Circular from the Patent Office. We are pleased to receive the following circular, issued by the Commissioner of Patents. The enquiries are directed to the most important subjects, and are so framed as to elicit the principal facts relating to each. If be, they will bring out a mass of valuable information in regard to the agricultural resurces of the different sections of our coun-

लिंक इंडी कर COMMISSIONER OF PATENTS, in execuon of acts of Congress, desires to promers and others on the following, and day other points that may occur to you, con-nected with agriculture:

WHAT. Your experience as to varieties, difference in weight, and of the time in ripen-

OATS.—What varieties have you tried and and good for nothing to work. Is there any with what results, particularly as to the time evidence that such monstrosities are profitaof ripening; with their estimated value as ble i that it is expedient or economical so to compared with corn as food; is the cultiva- load animals with fat? I do not remember tion of the oat becoming more or less popu- any; and in default of it, I pass by all excesslar, and for what reason?

Ryn. Have you knowledge of any new and valuable variety; to what use is it applied; have crops diminished of late years, with a subject in which every person has a stake, but any apparently corresponding diminution in the fertility of the soil, and to what nfluence is it supposed to be attributed.

BARLEY.-Have any new varieties been tried and with what results; to what uses is this grain applied in your State; if not cullivated, is it forbidden by your soil and cli-

MAILE, (Indian Conn.)-What varieties nost esteemed and for what reasons; what the difference in time of ripening; is it liable to change of character and climate, and other influences, and your observations on that point; give the estimated value of the husk as compared with the blade, and of both as compared with good hay, weight for weight: what is the value of green corn for soiling cattle, and especially for producing milk; vour experience as to feeding grain, whole or ground cooked or raw?

Rice.—Variety cultivated; describe any new and valuable process for its cultivation

or preparartion for market. (Note.) -As to all these grains please tate the cost of production and usual weight, and the probable average per acre and actual aggregate product, if known of each in your State; whether the average product per acre has increased or diminished; whether the weight per bushel of the various grains is fixed by law in your State; and what weight prescribed for each.

HAY.—State the comparative value as food or stock, of clover, timothy and mixed hay; he grass seeds preferred in laying down headowa; the average yield per acre; describe any new process in curing; have meadows been irrigated in your State and with what effect?

PEAS.—For what purpose cultivated in your State; for food or for improving the soil: estimated value as food for stock, compared with Indian corn: the most esteemed variety for field culture; average product per acre: value of haulm or vines compared with other fodder; average price per bushel in the

ROOT CROPS.—Irish and sweet potatoes. turneps, carrots, beets, mangel-wurtzel, artiintelligence has been received by an arrival
choke, and other varieties; comparative valof a whale vessel at New London, from Daue; cost of production; weight per bushel; vis's Straits, confirming the accounts received and the average per acre, and aggregate pro- from England, that Sir John Franklin's Ex-

duce for your State. Corron.—Average vield per acre and per hand in your State, aggregate yield of the whole State for 1849; describe new varieties and process of cultivation; manures best less late as is the season, expeditions will imadapted to; cost per pound or bale, of production : freight, charges, commissions &c., paid by the planter.

SUGAR. Whether of cane or maple: the product per acre ; describe any new process of cultivation or manufacture; variety of cane, among the papers of Count Louis Karoly, tacultivated; its enemies and diseases; cost of ken at Comoron, was found a letter from making augar; freight, charges, &c., paid by Haynau to the Count, dated on the end of the planter.

HENR On this head give any information that you may deem valuable and new as to varieties, process of cultivation and preparation for market; soil and manures best dapted to; cost of production.

Burren Quantity made in your State : average annual produce per cow; are cellars or spring houses preferred.

CHEESE Same questions. Horses and Mules.—Number raised in your State; average value of each, comparative value for farming purposes; where is your market for them !

Number of Horned Cattle in your State: average value of at three years old; where driven to market; cost of keeping per head per year; which of the improved races is preferred.

SHEEP HUSBANDRY .- What the prevailing races; what the condition of this branch of industry; amount of wool clipped in the year, and average weight of fleece of different races; cost of keeping sheep per year it the best preparation of the kind he ever saw, and per head; where your markets; what your knows of none so descring the public patronage. system of selling; have you wool depots, and are they found advantageous for wool grower and manufacturer; what number killed by dogs in your State?

Hoos Average weight at a given age; average weight consumed per head : propor- and for sale by the dosen, or single. This is said

duction per pound. RAIN.—Time and degree of highest and lowest range of thermometer, and the mean temperature of the year; also, inches of rain water in each month, and aggregate for the year.

