Feeding Cattle.

Feeling a deep interst in everything that ertains to the feeding and fattening of cattle nd having published a number of articles pon the subject, we would now request a erusal of the following correspondence, exracted from an exchange.

MR EDITOR : "Dear Sir :- I have read with much inerest the discussion of the North Stockbridge armer's Club, on the subject of feeding catin your two last Culturists. Perhaps I lid not understand Mr. Kendall's calculations which he arrives at the conclusion that attle may be made to increase in fat, by eding on hay alone. He says, "if one nundred pounds of hay value increase the ive weight of an ox, (which, as I apprehend the same as increasing his beef,) six pounds, hree thousand pounds will increase it to one undred and eighty pounds which will add ine hundred and twenty pounds to the as-bumed dead weight, viz: six hundred and ghty-seven pounds; meaning, as I suppose, hat the hay, or as he has it, the hay value, will make one hundred and twenty pounds of beef. Now I think were he to kill his peef after feeding three thousand pounds of hay alone he would find that he had not made a pound of beef, for it is a fact well from hay alone, may indeed have kept up the outside appearance of the cattle or in other words, kept the cattle where they were, in appearance, when they left the pasture, but the inside of the animal would show that time will be most expedient. the animal had used up its tallow, and the beef would be loose or spongy. I do not elieve that there was a pound of beef made on hay alone.

"Now as to feeding cattle-first as to the kind most profitable for our farmers to feed. I would say that must depend upon the market for which they are designed. If Proclamation, to protect the public peace, for the New York market, where they weigh the national honor and good faith:—[Nat. only the beef, (or as the butchers there would say, four quarters,) four or five years old steers would be the most profitable, for the reason that you gain some in growth, and their quarters will weigh heavier, and the hide and tallow lighter, consequently the formed, the appearance of a military movefeeder will be better paid than by feeding older cattle.

"If the cattle are designed for the Boston market, where all is weighed, (or as the butchers say, five quarters,) then by all are to serve twelve months, and to be paid means feed full grown oxen, for they give a \$1,000 cach for the year. They are told greater per cent. of tallow, and a greater that they are to fight, but have not been inquantity of good pieces, than younger cattle.

"If our farmers desire to obtain the largest returns for their feed let them be careful in down by hard work, however well they may appear in the pasture; for when they are fed some old lameness will appear, and ten to one when your cattle are ready for market, such will have to be left in the yard to seek the best market they may find at home.-Be careful, also, that the ox is what the Con-

one with a thin, even hide, nor will a thick field. He is described by a native Hungahided, coarse limbed ox, ever command the rian now residing in the United States, as a A very superior lot of Novascotta Grind-stones, highest price in the market, even if his ap- splendid orator, a thorough revolutionist, and pearance indicates equal fatness. This may appear strange to the inexperienced, but the National Assembly, he is the leader of the butchers will always make a dollar per hun- most resolute party. A German says of him. dred difference in the price, which on an ox of twelve hundred weight, will at once take ministers, (under the presidency of the Count off twelve dollars on a bullock, (no small item in the profit of feeding,) and besides the Austrian court, and entering into fruitless expense of making the beef of the coarse ox and dangerous agreements with it. It was is as great as that of the fine one.

41 have travelled many miles, when I was in the habit of feeding cattle, and since with experienced cattle-buyers from Conneticut river, to examine cattle, that were recommended as just right for feeding when neither my friends nor myself would have driven them to Conneticut with a view to putting them into a stall for feeding could they have been purchased for half price.

