en AGRICULTURAL

MONTROSE, FEBRUARY 13, 1851.

Interesting Agricultural Experiments. Some recent experiments in wheat and flour go to prove that both contain water, and that the quantity is more in cold countries than warm. In Alsace, from 16 to 20 per cent. In England from 14 to 17 per cent. In the United States, from 12 to 14 per cent. In Africa and Sicily, from 9 to 11 per cent. This accounts for the fact that the same weight of-Southern flour yields more bread than the Northern. English wheat yields 13 pounds more to the quarter than the Scotch. Alabama flour it is said, vields 20 per ceut. more than Cincinnati. And in general, American flour, according to the autharity of one of the most extensive London bakers, absorbs 8 or 10 per cent, more of its. own weight of water in being made into bread than the English. The warmer the country the more is the water dried out of the grain before it ripens, and hence when were necessary to the proper advancement made into bread, it absorbs more water again, and is therefore more valuable. Professor Beck has written a report for the Patent Office, in which he shows that the presence of water unfits these articles for preservation. The books of a single inspector in New York city showed that in 1847 he inspected 218.679 barrels sour and musty flour. In his opinion, the loss on these was \$250,000. Every year the total loss in the United States from moisture in wheat and flour is estimated at from \$3,000,000 to \$5,--000,000 ! To remedy this great evil, the grain should be well ripened before harvesting and well dried before being put in a granary. Kiln dried is preferable. The mode of ascertaining the amount of water is this :---Take a small sample, say five ounces, and weigh it carefully. Put it in a dry vessel, which should be heated by boiling water. "After six or seven hours weigh 'it carefully until it loses no more weight. Its loss of weight shows the original amount of water.

California Hens.

The Rev. Walter Colton, the late Alcade to Monterey, finding it difficult to procure eggs when required either for love or money. bought some hens. We give the description of them :

"I nurchased six hens of an Indian woman for six dollars, and a rooster for fifty cents. On asking the woman why she charged only half price for the rooster, she replied that the fellow laid no eggs, and as for his crowing that did nobody any good. Soun-der reasons than these could not be furnishrd in a much higher place than a hen coop. The habits of these hens are a little singular. They are perfectly tame, and are as much at and independence and all that promotes the home in the kitchen as the coop. They cause is worthy the fostering of every good never trouble themselves much about a nest but deposit their eggs where they find it most convenient, one makes a tea-tray, another the ironing table a third the oven, and there is one that gets into the cradle. She is not at all disturbed by the tossing of the little fellow, on whose premises she is intruding. Neither she or any of her feathered sisters cackle when they leave a nest. They don't seem to think that anything worth making an ado about has come to pass. The rooster it is true picks up a little, and perhaps feels a feather taller. But this is the vanity of his sex. There are a great many who crow over what others have done."

Good rules and Good Management. One the best farmers in the State of New York, has the following rules agreed to and signed by every man lie hires.

It is expected that all persons employed on the farm of _____, will carefully at-tend to the following system : Regularity in hours. Ponctuality in cleaning and putting away

REMARKS OF J. R. INGERSOLL. At the State Agricultural Convention. J. R. Ingersoll said the elements of good

more completely abounded in Pennsylvania ban in any other State—and has been allowed to lie dormant for many years. We should be true to ourselves, and others would be true to us. A more visible departure from mere party lines has never been seen, than was then witnessed in the Governor's message, in recommending the agricultural interests of the State to the Legislature which recommendation be firmly believed had called this convention together. The cheapest and best things are to be obtained in Pennvlvania. (Mr. Ingersoll instanced several facts to prove his assertion.) Pennsylvania only wants encouragement to develope her resources; and let us give her that encouragement in the great department of Agriculture. The Franklin Institute has done more good to the cause of science than all the mere individuals who had assembled from the deluge to the present day. Societies of agriculture. The Royal Society of London was the most celebrated one in the world ; in Constantinople even, they had set us the example of the importance of organization ; in South Carolina they had such a society, which has done vast good in that state; the society of Massachusetts had been a most excellent one in every respect; State agricultural societies in New York, in Maryland, in Virginia, had all been established. and are now in existence, giving assistance and power, and hope and perfection to the county societies scattered over those varions States. The experience of those States has shown us the importance of State Societics to co-operate with the smaller county organizations. The National Institute is essentially a domestic, United States Government Institution ; but it has languished for several years simply because of the want of an appropriation such as is now asked of this state the State Institution. The Massachusetts State Society has thought proper to de-

vote their funds chiefly to the importation of the best breeds of cattle from abroad; and it thereby reaches results much more important and desirable than could possibly be at-tained by individual means. Mr. I. would have the agents of this society penetrate the forests of Europe, the sierras of Spain, see the agriculture of England, of France, and of Turkey. He would have them bring home the treasures of every nations experience, which should shed a brilliant light upon the agricultural productions of this country. The farmers of Pennsylvania are modes beyond their necessities, and ought to be bold in proportion to their means. Agriculture is the essential growth of virtue, and wealth government, Mr. Ingersoll concluded with a most cloquent appeal to earnest and unti-

ring efforts in behalf of Agriculture.