A LL persons indebted to the estate of Benjamin Froat, late of the township of Jessup, deceased, are requested to make immediate payment, and those having demands against said estate to present them drive attended for settlement.

Fat Cattle.

"What is the use of an ox weighing a ton or over? Of course, you may load his frame with tallow—that is not a difficult operation. and indicates neither genius or science; but ng; enemies and diseases, soil and manures what does that prove! You may make a hog of him, but he is none the better to eat,

ively fat cattle, as of no account." Thus writes a correspondent of the Tribune, from the State Fair at Syracuse. It is and therefore it should be gravely discussed. Fat beef is an abomination before most people, unless there is a streak of lean, and a streak of fat, to make the sirloin look like a transverse section of a barber's pole. True, in some families fat is necessary, for

Jack Sprat could eat no fat, His wife could eat no lean,

and in such a case the wife must be accom modated. But, generally speaking, it is a waste of good provender to feed a beeve until it is unwieldy. Neither too fat nor too lean is the golden mean, and graziers would do better if they were to bear this in mind.

BAD TREATMENT OF AMERICANS AT CALLAO.—Intelligence has been received by recent arrivals of a gross outrage committed on
the 28th August by the crew of the Peruvian

The AVE you the True time? If not, you can
have it by calling at the first door above the
Stage Hotel, where repairing and adjusting Lever,
Cylinder, Escapement, and common Watches and BAD TREATMENT OF AMERICANS AT CAL war steamer, on three men belonging to the brig Arcadian, which vessel was preparing to sail for San Francisco. They were ashore and were about to return to the brig in a boat, when they were attacked by the Peruvian crew and a party of boatmen; were cruelly beaten, and thrown into the water afterwards dragged ashore, their arms pinioned again cruelly beaten, placed in their stocks. and kept there next day, the authorities refusing their liberation because it was the President's birth day. The captain of the brig protested before Mr. Clay, our charge, against the proceedings of the officers of the war steamer, laying the damage to the vessel and crew at \$10,000. Mr. Clay instantly demanded satisfaction from the Peruvian Government, but there is no account received of the character of the reply made. While Mr. Clay was waiting the reply, another outrage was committed on the captain of the American whaler Rambler, who was attacked and beaten shockingly.

U.S. vessels were much wanted at Callac to protect the lives, interests, and property of American citizens.

SIR JOHN FRANKLIN'S EXPEDITION.—It will be seen by our telegraphic dispatch pedition from which we have had no intelligence for nearly three years, was imbeded in ice in Prince Regents' Inlet. We shall look with anxiety for further account and doubtmediately be fitted out by the British Government to relieve the long absent voyagers.

Gorger's Treason.—The Vienna correspondent of the Paris National says that July last, stating that Gorgey had been negotiating for a manth previous and that within ten days he would surrender. This shows that his treason was long meditated.

THE AGE OF IMPROVEMENT.

One of the most important discoveries of the age, in ameliorating the condition of this large class of suffering humanity, Consumptives, is Dr. Wistar's Balsam of Wild Cherry. What time establishes and consecrates, what experience adopts and confirms, what all men in all places unite in saving is good and valuable, is so, no doubt--A popularity of his sort fixes in society its roots so deep and strong that time cannot destroy it. The success which has attended this medicine for several years past, has overcome the prejudices of all re spectable and sensible men, and the article has taken a stand among the first-class discoveries and blessings of the age; and when resorted to in season, eradicates the diseases for which it is re-

commended.
Dr. A. H. Macanair, of Tarboro, North Carolina writes as under date of February 14, 1847, that he has used Dr. Wistar's Balsam of Wild Cherry in his practice the last eighteen months, and considers knows of none so deserving the public patronage.

TRICKS OF QUACKS.

LET EVERTSODY READ THIS LARSHULLY.—There is a Sarsaparilla for sale in the different fowns called S. P. Townsend's Sarvaparilla. It is advertised as the ORIGINAL, GENUINE, and all that. This Townsend is po doctor and never was; but was formerly a worker on raifroads, canals, and the like-yet he assumest the title of Doctor for the purpose of gaining credit for what he is not. He says "he has attended two medical schools, and practiced for afteen years!" Now the truth is, he never practiced medicine a day in his life! Such wilful, wicked misrepresentation looks had to the character and vericity of the man. I wish most sincerely, he had never made those statements of himself or of me. When will men learn to be honest and bruthful in all their dealings and intergourse with their fellow men! He applied to one Ruel Clapp to assist him in,man, ufacturing his mixture, stating the large sum he would make, as an inducement to embart in the busidess: These men have been insulting and libelling me in all possible forms, in order to impress the public with the helief that the Old Doctor's Starsaparilla was not the genuine, orderinal Scarsaparilla; made from the Old Doctor's Original Recipie. This S. P. Townsend says liptave sold the use of my name for 87 a week. I will give him 6300 if he will produce one single solitary proof of his. His statements of Thompson, Skillman & Co. are mothing but a tissue of falsehoods, simply made to deceive the public, and keep the ruth down in regard to his soviring, fermenting compound. This is to caution the public to purchase none but Old Dr. JACOH Townsend's Sarsaparilla, having on it she old Doctor's likepess, his family Coat of Arms, and his signatureacross the Coat of Arms.

