EMPTEMBER 19. 1850.

The Sheep Bot.

As this is the season when sheep are worried by the bot fly, farmers should be reminded that now is the time therefore to see that they are kept from the sheep or that "an ounce of preventive is better than a pound of intrinsic worth formerly caused him to disre-

This bot, (Cephalemya ovis, of Harris) is a fly very much the color of the one which deposits its eggs on the legs of horses, to which it appears to be somewhat allied, but smaller and of a different shape. I have always seen it stated when mention is made of this fly, that it deposits its eggs in the nose of the sheep, and under the article of " bot." in Ree's Cyclopedia we read that the eggs are doubtless deposited within the inner margin of the nostrils. But as far as I have exmined, and I have caught and examined the bots themselves, I am convinced that not the egg but the very live maggots are deposited in or on the nose of the sheep. I have caught the fly and instantly forced from it scores of ive maggots, about one sixteenth of an inch in length. Under the microscope they are seen to be a white grub or maggot, with more or less black on the head, which extends in two black lines for about one third its length along its belly. They are very active when first forced from the fly, and crawl or jump

an inch or more in a few seconds. L'could wish that some one would institute re-searches in the matter and see if they meet with the same results; for if this fly realiv deposits maggots instead of eggs, it may prove to be something new to science, though it will effect not a whit, their victims, the

Remedies .- As a preventive local application of tar to the nose of sheep has been highly recommended. This is undoubtedly good but I think a better one is, to mix sulpher in small proportions with their salt, which, if given them daily, as it should be, will keep their noses constantly covered with more or less sulphur, whereas tar soon dries and loses its repulsive odor, which is not the case with sulphur.

In wet climates shepherds are much troubed with the maggot of the common green blowing fly. They must look over their sheep every day; for wherever the fly finds a wet lace in the wool, it deposits its eggs, which oon become maggots. If left alone a few days they kill the sheep. In some parts of England, shepherds simply shear the wool where the maggots are, and then pour on them a gallon or two of clean warm water. This done they do not hesitate a moment to turn the sheep to pasture, so great is their confidence in their remedy. I have seen it tried repeatedly, and never knew it to fail.

Otsego Co. N. Y., July, 1850.

On the Use of Mules.

EGREC.

Mules, on the general average, live more than twice as long as horses. They are fit for service from three years old to thirty.-At twelve a horse has seen his best days and is going down hill, but a mule at that age has. becarcely risen out of his childhood, and goes consimproving till he is twenty. Instances are recorded of mules living sixty or seventy a but these are exceptions. The general rule is that they will average thirty. Mules it and receive a continuance of the same. are never exposed to diseases as horses are. I have epent considerable time in studying. the diseases of horses, from ring bone to pollthe diseases of horses, from ring bone to poll-evil; but who ever heard of a ring-boned, per Spice, Ginger, Saleratus, Raisins, Rice, Mackspayined, wind-broken, mule ! Immense erel, Codfish, Zantee curranta, Tapioca, Arrow Root, sums of money are annually lost in the premature death of high spirited horses by ac of Lemon, cassia Soda Boda crackers Starch Bar rident and disease. Mules have organs of and castne Scap, candles, all sorts of Tobacco and rision and hearing far superior to those of Snuff, Vinegar, de. de. the horse hence they seldom shear, frighten or run off. A horse frightens because he magines he sees something frightful, but a mule, having superior discernment, both by the eye and ear, understands everything he meets, and is therefore safe. For the same seson he is surer footed, and hence more valsable in mountain regions and on dangefous roads. I doubt whether on the Alpine paths ored cambrick, cloak Fringe, Gimp, Edging, Purse mule ever made a mis-step. He may have en deceived in the firmness of the spot where he sets his foot, but not in the proprity of the choice, all appearances considered. horse. A pair of these animals owned by a neighbor of mine, although small in size, all plough more land in one week than four orses. In light harness or under the sadle, in hanling iron ore, or on the the turnike before a conestoga wagon, one mule in lifetime will kill seven horses. Their facfilty of endurance is almost incredible. Anier very important fact is that in the matar of food a made will live and thrive on less han one half what it takes to keep a horse. The homes of England at the present time re consuming grain which might be more scottably disposed of. In our country hower the saving of grain is no object. In a besional point of view, the agricultural intera so great that the greater demand for in of all kinds the better for the farmer: t yet individual farmers who are in debt, d whose land is not improved, would find profitable in the course of ten years, to the labor of a full team, and save one ialf of the food necessary to keep it up, as night be the case in substituting mules for orses .- Pittsburg Saturday Visiter.