And now a few more words in regard to feeding. The best feed without question, is oil meal cannot now be obtained without going to New York or Boston for it, and paying a great price, corn and oats in the above proportion is next best, but as oats now demand generally a high price compared in value to corn it would probably be more profitable to sell them, and feed entirely with corn ground in the ear. The Conneticut river feeders use corn and broom-seed, but as we have not the broom-seed, corn in the ear is the most pro-

"Some persons think there is no value in cobs: be that as it may, feeders know that cattle will bear heavier feed, by using corn ground in the ear, than if the corn is shelled. As to the quantity and time of feeding,

the quantity should be as great as the ox will eat up clean and not sour. Eight quarts of cob meal is the usual quantity for an ox of one thousand pounds dead weight, but if an ox will bear more meal, give it to him for it is a mistaken idea that if you feed heavy, you will be a looser, for it is an old but true adage, that if you cheat an ox in his feed he will when killed, either cheat you or the drover. Be careful also when there is a type. warm change in the weather to lessen his feed for a tew meals or he will get clogged. and you may loose a week's feed before he comes to his appetite again. Feed your hay meal, for he will est very little hay if it is all yard for water between nine and ten o'clock, and avoid as much as possible disturbing them satil you put them into the barn, say between four and five o'clock; fat cattle do they are then enjoying the benefit of the sun dissting their morning feed.

"My practice has always been, (and I think I have made some as fat oxen as were ever driven from this country to Brighton market,) to be careful that oxen, have their meals at regular time never varying more than half an hour. I always visited my cattle at nine o'clock in the evening to see that all was right in the stables and to give them a little hay. After all, one great item in the profits of stall feeding cattle is in the quantity and value of the manure, it being worth in my estimation, more than double that of other manure. I have often heard Connectient river feeders remark when they have met with a poor market for their cattle, that the feed given to the cattle, would have sold for more than the advance on their cattle, but they could not raise their crops without the manure, and that it was better to lower the profits on their feed than not to have the manure on their land.

Although the above communication has eference to the northern States particularly, the suggestions and directions of the writer are quite sound, and will be found correct and applicable for any part of the United States.—Editor Farmer.

CINCINNATI FRUIT CONVENTION .- The Fruit Convention which it was announced would be held in Cincinnati during the days ef the State Fair in September, will perhaps known to those who have been in the habit be held at a somewhat later period. There of killing cattle, that the nourishment derived has been no time for correspondence on this point since the State Fair was postponed; and owing to the uncertainty as to the prospective condition of the health of the country, it is difficult to decide at present as to what

The Missouri Bepublican, (dated at St Louis, Aug. 12) remarkably corroborates the information which we have heretofore received through other channels, showing how necessary it was for the Executive to interposé as it did by means of the late Intel

"Mysterious Movement in New Or-LEANS.—The papers of New Orleans are silent about a movement that is going on in that city, which has, if we are correctly inment against a neighboring country, and is for this reason, contrary to our laws. It is stated to us that a company of fifteen -hundred men, is being enrolled in that city, who formed against whom their warfare is to be directed. It is said that half a million dollars are on deposit in the Canal Bank to use the selection of their cattle. Never feed ox- in the enterprise. Nearly the full compleen for profit that are over seven years old, ment of men has been obtained, and it is and always reject such as have been broken probable that developments will soon be made as to the design of the expedition."

HUNGARIAN STATESMAN.-In consequence of the remoteness of Hungary, and the small knowledge of its language possessed by our people, very little is known of the men who figure in its present contest, save the glorious neticut river feeders call fine; that is, of small names of Kossuth, Bem. Georgey, and Dembone, straight and well formed, and light in binski. These are undoubtedly the leaders the fore quarter, with a tight clean head in the struggle, and are worthy of all the and neck, and if you wish to make an extra | praise they have received; and yet there are fat ox, be careful that he have a thin hide. other gallant spirits who should not be forthick coarse hide, will not take on fat like Nyary, who has figured solely in the civic orange with a thin argument of the coarse hide and common cups and saucers,—much lowa bold, resolute, far-seeing statesman. In thé

It was he who opposed the first Hungarian Batheany,) making new treaties with the he and his party who made head, even against Kossuth, in the proposals to give to the Austrian Emperor assistance in the war with Italy. It was he and his party whorefused to imitate the Austrian rule in the organization of the Hungarian army.