Jerincipal Office, 102 Nussaut-street, N. Y City.

JaCOB TOWNSEND.

Old Dr. Jacob |Townsend

THE ORIGINAL DISCOVERER OF THE Genuine Townsend Sarsaparilla. Old Dr. Townsend is now about 70 years of age, and has long been known as the AUTHOR and DISCOVERER of the GENUINE ORIGINAL TOWNSEND AARS/APARILLA." Being poot, he was compelled to Invit 11s manufacture, by which means it has been kept out of market, and the sales circumscriped to those only who had proved its worth, and known its value. It had reached the 4rrs of many, nevertheless, as those persons who had been the aled of sore diseases, and saved from death, oro caimed its wonderful

besnyhealed of sore diseases, and saved from death, orocamed its wonderful

HEALING POVER.

This GREND AND UNEQUALLED PREPARATION is
manufactured on the largest scale, miftis called for throughout the length and breadth of the hand, especially as it is
found incapable of dogeneration or diserioration.

Unlike young S. P. Townsend's, it improves with age,
and never changes but for 'ng better' because it is prepared
on scientific principles by a scientific man. The highest
knowledge of Chemistry, and the latest discoveries of the
art, have all been brought not requisition in the manufacture of the Old Dr's Sarsapacilla. The Sarsapacilla root,
it is well known to medical men, coptains many medicinal
properties, and some properties which are nert or useless,
and others, which if retained in propuring it for use, protem. Some of the properties of Sarsapacilla are so rodaile
that they entirely evaporate and are lets in the preparation,
if they are not preserved by a scientific process, known onby to those experienced in its magnificance. Moreover,
these rolate grinciples, which by of in vignor, or as an exhalation, under heat, are the very essential medical propserties of the prot, which yet and the very as an exhalation, under heat, are the very essential medical propserties of the prot, which is more from the colornal quatter in
the root than from anything class; they can then strain this
insipal or vapid liquid, sweeten with sour molasses, and
then call it "SARSAPARILLA EXCRACT or SYRUP."
But such is nogine article known as the
GENUNE OLD DIE FACOR TOWN SERVOS.

But such is nowine article known as the GENUINE OLD DR JACOH TOWNSEND'S GENUINE OLD DR JACOB TOWNSEND'S

SARSAPARILLA.

This is so prepared that all the inert properties of the Sarsaparilla root are first removed, everything capable of becoming acid or fermentation is extracted and rejected; then every particle of medical virtual is secured in a pure and concentrated form; and thus it is reintered incapable of losing any of its valuable and healing properties. Prepared in this way, it is made the most powerful agent in the Cure of innumerable Diseases.

Hence the reason why we hear confinentiations on avery

Cure of innumerable Diseases.

Hence the reason why we hear commendations on every side in its favor by men, women, and children. We find it doing wonders in the cure of CONSUMPTION, DYNPEPSIA, and LIVER-COMPLAINT, and in RHEUMATISM, NCROP, ULA, PILES, COSTITENESS, all CUTANE, OUS ERUPTIONS, PIMPLES, ELOTCHES and all affections arising from

I affections arising from IMPURITY OF THE BLOOD. IMPURITY OF THE BLOOD.

It passesses a marvellous efficacy in all complaints arising from Indigestion, from Acidity of the Stomach, from unequal circulation, determination of blood to the head, palpitation of the heart, cod jet and hands, fold chilts and hot flashes over the body. If has not its equal in Colds and Coughs; and promotes easy expectoration and gentle perspiration, relaxing strictures of the lungs, throat and every other part.

