUT .- Wright's Indian Vegetable Pills are a most extraordinary medicine for the cure of Rheumatism and Gout, because they not only cleanse the stomach and bowels of those morbid humors, which if taken into the circulation and thrown upon the membrane and muscle, are the cause of the above painful maladies; but they excite the absorbent vessels to take up that which is already deposited, and therefore are absolutely certain to make a perfect cure of Rheumatism and Gout. A single 25 cent box of said Indian Veget-able Pills will often give the most astonishing relief; and perseverance according to directions will be certain to drive pain of every description from

Montrose, May 9, 49. WALTER FOLLET. Colton's Premium Bee Hive.

On an entirely New Plan.

THIS Hive is decided to be the best Hive in use, by those who have used it, and by the most experienced bee-keepers.

It has three protections against the bee moth:—1st

the bottom is iron, so that the egg will not hatch under it. 2d, it is so constructed that the worm cannot crawl above the bottom box, if the egg should hatch. 3d, the room can be increased or di-minished, by removing the drawers arranged upon the sides, and turning the bees in upon the centre, sufficient to keep the comb covered with the bees all through the season, and the bees will protect he comb from the miller. This Hive can be used for a swarming or a non

warming Hive. It is perfectly simple in its construction, and gives the bees ample room for all to work at the same time, so that they will never lay out on the

The bees will increase one third more in this than in the other kinds and make twice the amount

f honey.

The old comb can be removed at any time with afety, by taking out the separate drawers or boxes in which it is contained, without disturbing the work of the bees below.

The subscribers having purchased the right for this valuable improvement for Susquehanna county, offer for sale individual and township rights. A model of this truly ingenious contrivance may be seen at the store of J. Ethridge in Montrose, who will explain its advantages, and is authorized to make contracts for the sale of rights. WM. F. H. BURRITT.

To Farmers and Dairymen. THE subscriber having purchased the right of manufacturing and vending Crowell's Patent Thermometer Churn, would cordially recommend them to every farmer and dairyman as the best churn ever introduced to the public. The princi-pal advantages this churn has over all others, are these: 1st, it is constructed in such a manner that the top can be taken off so as to give free access to the interior, which makes it perfectly convenient to put in the cream and take out the butter-the paddies can be taken out, making it still more convenient to clean. 2nd, a thermometer is attached to the churn so as to show the exact temperature of the cream, which experience shows should be from 60 to 62 degrees. 3d, a chamber or space is arranged around the bottom of the churn for the purpose of admitting cold or warm water so as to bring the cream to the right temperature without mixing the water with the cream. It is well known to all butter makers that cream too cold when clurned, takes much longer time in churning than when at the proper temperature—besides, a por-tion of the butter is left in the buttermilk. It is also well known that warm water mixed with The thermometer churn effectually remedies all these evils. It churns equally well in warm or cold weather. There is no such thing as having the cream too cold or too warm in this churn if it is properly managed. An examination and trial of this churu is alone deemed sufficient to recommend it to public favor. It has been fairly tested in this and in other places, and wherever it has been used it has never failed of giving the most entire satisfaction. WM. К. ПАТСН.