Without Nyary the Hungarian revolution of March would have turned out as disastrously for the holy cause of liberty as elsewhere in Europe. He alone defended and kept alive a policy of so great consequence, that even Kossuth found it too daring, betwo parts corn and one part oil-meal: but as cause the national existence was at stake; but at the discussion in the National Assembly, he was triumphant in his principles.

> A CURIOUS CASE OF SURGERY .- Sometime ago a little child of Mr. Lathrop, at the foot of Sudbury street, was playing with a pair of bivalve shells, round in form. and each fully as large as the eighth of a dollar when one of them disappeared, and nothing could be found of it. After several weeks there was an appearance of something growing in the roof of thi child's mouth. The child was carried to Dr. Clark, the city physician, who pronounced it a case of the enlargement of some bone the anatomical name of which is too hard for us, but we will call it one of . FOR the cure of inflammatory diseases, such as inflammation of the lungs, bronchites, sore the rafters of the mouth. Subsequently D. Warren was consulted who confirmed Dr. Warren was consulted who confirmed Dr. clark's opinion, and proposed to operate to reduce the size of the enlarged lone. On cutting around the protuberance, the before-cutting around the protuberance to have mentioned shell fell out. It seems to have adhered, the concave side up, to the roof of the mouth, until it had become completely embedded under the skin .- Boston Chrono-

HUNDHREY MARSHALL, the Telegraph now says is certainly elected to Congress from the Louisville District Ky, in spite of the Slavery division in favor of his Loco Foco opponent, Dr. Newton Lane .given him at once—let your cattle into your. So the Kentucky Delegation will be Whig yard for water between nine and ten o'clock, as before 6 to 4, instead of at least 8 to 2 as it ought to have been and would have been but for the aid afforded by Slavery to its natural alley, So the House may not be not want any food in the middle of the day, utterly lost, after all. Our bad news seems to get the start this year, contrary to usage .-Tribune.

New Goods.

FISHER would respectfully announce to the Ladies of Friendsville and vicinity that she has opened a Pancy Millinery Shop, consisting of Bonnets, Ribbons, Flowers, Caps and Head Dressex Also, Ladies and Gentlemen's Leghorn Hats done over at the shortest notice. Friendsville, June 19, 1849.

Village Lots for Sulc.

THE subscriber offers lots for sale in the townville, and directly opposite the village of Great Bend, located on the Depot of the New York and Eric railroad, and the Great Bend and Cochecton Turnpike, in the valley of the Susquehama river.
The railroad crossing the said turnpike, thence running in a curved line nearly parallel with the same at the distance of a few hundred feet, with the grounds gradually rising above railroad and turnpike, or releasing the river and the heautiful and pike, overlooking the river and the beautiful valpike, overlooking use river and the beautiful val-ley, compared with its healthy climate, renders it a most desirable location for building purposes. The depot ground of the railroad company being-located in the centre of a rich and extensive agricultural district, surrounding it on every side with its many roads centering in, and all other advantages combined, afford every advantage to a business population.
An Extensive Water Power

can be brought from the Susquehama river, ad-joining the depot grounds of the said rail read suf-ficient for the crection of all manufacturing establishments, or any machinery required.

Great Bend, 52yl

N. Y. & E. Ruilroad Freight Line.

Stephens and Thompson's Forwarding Line from Great Bend-Capt. J. W. Thompson. STEPHENS & THOMPSON will forward freight from Great Bend to New York by Railroad

Tuesday and Thursday by the regular freight line which leaves Great Bend every morning at 8 o'clock and 30 minutes. , George W. Stephens will remain at Great Bend and forward all produce entrusted to this Company and pay the returns for the same at the railroad office. Capt. J. W. Thompson will remain in New York and give his personal attention to the sales and make returns as soon as the produce is dispo-sed of. This company flatter themselves by hav-ing a salesman in New York who has been in the frieghting business for a number of years from Orange county, that they can give as good satisfac-tion as any on the railroad. A liberal advance will be made on freight delivered at the depot if desi-GEO. W. STEPHENS, Great Bend, J. W. THOMPSON, New York.

New Hat and Cap Store.

Great Bend, a3

TRICKS OF QUACKS.