RESULTS TROM SUBSOIL PLOWING .- Mr. aques, of Rahway, New Jersey, speaking of mbsoiling says; On 4 1-2 acres of shelly and be raised 530 bushels of corn which much greater yield than he anticipa-

The ground was prepared by plowing acont four inches deep with a surface plow, se seeds to go, guring to the compactness of good and cheap. Clock Fairs, Verges and Keys, which is a shelly subsoil. The subsoil plow followed Watch Guard chains, cords and Keys of all surts.

Jewelry. Ladies and Gentlemen's Gold Bosom Pins, Finger Rings, Ear Hoops, gold and silver Pencielle and penciess, study, alides, gold Bearls, atc. the subsoil plow, as thinks his crop would too numerous to mention

have proved a failure, as the roots could not have penetrated the subsoil, and consequently would have perished by the severe drought.

Corn and Cob Crusher.

MR. EDITOR :- These excellent instruments which enable the farmer to economise a very valuable product, which ignorance as to its gard, are now beceming quite common.-They are cheap, portable, and work with all desirable efficiency, and should have a place etc. etc. on every farm. Yet when the inhabitants of a hamlet or neighborhood feel disposed, they can associate and purchase a "crusher" as common stock, for one is sufficient to do the work on twenty farms; if there is only a spirit of accommodation, one will frequently be sufficient in quite a large village, and will accomplish for each proprietor or stockholder, all that is demanded or desired. That the grinding of the cob with the corn

is a great saving, will not, I think, be questioned even by the most skeptical. The nutrition contained in the pith of the cob is by no means inconsiderable, as is fully attested by the fact, that cobs, ground into meal and aitted make an excellent and nutritious pudding. The farina is quite as palatable as that of wheat and exists in considerable quantity, though formerly the cob was supposed to be worthless. Some farmers practice the following method in economizing their cobs .-They provide themselves with a hogshead, and fill it with brine-filling the hogshead with this liquid to the brim. After the cobs have become completely saturated with the brine, and they are thereby rendered soft. they mess them out to their cows, oxen and horses, all of which partake of them with a- cloth, carpeting, sand paper, Baskets, Tin Ware, vidity, provided they are debarred the use of salt. Being rendered soft by the liquid which they absorb and which permeates every pore, they are easily masticated, and are potass hydrind, creosote, red and white precipitate, said to be an excellent "feed." I have never tried this method but think it has all the appearance of being a good one. But the corn and cob crusher is the implement for strict economists, and no person who feeds animals | rad and pulv. columbo sulphate of zinc, salfron blos should be without one. They are operated by hand, horse or water power, portable or by hand, horse or water power, portable or dust gum kino, true, scammenium, flos zinc, cor-stationary as may suit the owner's views and rosive sublimate, calamine lapus, flos. Martiales, convenience, and they are so cheap that there can be no objection to them on the score of can be no objection to them on the score of expense. It is not, perhaps, overestimating their value to say that in a village where control (salt petre) wormseed, pulv. galls alleppo, refisiderable quantities of corn are annually fed one of these machines will "pay for itself" in a single season. One farmer has asserted that he alone could purchase one every year and have a balance from the profits saved .-I advise every one who uses meal on his farm to consider this subject candidly, and