But in nothing it its excellence more manifestly seen and

acknowledged than in all kinds and sta-FEMALE COMPLAINTS. It works wonders in cases of Fhor Albus, or Whites, Fulling of the Womb, Obstructed, Suppressed, or Painful Memes, Irregularity of the meastrand periods, and the like; and is effectual in curing all the forms of Kidney Discasses. By removing obstructions, and regulating the general system, it gives tone and strength to the whole body, and thus cures all forms of

breautse of one GRAND FACT, that the one is INCAPA-BLE of DETERIORATION, and NEVER SPOILS. breather of one GRAND FACT, that the one is INCAPA-BLE of DETERIORATION, and NEVER SPOILS, while the other DOES souring, feripenting, and bluring the buttles containing it into traggents: the sour, acid liquid exploding, and damaging other goods! Must not this horithle compound be poisonous to the system?—What? put acid into a system already discased with acid? What causes Dyspepsia but acid! Do we not all know that when food sours in our stomachs, what mischief it produces?—flatulence, heartburn, palpitation of the heart, liver complaint, diarrhora, dysentery, colic, and corruption of the blood! What its Scrofula but an acid humor in the body? What produces all the humors which bring on Eruptions of the Skin, Scald Head, Solt Rheum, Eryspelas, White Swellings, Fever Sores, and all ulcerations internal and external? It is nothing under heaven but an acid substance, which sours, and thus spoils all the flitids of the body, more or less. What causes Rhematism but a sour and acid fluid which institutes itself between the joints and elsewhere, irritating and inflaming the delicate tissues upon which it acts? So of nervous disenses, of impurity of the blood, of deranged circulation, and upcarly all the alignents which afflict human nature.

Now is it not horrible to make and sell, and infanitely stores to use this.

SOURING, FERMENTING, ACID! COMPOUND? OF S. P. Townsend's Genuine Original Sursaparilla, is an IMITATION of his inferior preparation?!

Heaven forbid that we should deal in an article which would bear the most distant rememblance to S. P. Townsend's article and old Dr. Jacob Townsend's Genuine Original Sursaparilla, is an IMITATION of his inferior preparation?!

Heaven forbid that we should deal in an article which would bear the most distant rememblance to S. P. Townsend's article and old Dr. Jacob Townsend's article and old Dr. Jacob Townsend's saraparilla are heaven-wide apart, and infinitely dissinitar; that they are unitike, in every particular, having not one single thing in common.

As S. P. Townsend is no doctor, and never was, is no chemist, no pharmaceutist—knows and more of medicine or disease than any other common, mascientific, unprofessional man, what guarantee can the public have that they are receiving a genutine scientific medicine, pontaining all the virtues of the articles used in preparing it, and which are incapable of changes which might render them the AGENTS of Disease instand of health?

But what else should be expected from one who knows nothing comparatively of medicine or disease? It requires a person of some experience to cook and serve up even a common decent meal. How much more important is it that the persons who manufacture medicine designed for WEAK STOMACHS AND ENFERBLED SYSTEMS, should know well the medical properties of plants, the best should know well the medical properties of plants, the best manner of securing and concentrating their healing virtues also an extensive knowledge of the various diseases which the human system, and how to adapt remedies to

affect the human system, and how to adapt rememes to these diseases!

It is to arrest frauds upon the unfortunate, to pour balm into wounded humanity, to kindle hope in the despairing bosom, to restore health, and bloom, and vigor into the crushed and broken, and to benish infamily that OLD DR. JACOB TOWNSEND has SOUGHT and FOUND the opportunity and means to brine his.

Granid Universal Commenters of Resmeet; within the reach, and to this knowledge of all who need it that they may learn and know, by Joyful experience, its transfer of the second and the property to Health.

There is Barsaparilla for sale in the different town called bld Dr. Jacob Townsend's Barsaparilla. It is his retrieved as the original fac. This is a notortous falsehood. Dr. Townsend has expanded over 200,000 has obtained a the original fac. This is a notortous has obtained a character and reputation throughout the United States and a greater part of the world—the sale being continue.

This excited the cupidity of certain unprincipled men and as old man who has been engaged in peddling cheng publications for a number of years. This man's name is Jacob Townsend, He applied to a number of sizes to get employment, or to sell the use of his name to get a property of the property of the same to get a property of the property of the property of the same to get a property of the pr

COMPOUND EXTRACT OF SARSAPARILIA. The most extraordinary Medicine in the World?

Phis Extract to put up in Quart Bottles: it soix times chasper, pleasanter, and neurranted superior to any sold. It sures without pomiting purging, sickening or debilitating the Patient. The great beauty and superiority of this Sarsapa-rills over all induer medicines is, that while it eradi-cates the disease, it invigorates the body. It is one of the very best

the very best supported the body. It is one of SPRING AND SUMMER MEDICINES

the winde system and strengthens the parson, but it creates how, pure and rich blood; a power possessed by no other medicine. And in this lies the grand secret of its wonder, ful success. It has performed within the last two years more than 100,000 cures of severe cases of disease; at least 15,000 were considered incurable. It has swed the lives of mire than 10,000 children the past two seasons in the City of New York alone.

anns in the City of New York alone.