Lat Every seev Read years Unaggreaty.—There is a Samperilla for only in the different towns called S. P. Townsend's Sarsaparilla. It is advertised as the ORIGINAL ORIGINAL, of the control of the co

Old Dr. Jacob Townsend, THE ORIGINAL DISCOVERER OF THE Genuine Townsend Sarsaparilla.

Old Dr. Townseud is now about Toyears of are, and has long been known as the AUTHUR and BISCOVERER of the GENUINE ORIGINAL "TOWNSEND SARSAPARILLA." Being phor, he was eximpelled to limit its manufacture, by which means it has been kept out of market, and the sales circumscribed to those only who had proved its worth, and known its value. It had reached the ears of many, nevertheless, as those persons who had been healed of sore diseases, and saval from death, ore caused its wonderful

HEALING POWER.

This GRAND AND ENERGIALLED PREPARATION is

caused its wenderful
HEALING POWER.

This GRAND AND UNEQUALLED PREPARATION is manufactured on the largest scale; and is called for throughout the length and breadth of the land, especially as it is found incapable of degeneration or deterioration.

Unlike young S. P. Townsend's, it improves with age, and never changes but for he better; because it is prepared on scientific principles by a scientific man. The highest knowledge of themistry, and the latest discoveries of the art, have all been brought into requisition in the manufacture of the Old Dr's Sarsaparilla. The Sarsaparilla root, it is well known to medical meni-contains many medicinal properties, and some properties which are inert or useless, and some properties which are inert or useless, cand others, which if retained in preparing it for use, produce for measurements and actually which is chalurious to the system. Some of the properties of Barraparilla for measurements in the properties of Barraparilla for measurements of the system of the properties, and other than the properties, which is off process, known only to those experienced in its manufacture. Moreover, these establite principles, which fy off in vapur, or an an exhabition, under heat, are the very essential medical properties of the root, which give to it all its value.

Any person can boil or sees the root till they get a dark colored liquid, which is more from the coloring matter in the root than from anything else; they can then strain that insipid or vapid liquid, sweeten with sout molasses, and then call it. "SARSAPARILLA, EXTRACT or SYRUP."

But such is not the article known-as-lig.

GENUINE OLD DR JACOB TOWNSEND'S

SARSAPARILLA.

This is so prepared that all the linert properties of the Sarsaparilla root are first removed, everything capable of

SARSAPARILLA.

This is so prepared that all the inert properties of the Sarsaparilla root are first removed, everything capable of becoming acid or fermentation is extracted and rejected; then every particle of medical virtue is secured in a pure and concentrated form; and this it is rendered incapable of losing any of its valuable and heating properties. Propared in this way, it is made the intest powerful agent in the Cure of innumerable Diseases.

Hence the reason why we hen' commendations on every ride in its favor by men, women, and children. We find it doing wonders in the cure of CONSUMPTION, DISPEPSIA, and LIVER-COMPLAINT, and in PHEUMATISM, SCROPULA, PILEN, COSTIVENESS, all CUTANEOUS ERUPTIONS, PIMPLES, BLOTCHES and all affections arising from

and all affections arising from
IMPURITY OF THE BLOOD.

It possesses a marvellous efficacy in all complaints arising from Indirection, from Actifity of the Stomuch, from mequal-circulation, determination of blood to the head, palpitation of the heart, cold feet and hands, cold chills and hot flashes over the body. It has not it equal in Colds and Coughs; and promotes easy expectoration and gentle perspiration, relaxing strictures of the lungs, throat and every other part.

But in publish is its excellence more manifestly seen and acknowledged than in all kinds and stages of FEMALE COMPLAINTS.

red than in all kinds and stages of FEMALE COMPLAINTS. REMALE CUMPLAINTS.