LYONS & SON'S,

TRICKS OF QUACKS,

LAT EVENTROOT RAD THIS CARSPULL.—There is a Saraparilla for sale in the different downs called S. P. Townscorle Saraparilla. It is advertised as the Ollici NAL, GENUINE, and sli mat. This Townscorle Saraparilla. It is advertised as the Ollici NAL, GENUINE, and sli mat. This Townscorle Saraparilla, it is advertised as the Ollici NAL, GENUINE, and sli mat. This Townscorl is postocro and never was; but was formerly a worker on rationally, cannot not gaining crafts for what he is not. He says the has attended two medicar schools, and practiced for fifteen years! "Now the truth is, he herer practiced medicine a day in his life! Such wilful, vicked interepresentation tooks but to the Character and veracity of the man. I wish most emerely, he had never made those statements of himself or of me. When will men learn to be honest and truthful in all their dealings and intercourse, with their fellow men! He applied to one Ruel Clapp to assise him in man utacturing his mixture, status the large sums he would make, as an inducement to embark in the business. These men have been insuling and libelling ne in all possible forms, in order to impress the public with the botical that the Old Dector's Sarsaparilla, made from the Old Dector's Original Recipie. This S. P. Townscod says, I have sold the use of my name for 7a week. I will give him \$500 \text{ the use of inflamma & Co., also nothing hut a tissue of falsehoods, simply made to deceive the public, and keep the truth down in regard to his souring; fermenting compound. This is to caution the public to purchase none but Old Dr. JACOB Townsend's Sarsaparilla, having on it she pound. The open of the same pound. This is to caution the public to purchase none but Old Dr. JACOB Townsend's Sarsaparilla, having on it she pound.

Old Dr. Jacob Townsend, THE ORIGINAL DISCOVERER OF THE Genuine Townsend Sarsaparilla. Old Dr. Townend is now about To years of age, and has long been known as the AUTHOR and DISCOVERER of the GENUINE ORIGINAL "TOWNSEND SARSAPARILLA." Being poor, he was compelled to limit its manufacture, by which means it has been kept out of market, and the sales circumscribed to those only who had proved its worth, and known its value. It had reached the ears of many, nevertheless, as those persons who had been healed of sore diseases, and saved from death, orogained its wonderful.

HEALING DOWER

This GRAND AND UNEQUALILED PREPARATION is manufactured on the largest scale and is called for throughout the tength and breadth of the land, especially as it is found incapable of decreneration or deterioration.

Untike young S. P. Townsend's, it improves with age, and never changes by for 2. better; because it is prepared on scientific principles by a scientific man. The histerst knowledge of Chemistry, and the latest discoveries of the art, have all hefen brought into requisition in the manufacture of the Old Dr's Sa-saparilla. The Sarsaparilla root, it is well known to medical tenn, contains many medicinal properties, and come properties which are inert or useless, and others, which if retained in preparing it for use, produce ferminatelion and acut, which is injurious to the system. Some of the properties or Sirsaparilla are so volatile that they entirely evapotte and and lost in the preparation, if they are not preserved by a scentific process, known on by to those experienced in 11st manufacture. Moreover, these volatile primitiples, which fixed in vapor, or as an exhalation, under heat, are the very essential medical properties of the root, which give not it all its value.

Any person can boil or stew the root till they get a dark colored liquid, which is more from them from anything class; they can then strain the inappid or vigual liquid, which is more from the coloring mattern the root than from anything class; they can then strain the inappid or vigual liquid, which is more with some molasses, and then call it SALSAT ARLIA ENTERACT or SYRUP. But such is not the article known as the HEALING POWER.

But such is not the article known as the GENUINE OLD DR JACOB TOWNSEND'S GENUINE OLD DR JACOB TOWNSEND'S SARSAPARILLA.

This is so orepared that all the mert properties of the Sarsaparilla root are first removed, everything capable of becoming acid or fermentation is extracted and rejected then every partite of medical virtue is secured in a pure and concentrated form; and thus it is rendered incapable of losing any of the valuable and healing properties. Prepared in this way, it is made the most powerful agent in the Cure of insurance allow Diseases.

Hence the reason why we have commendations on every side in its favor by men, women, and children. We find it doing wonders in the cure of CONSUMPTION, DYSPEPSIA, and LITER-COMPLAINT, soil in RHECUMATISM, SCROFFULA, PILES, COSTIVENESS, all CUTANE OUS EREPTIONS, PLAPLES, BLOTCHES and all affectious agents.

Inflections arreing from IMPURITY OF THE BLOOD. IMPURITY OF THE BLOOD.

It presence a marvelinus clinicary in all compliants arrising from Indigestion, and Acidity of the Stodagek, from unequal circulation, determination of blood to the head, palpitation of the heart, cold feet and hands, cold chills and hot fisches over the body. It has not its equal in Colds and Coughs; and promoters easy expectoration and genile perpiration, relianing strictures of the lungs, throatland every other part. epiration, reluting strictures of the manifestly seen and Rut in pathing it is ever those others of stages of

FEMALE COMPLAINTS.