10,000 ceases of General Debility and Washington of General Debility and Washington Saraparilia invigarates the whole system permanently. To those who have lost their nuncoin energy by the effects of medicine or indiscretion committed in youth or the accessive induspance of the passions, and brought on by physical prestration of the passions, and brought on by physical prestration of the passions, and brought on by physical prestration of the passions, and brought on by physical prestration of the passions, and brought of the state of subition, fainting sensations, presummer decay and decline has similar towards that fath disease Chaumption, can be entirely restored by this pleasant remedy. This Saraparilla is far supprior to any

As it renews.and invigorates the system gives activity to the limbs, and arrently to the mescular system a most extendingly degree.

Oleanse and Somminplion Cured.

Oleanes and Strengthen, Consumption can be cared. Hundhitis, Consumption, Consumption can be cared. Hundhitis, Consumption, Liver Complaint, Colds, Gatarrh, Coughs, Asthead, Spetting Bland, Soreness in the Chast, Hectic Finsh, Night Sweats, Discust or Profines Espectro atom, Pain in the Side, to hear been and can be cured.

Spetting Etheod, it, Con forth, April 28, 1887.

Da. Townsend.—I verify believe your Sarasparitie has been the means, through Providence, of saving my life. I have for saverally-care had a had Cough. It became worse, and store. At last I raised large quantities of blood, had night ended that the had a wonderful change been wrought in me. I have only said your Sarasparille a short time, and there has a wonderful change been wrought in me. I have now while the walk all over the city. I raise no blood and my cough has left me. Tou can well have seen that I tim thankful for these results. Tour obedient servant,

untatism that Dr. Townsend's Sursaparilla has cored most severe and chronic chaes are weekly eradicated James Complings, Esq. one of the assistants in the Lunatic Asylum, Blackwell's Island, is the gentleman

Innotic Asylum, Mackwell's Island, is the gentleman spoken of in the following letter.

Bit Townsend—Dear Sir: I have suffered terriby for aim gears with the Rheminatism; considerable of the time I condition one; sleep or walk. I had the most distressing pains, and my limbs were terribly swollen. I have used four bottles of your Sairenagatika and they have slove me more than a thousand itoliars worth of gdod. I sim an outh better—indeed I am entrely referred. You are at therety to use this for the benefit of the afficient. Yours respectfully, JAMES CUMMINGS

Francie Melicine.

Dr. Jounseind's Spraparilla is a sovereign and so dy cure for incipient Combumption, Barrenness, Probapas After de Faling of the Womb, Contiveness, Ples, Loucorrhom, or whiter, obstrocted or difficult Menstrustion. Incontinence of Urine, for involuntary discharge thereof, and for the general prostration of the system—no manter whether the result of inherent cause, or causes produced by irregularity, illuses or accident. Nothing can be more surprising than its invigorating effects upon the human frame: Persons of all weakness and institute from taking it in once become robust and full of energy under its influence. It immediately counteracts the nervelessness of the female frame, which is the great cause of arrenness. It will not be expected of us, it cases of so deficate a nature, to exhibit cartificates of cares, performed, but we kan assure the affilted, that hundreds of cases have, here proported to us. Thousands of cases where families have been without children, after using a few bottles of this invaluable institute, have been kept blessed with line, healthy offspring. It has been expressly prepared a reference to female complaints. No femile, which has reason to suppose the approaching that critical period. The large of life, should neglect to take it had it is a certain preventive for any of the infunction and learning this medicine. Nor is it less valuable for those who are approaching that underly the time of his, This; period may be delated for separal years by using this made in womanhood, as it is calculated to assist active by quickening the blood and in justifuing. The large periodes in which women are subject.

Opinious of Physicians. the Townshild is simust thilly receiving orders from the sicious in different parts of the Union. This is to certify that we the undersigned Physicians of the City of Alleany, have; in sumerous cases prescribed Dr., Townsend's Caraparille, and follows is to be one of the most valuable preparations in the macket. H. P. PULING, S.D., J. WILSON, M.D., R. B. BRIGGS, M. D., V. E. FLMENDORF, M.D., Alliany, April 1877.

* CAUTIONS . Owing to the great success, and lainbestee hale of Dr. Townsond's. Sarisportlle, a hunter of men who were formarly our againts, have commenced, making Sares parille. Extracta. Chiairs. Bitters, Extracta of Yellow Book, &c. They goversily plat it up in the same shape of feattles, and sound of these have attens and capied our advertionments, they are only not better initialized and alquid helavoided. None gonuine sistens by S. P. Townsoull.