It works woulders in cases of Pluor Albus or Whitea, Palling of the Womb, Obstructed, Suppressed, or Painful Menses, Irregularity of the meditrual periods, and the like and its effectual in curing all the forms of Kidney Discases. By removing obstructions, and regulating the general system, it gives tone and strength to the whole body, and thus cures all forms of all the strength of the whole body, and

Nervous Diseases and Debility.

which it gives tone and strength to the whole body, and thus curve all forms of the visual strength to the whole body, and thus prevents or releves a great variety of other maladies, as Spinal irritation, Neuroleja, St. Vitus' Dance, Seconing, Spiteptic File, Conculations, &c.

It cleanes the blood, excites the liver to healthy action, tones the stomach, and gives good digestion, relieves the bowels of torpor and constitution, allays inflammation, purifies the skin, equalized the circulation of the blood, producing gentle warmth equally all over the body, and the assemble perspiration irelaxes strictures and tightness, to moves all obstructions, and invigorates the entire nervous system. Its not this their the Riedleine your pre-eminemity meed?

The Riedleine your pre-eminemity meed's inferior article? This young man's liquid is not to be COMPARED WITH THE OLD DR'S, because of one GRAND PACT, that the one is INCAPABLE of DETERIORATION, and NEVER SPOILS,

while the other DOES souring fermenting, and blowing the bottles containing it into fragments; the sour, acid liquid exploding, and damaging other goods! Must not this horrible compound be poisonous to the system?—What causes Dyspepela but sciel? However all know that when food sours in our stomachs, what mischel it produces?—flattlence, heartburn, palpitation of the heart, liver complaint, diarrhera, dysentery, colic, and corruption of the blood? What is Serugals but an acid humor in the body? What produces all the humors which bring on Eruptions of the Skin, Scald Head, Salt Rheum, Erysipelas, White Swellings, Fever Sores, and all internations internal and external? It is nothing under heaven on an acid substance, which sours, and thus spoils all the fluids of the body, more or less. What causes Rheumatiem but a sour and sied which facts? So of nervois dileases, of impurity of the blood, of deranged circulation, and seell, and isofactely which facts? So of nervois dileases, of impurity of the blood, of deranged circulation and seell, and isofactely which affe

Now is it not horning to make and sell, and sufficiely source to meethin.

SOURING, FERMENTING, ACID "COMPOUND" OF S. P. TOWNSEND, and yet he would fain have it is unlerstood that Old Dr. Jacob Townsend's Gensine Original Surcepariila, is an IMITATION of his inferior preparation!

Heaven forbid that we should deal in an article which would bear the most distant prescublance to S. P. Townsend's drittle!

We wish it understood, because it is the absolute truth, that S. P. Townsend's latticle and old Ibr. Jacob Townsend's Saraparilla are heaven wide sport, and infinitely dissimilar; that they are unlike in every particular, having see one single thing in common.

As S. P. Townsend is no doctor, and never was, is see themist, no pharmaceutis—known no more of medicine or disease than any other common, we will be no doctor, and never was, is see themist, no pharmaceutis—known no more of medicine or disease than any other common, is successfule, unprofessional man, what generated can the jumblic laye that they are receiving a genuine scientific medicine, containing all the virtues of the article used in preparing it, and which are incapable of changes which might render them the AGENTS of Disease instead of health!

But what clae should be expected from one who known a person of some experience, to cook and serve up even a common, decent meal. How index more important is it that the persons who manufacture medicine described for WEAK STOMACHE AND ENFERSILED SYSTEMS. Should know well the medical properties of plants, the human system, and how to adapt verticals in these diseases!

It is to arrest fraude upon the unfortunate, to pour balm into wounded humanicy, to kindle hope in the despairing hose in the despairing hose in the despairing hose in the despairing hose in the second of the surface and broken, and to behalt infrasity that OLD DR.

JACOB TOWNSEND has SOUGHT and FOUND the portunity and mean to brink his.

Grand Unit versus Comes arrested Remarky within the reach, and to the knewinders of all who need it that

There is a Saraparilla for sale in the different town saled set Dr. Jacob Townsend's Sarapavilla. It, is and vertical to the original 2c. This is a notocous felohesed. Dr. Townsend has expended saver \$200,000 the taxt eight years in adverticing his Sarapavilla, which has obtained a character and reputation throughout the United States and a greater part of the world—the nale being environs.