FEMALE COMPLAINTS.
It works winders in cases of Fluor Alluis or Whites, It works winders in cases of Fluor Alluis or Whites, Palling of the Wood, Obstructed, Suppressed, or Painful Menses, It regit antly of the mensurual periods, and the like; and is effectual in curing all the forms of Kidney Dissenses. By removing obstructions, and regulating the general system, it gives tone and strength to the whole body, and thus cures all forms of Nervous Disenses, and Debitity.

and thus prevents or releaves a great variety of other maladies, as Spinet irritation, Neuralgia, St. Vitus' Dance, Streaming, Epiteptic Fits, Contuitsions, &c. It cleanes the blood, executes the liver to [healthy artion, tones the stomach, and giver good digestion, relieves the bowels of torpor and constrpation, allays inflammation, purifies the skin, equalities the circulation of the blood, producing gentle warmth equality all over the body, and the measurable presurration; relaxes strictures and tightness, re meansine perspiration: relaxes aricuires and tightness, is moves a laboractions, and invigorates the entire nervous system. Is not this then

parem. Is not this then

The Medicine you pre-eminently need?

But can any of these things be said of S. P. Townsend' niet in article? This young man's liquid is not to be COMPARED WITH THE OLD DR'S,

COMPARED WITH THE OLD DR'S, because of one GRAND FACT, that the one is INCAPABLE of DETERIORATION, and
INEVER SPOILS.

while the other DOES souring, fermenting, and blowing the bottles containing it into (ragments; the sour, acid liquid exploiting, and damacing other goods! Must not this horrible compount be poissonus to the system?—What put acid into a system already diseased with ucid? What put acid into a system already diseased with ucid? What was the processes but acid? I was the all know that when ingul explosine, and damacing other goods? Must not this horrible compound be poisurous to the system?—What? put acid into a system already diseased with ucid? What causes Dyspepsia but acid? Do we not all know that when food sours in our stomacis, what mischief it produces?—flatulence, heartburn, palpitation of the heart, liver complaint, diarrhea, dysentery, colic, and corruption of the blood? What is Scrifula but an acid humor in the body? What produces all the humors which bring on Eruptione of the Skin. Scald Head, Salt Rhoum, Ergsipelas, White Swellings, Fever Suca, and all ulterations internal and external? It is nothing under heaven—but an acid substance, which sours, and thus spoils all the fluids of the body, more or dess. What causes Rhoumatem but a sour and acid fluid which instinuates itself between the joints and elsewhere, irritating and inflaming the delicate tissues upon which it acts? So of nervous decases, of impurity of the blood, of deranged circulation, and nearly all the aliments which afflict human nature.

Now is it not horrible to make and sell; and infinitely tooke to use this

source to use this SOURING. FFEMENTING, ACID "COMPOUND" OF

series to use this SOURING. ACID "COMPOUND" OF SOURING. FFEMINTING. ACID "COMPOUND" OF SOURING. SPEMINTING. ACID "COMPOUND" OF SPEMINTING. ACID "COMPOUND" OF SPEMINTING. SERIES OF A SUPPLY OF SOURING SOURING. SATERIAR, is an IMMITATION of his inferior preparation!

Heaven forbid that we should deal in an article which would bear the most distant resemblance to S.P. Townsend's most distant resemblance to S.P. Townsend's most distant resemblance to S.P. Townsend's carticle?

We wish it understood, because it is the absolute truth, that S.P. Townsend's carticle and old Pr. Jacob Townsend's Sarsaparilla are heaven-wide spart, and infinitely dissimilar, that they are unlike in every particular, having not one, single thing in common.

As S.P. Townsend is no doctor, and never was, is no chemist, no pharmacculisti-knows no more of medicine or disease than any other common, unscientific, unprofessional man, what guarantee can the public have that they are receiving a genuine scientific medicine, containing all the virtues of the articles used in preparing it, and which are incapible of changes which might renter them the AGENTS of Hisease It has the person of some experience to cook and serve up even a common decent meal. How much more important, is it that the persons who manufacture medicine designed for WEAK STOMACHS AND ENFEELED SYSTEMS, should know well the medicine properties of plants, the best manufacture of securing and concentrating their healing virtues. should know well the medical properties of plants, the best manner of securing and concentrating their healing virtues, also an extensive knowledge of the various diseases which affect the human system, and bow to adapt remedies to

affect the human system, and now in scape to make these diseases!

