# Littell's Living Ace.

PROSPECTUS .- This work is conducted in the spirit of Littell's Museum of Foreign Literature, (which was favorably received by the public for twenty years,) but as it is twice as large, and appears so often, we not only give spirit and fresh-ness to it by many things which were excluded by a month's delay, but while thus extending our scope and gathering a greater and more attractive variety, are able so to increase the solid and substantial part of our literary, historical, and political harvest, as fully to satisfy the wants of the Anerican reader.

The elaborate and stately essays of the Edin-burgh Quarterly, and other Reviews; and Blackwood's noble criticisms on Poetry, his keen political Commentaries, highly wrought Tales, and vivid descriptions of rural mountain Scenery: and the con-tributions to Literary, History, and Common Life, by the sagacious Spectator, the sparkling Examin er, the judicious Athenaum, the busy and industri ous Literary Gazette, the sensible and comprehensive Britainnia, the sober and respectable Christ ian Observer ; these are intermixed with the Military and Naval reminiscenes of the United Service, and with the best articles of the Dublin University, New Monthly, Frazer, Tait, Ainsworth, Hood, and Sporting Magazine, and of Chambers' admirable Journal. We do not consider it beneath our dignity to borrow wit and wisdom from Punch ; and, when we think it good enough, make use of the thunder of The Times. We shall increase our variety by importations from the continent of Europe, and from the new growth of the British colonies The steamship has brought Europe, Asia, and Africa, into our neighborhood; and will greatly multiply our connections, as Merchants, Travellers,

and Politicians, with all parts of the world : so that much more than ever it now becomes every intelligent American to be informed of the condition and changes of foreign countries. We believe that we can do some good in our day and generation ; and hope to make the work indispensable to every well-informed family. We say indispensable, because in this day of cheap literature it is not possible to guard against the influx of what is bad in taste and vicious in morals, in any other way than by furnishing a sufficient supply of a healthy character. The neutal and moral appetite must be gratified.

We hope that by "winnowing the wheat from the chaft, by providing abundantly for the imagi-nation, and by a large collection of Biography, Voyages and Travels, History, and more solid mater, we may produce a work which shall be popuwhile at the same time it will aspire to raise he standard of public taste.

Old Dr. Jacob 'Townsend. THE ORIGINAL 'DISCOVENER OF THE Genuine Townsend Sarsaparilla.

Gentine: Townsend is now about 70 years of age, and has long been known as the AUTHOR and DISCOVERER of the GENUINE ORIGINAL "TOWNSEND SARSAPARILLA" Bhing, poor, he was compelled to limit its manufacture, by which means it has been kept on of market, and the sches circumscribed to those only who had proved its worth, and known its value. It had treached the ears of many, nevertheless, as those persons who had been healed of sore diseases, and saved from dasth, upo claimed its worther the ALING POWER.

ciaimed its wonderful HEALING POWER. This GRAND AND UNEQUALLED PREPARATICN's manufactured on the largest scale, and is called for through-out the length? and breadth of the land, especially as it is found incapable of digeneration or deterioration. Unlike young. S. P. Townsend's, it improves with ag-and never, changes but for 'the better; because it is prepared-on exientific principles by a scientific man. The histest knowledge of Chemistry, and the intest discoveries of the art, have all been brought into requisition in the manufac-ture of the Old Dr's Saraaparilla. The Saraaparilla root, it is well known to medical men, contains frany melichal properties, and some properues which are inert or useles, and others, which if retained in proparing it for use, pro-duce formentations and actd, which is injurious to the ag-term. Some of the properues of Saraaparilla are worderlife that they entifyle varyorize and are done are not in the preparation, if they are not preserved by a scientific process, known or by to those experiment of its monifacture. Moreover, these volatile principles, which ify off in vapor, of as an et-halation, under heat, are the vor essential medical pro-perties of the root, which ify not is value. Any person can boil of stew the root till they get a date reolord floud, which is more from the coloring matter m the root than from anything else : they can then estrain the inspirid or vapid liquid, executen with sour molasses, and then call it "SARSAPARILLA EXTRACT or SYRUP." GUANO .- Does guano afford a permanent improvement to the soil, or does it act on the first crop, and then leave the land as poor, or poorer than it was before. This is a question so, often asked. We will once more answer, that this is as all other stimulants, whether applied to man or the soil mless furnished with some other food, the effect will not be permanent. But give land a small coat of mari, manure, or green crops, for the guano to work upon, and then it will be found that the effect will be not only beneficial to the first crop, but several succeeding ones. None but the genuine, Pornvian guano can be depended upon. . Manufactured guaso," in many cases, is nearly worth-In The Maryland farmers, the past year, have tried various experiments in planting potatoes with guano and find that when it was put on top of the hill or drill, and slightly covered with earth, the yield is much greater than when placed at the bottom of the hill.

AGENCIES-We are desirous of making arrange ments in all parts of North America, for increasing the virculation of this work-and for doing this a liberal commission will be allowed to gentlemen who will interest themselves in the business. And we will gladly correspond on this subject with any agent will send us undoubted references.

POSTAGE-When sent with the cover on, the Living Age consists of three sheets, and is rated as a pamphlet, at 44 cents. But when sent with-out the cover, it comes within the definition of a newspaper given in the law, and cannot legally be charged with more than newspaper postage, (11 cts.) We add the definition alluded to:

A newspape is "any printed publication, issued in numbers, consisting of not more than two sheets and published at short, stated intervals of not more than one month, conveying intelligence of passing

MONTHLY. PARTS .- For such as prefer it in that form, the Living Age is put up in monthly parts, containing four or five weekly numbers. In this shape it shows to great advantage in comparison with other works, containing in each part double the matter of any of the quarterlies. But we re-commend the weekly numbers, as fresher and fuller of life. Postage on the monthly parts is about 14 cents. The volumes are published quarterly, each volume containing as much matter as a quar-

terly review gives in eightcen months. E. LITTELL & CO., Bostos, Mass.

WASHINGTON, 27 Dec. 1845. Or all the Periodical Journals devoted to literature and science which abound in Europe and in this country, this has appeared to me the most use-ful. It contains indeed the exposition only of the current literature of the English language, but this, by its immense extent and comprehension, includes a portraiture of the human mind in the utmost expansion of the present age. J. Q. ADAMS.