This excited the applict of certain unprincipled mea and as old man who has been engaged in probling cheen publications for sample of years. The main a man is Jacob Townsent. He stiplied to a number of men to get analyment, or is sall the men of his name to pick up Dr. Townsend's Saraparilla, stating the large sales and same, we find a hyperboly in salectioning as instrument in the basiness. Among others be applied to the substraint in the basiness. Among others be applied to Charled Watron, Esq. Editor of the Jameser, Farmer, who accorded such a propertion. Mr. I Q. ANDR. EWS, formerly man of the Frontieton of the Jameser, Farmer, who accorded such a propertion. Mr. I Q. ANDR. EWS, formerly man of the Frontieton of the Jameser, Farmer, who accorded such a propertion. Mr. II Q. ANDR. EWS, formerly man of the Frontieton of the Malla TERM Will. New Jersey, JOHN SKILL MAN, and will TEOMPSON, under the same of THOMPSON. SKILL MAR & Go, have completed this old man, and agreed, as we understand, to pay his servin deficie per weak, for the most of the man. Lead with a market them, and then what them is the man the market them and then stay them may their describe into market. Let the public decide upon the course of these leads and honerable mea.

SARSAPARILIA. The most entreording Medicina in the World!

Phis Errort is gut up in Quart Bellies it to it time
theaper, pleasanter, and narranted imperior to
any sold. It cares without confiling,
purging, alcheming or debilitating the Palient.

COMPOUND SKYPACT AF

The great beauty and superiority of this Suraparille over all other medicines in that while it cradicates the disease, it invigorates the body. It is eas of the very best

cates the disease, it invigorates the body. It is eas of the very best

SPRING AND SUMMER MEDICINES

ever known; it not only purifies the whole system and strengthess the person, but it creates now, print and rich blood; a power possessed by an other modification. And in this lies the graind secret of its weaker ful once than 109,000 gard of severe cases of diseases; at least 12,000 were considered incurable: It has may the livest of mover than 10,000 ghidren the past two powers in the City of New Tock alone.

10,000 where of General Debility and want of Mey values. Emerged.

12, Townson's Surasperilla invigorates the whole visiten portainently. To know who have less their singular, among by the affects of medicine or indiscretiss contained in justic of the accessite includence of the pursuant, and busingly on by physical practestion of the necessite includence of the pursuant, printed to the accessite includence of the pursuant, and thought on by physical practestion of the necessite including the property of the following Communities, printing the case and decline's hardening towards that fatal dischare Communities, as be entired for any property to any ards that fatal discuss Consumption can be enti-ared by this pleasant remoily. Da. Townsand.— verily believe your Barage sills have look the medic, through Particulare, of earth willies the medic, through Particulare, of earth y life. I have for everal year had a land thugh, a because worse and propose. At tast I raised large quantities of blood, had night sweats, and was greatly delitified and reduced, and did not expect to five. I have mad, your Saragenilla a chort time, and there has a numberful change been wrought in me. I am nich allo to walk all over the city. I fraise a blood and my cough has left me. You can add he aging that I am thankful for these results. Some definition between, WH. RUSSELL. 45 Clabeles

It have mentioned the This is only one off more than four thousand of fine mains and the film which is Saraparilla has the most severe and chronic cases are weekly ere by indexes these three cases.

by its extraordinary virtues.

James Commings, E.q., one of the assistants in the incident of the Assistant Rinchwell's Island, it the gentlems speaker of in the following letter:

Dr Treensend-Derr Sir; I have assistant certification with the Remainteen; regulaterable of the time frought not ent, often or walk. I had the most distreming paint, and inv. limits were developing speakers and inv. limits were developing speakers and inv. limits were developing speakers and inv. limits were developing speakers. I had the investment of good, I as on much better—indeed I am entirely relieved. To are at tilerty to use this for the benefit of the inferred.

Your respectfully. JAMES CUMMING