It is to arrest frauds upon the unfortunate to pour balm into wounded humanity, to kindle hope in the despairing bosom, to restore health, and thoom, and vigor into the crushed and broken, and to banish infirmity, that OLD DR. ACOB TOWNSEND has SOUGHT and FOUND the opportunity and means to bring his Grand Universal Comcentrated Remedy within the reach, and to the knowledge of all who need it that they may learn and know by joyful experience, its

IN EACH BOTTLE ONE Tableroods

IN EACH BOTTLE ONE Tableroods

Twenty-One Days.

Twenty-One Days.

Rattle or Sie Bottle for \$3.00.

E now put up in QUART BOTTLES, and is of the same medical strength and efficacy as that in the small bottle.

The great superiority of This Pursyrers over Sarsaranna and all other similar medicines, may in some measure be understood from the following facts: First-bocame it not entry possesses, as portions of its medication, the Purz Essence of Sarsaparilla, Yellow Dock

Cherry and Sassafras Barks, nore strongly, more powerfully concentrated, and larger sund its of each of these purifiers in each bottle of it than can be force in any bottle of medicine, called Extract of Saraparilla; But, Sacouth vibecated This Perifier also possess the medical efficiency and healing sirtless of several other

medical effectorism healing virtuer of several other Resolus, Burkes, and Vegetables, the Pourrymo properties of which are greatly survivas in Sarasparilla, and when these are compounded with Sarasparilla, and when these are compounded with Sarasparilla, its loss locks, Cherry, and Sarasparilla, the the medical canche most certain and active Parlier of the Blood in the world. So true is this, that to have every desired medical effect the Book in

the Dose is Only One Tablespaouful, three time a Day.

Only One Tablespaouful, three time a Day.

But it is not so with Extract of Surveyarilla, for in consequence of its medication (in large bottles) being so much weakened and reduced the Dose of Suraparilla has to be Two. Three, or More Tablespoonfuls—Three, Form, or More Tablespoonfuls—Three, Form, or More Suraparilla diffect; and as a bottle of Suraparilla only halds sittly four spoonfuls, therefore, so may spoonfuls at a dose, and so many doses a day, will use up a bottle of it in Four, Rive, or Six Days, which show that bottle of Brant's Purilier will have been supported to the suraparilla only the suraparilla only the suraparilla only the suraparilla only halds of the suraparilla only halds of the suraparilla only the

Four, Five, or Six Purys, which show that bottle of Brant's Purifier, will last hom Twelve to Sixteen Dars longer than a bottle of Sixteen parilla; and if its daily medical edicacy (in small dors,) be a Purifiving and Haaling as the daily (large dors) of Samarilla, then it Paoves that One bottle of his Pouries is worth Tarce, Fine, or Five times more than a bottle of Sam

parilia.

The above comparison does not yet show the great difference in entire perwise in the medical efficacy of Brant's Puritis and Sassafrantial This will appear by the certificates of curps in Hrant's Primphiets, showing that ONE BOTTLE OF BRANT'S PURIFIER nus more chicacy, and cures more impure blood disease, the TEN Bottles of Sursaparilla. If, then, One Borriez of Poursez sells for Ost Dougs, One Bottle of Sursaparilla should sell for Ton Cents.

CANCEROUS SCROFULA Mr. I. B. Haskin of Rome, Onelda Co., N. Y., who was cured of Scroulla in 1846, swore to the facts as related herow, in an action in the Supasses Count in the City of New York, on the 26th of December, 1849, under the following circumstances:

A person in the City of New York had manufactured and vended a spurious spicelo of medicine, calling it Bass't Indian Ministry, in imitation of the genuics medicine. He was protected to obtain damages, in the Supreme Coung in City of New York, and the case was referred by the Cost of the City of New York, and the case was referred by the Cost to J. S. Bosword, Egg., 51 Liberty street, an eminent Lawre, we deferre to take the testimony. The defendant pleaded in stigation of damages, that the Proprieture of Brant's Medicas had in some curse published rales; statements of core, was not entitled to damages. The case of Mr. Haskin was relected to entitled to damages. The case of Mr. Haskin was relected so being filler, and Haskins was sincered as others in regard to the Facts on published, and his lessionsy more than systation the publication.

LIRS, SEE BEANT'S PANTHLETE.

Mr. Z. S. Terry merchant, Byron, General County, K.T.

wrote, Aug. 24, 11846: Breen's Medicine is doing wonder
here—ithas cured a man o. Consumption, that all the physcians had said must die. When he commenced taking
Brant's Medicine, he could no raise his hand to his head to
have supported a separate to indicate bled at the lungs, and every symptom seemed to inditat he must aller but, astonishing to all, he is now ab that he must die; but, astonishing to all, he is now able us also and rides all over the county. He used entyles better. I will also show you, when I visit the city of New York in the apring, what great things Breat has done for me, the also cured a young ledy of Consumption in Oriems county, which her father says no doctor could cure.

RAISED FROM THE GRAVE. Messrs Fratt & Foster, merchants of West Comwill, Conn., called on us at New York, April 21et, 1847, and said Brant's Balson had effected cures of such hopeless came of Consumption in their town, that now no other cough web cine could be said there; that it had reised sense as if fine the grave—some that physicians and all the friends said must die. One gentleman, in particular, was so far gos that his physician told him it was useless to take any more medicine. He then, when so hope was left, began to take any for the said as the grave was.

Boctors could give no Help.

Mr. Wim D. Jennings, a merchant at Pierpont Creen, Ashinbuls co. Obio, wrote to us, October 24, 1648, and assed a cure of Consumerion which the use of Barrie is nian Pousionary Balsam had effected in Mr. Williss Crocket of am adjoining town. Mr. Crocket had sought blef from the best physicians and numerous medicines, but found none, for the falsh hand of that unrelenting monater Consumption, had taken fast hold on his vitals, and was a destroying and debilitating his body that he was a sent skeletom. He was given up by his physician, and all friesds as one with would som takebit a grave. But even in this last extremity strange and marvellous as it may seem, yet it is true that the use of only feet sentes of Balsam and restored Mr. Crocket to health, and he is now a tealtrate, Hearty, success with.

BLEEDING AT THE LUNGS. Doctors could give no Help.

BLEEDING AT THE LUNGS. Mr. W. Chapman, merchant, Middlebury, state of Vermont, stated to us that his son was afflicted with slessing of the large, and after all other remedies failed, and his physicians soid his would die, he made use of Mrant's latins for monary Raissin, which soon restored him to health. SHE COULD NOT SLEEP IN BED.

Mr. James Ivins, a merchant and miller of Kirkland, lale Co., Ohio, wrote, slept. 18th, 18th, that Brank's Pulmonain' Barkan was effecting some astonishing cures in that vicis ity; one case in particular, was the wife of his head miller. She had been diseased for fourteen years, and her bushens had spent almost all his earnings in paying doctors, and is trying all kinds of medicines but to no purpose. She had not laid or slept in her bed for several years, in consequence of her disease; but now atter luing a few battles of her in the could be and enjoy sleep in her bid as well as ever she could.

FEMALE WEAKNESSES AND COMPLAINTS No remedy offered to the public has ever been hely a certain and effectual in restering ALL the local continues and cregularities of the acz, as Brant's Polmonary Baltam. In making no difference whether the derangement of supercassion, crease, or other weakness—it, REGULATES ALL, by attentihening the system, equalizing the circulation, and SOOTHING and ALLIAYING MERVOUS IRRITABILE.

CHANGE OF LIFE. From the Girl to the Wesses, and the Wesses at mills age—the one case is accelerated, and the other so graduly suppressed, as to prevent any of the fatel discuss that frequently arise in consequence of such change.

Nervous Diseases and Derangements Cared without fall DYSENTERY and SUMMER COM-PLAINT, in children and adults—and CHOLERA INFANTUM.

No mother need ever mourn, the death of her child by Cholera infantam; while secthing, if ERANTIS PUL-MONARY, BALEAM be administered. It should for such cases, given in larger than the ordinary sloss. Agents ABEL TURRELL Montrose; B Ruratt, New Milford; Smiley & Curtis, E. Gibson; T. P.