Beware of any course of life or study which ins a tendency to harden your hearts, and deaden the delicate sensibility of the soul to moral truth and to moral heanty; for although you may receive a momentary pleasure thereby it will be by the sacrificing of those guards which form your only shield from moral destruction.

To prevent rats from eating Harness Sprinkle salt on the sills, plates, or other places, which they may frequent, and they will never disturb your harness. It is the salt which collects on the leather from the sweat which they seek. This information is worth at least a years subscription to every farmer who was not aware of the fact.-Lewisburg Chronicle.

NEW GOODS.

Abel Turrell Abel Turrell TS now receiving his Fall and Winter supply of Goods (embracing nearly every thing wanted in this market,) which will be sold extremely LO W for cash or ready pay. My assortment may be classed in part as follows: Drugs, Medicines, chemicals, Paints, Oils, Dye Stuffs, Groceries, Dry Goods, Hardware, Stone Ware, Glass ware, clocks, Watches, Jewelry, Sil-ver Spoons, Spectneles, musical Instituinants, Lig-uors, Perfamery, Mirrors, Stationery, Brushes, Shocs, Yankee Notions, dc. dc. Thankful for the liberal patronage and substan-tial encouragement hitherto received. I hope to mer-

tial encouragement hitherto received, I hope to mer-it and receive a continuance of the same. A few of the articles kept for sale are named

below : Groceries. A good variety of Sugars, fine fla-vored Teas, good and cheap Molasses, collee, Pepper, Spice, Ginger, Saleratus, Raisins, Rice, Mack-erel, Codfish, Zantee currants, Tapioca, Arrow Root, mace, Manna, Sage, Nutmegs, cloves, Ground Mus-tard; also, Mustard Sced, white and black. Ext. non, cassia, Soda, Soda crackers, Starch, Bar and castile Suap, candles, all sorts of Tobacco and

Snuff, Vinegar, &c. &c. Dry Goods. THE RICHEST MINE .- Besides lime, and other enriching substances, the cost of the mere animal manures applied to the soil of England, amounts to three hundred millions of dollars : being more than the whole value of its foreign commerce. Yet the grateful soil yields with interest all that is thus lavislied upon it. And so it would do here, if we would only trust the earth with any portion of our capital. But this we rarely do. A farmer who has made money spends it J. LYONS & SON-Dealers in Dry Goods, not in his business, but in some other occupation. He buys more land when he ought to buy more manure ; or he puts out his money in some joint stock company, to convert sunshine into moonshine ; or he buys shares in some gold mine or lead mine. Rely upon it, our richest mine is the barn vard, and whatever temptations stock or shares may offer, the best investment for a farmer, is live stock, and plowshares.

The Washington Monument has reached the height of eighty feet above the surface. thirty eight feet of which have been raised during the past year.

The good farmer wears russet clothes, but | tools, chemical powder for raizor-strops, key makes golden payments, having tin in his etc. etc. buttons, and silver in his pockets. In his house lie is bountiful, both to strangers and poor people. He seldom goes far abroad,

and his credit stretcheth farther than his travel. We disbelieve in farmers who will not im-

rove-in farms that grow poor every year -farmers boys turning into clerks and merchants-in farmers ashamed of their vocation. -Suffolk Democrat.

Doctors could give no Malp.

IFOCTOTS COULD GIVE NO INCLOSE Mr. Wm. D. Jenninge, a merchant at Pierrowi Antabula co. Ohio, wróte to us. October 8d. 1849, and etas ed a cure of CANSUNFTION which the use of BRANT'S 12-DIAR PULMONARY HALSAN had effected in Bir. Willow Crockes of an adjoining town. Mr. Crocket had sought re-lief from the best physician's and numerous inedictore, hat found noue, for the faid hand of that unrelenting moneser Cosmoption, had taken fast hold on his vizia, and wit say destroying and dealitisting his body that its wars a mere skelton. He was given up by his physician, and all freude as one who would soon is hold a prove. Fut even in Mits hat extremity, stronge and marrellous as it may seem, yet it is true, that the use of only for bothes of BRANT'S 1981 as FOLMORARY BAISAN has unclinedied the hand of the destroymer, and restored Mr. Crocket to health, and he fr now a HEALTUP, HEARTY, BLOOD MAN.

BLEEDING AT THE LUNGS.

Mr. W. Chapman, merchant, Middlebury, state of Ver-mont, stated to us that his son was filleted with Meeding va-the lungs, and silve oll other remedies failed, and his physi-cians said he world site, he made use of Breat's lasten Tud-monary Balson, which noon vertex, him to health.

SHE COULD NOT SLEEP IN BED:

Mr. Januel Vina, a morchant und miller of Nirkind, Lake Co. Chilo, wrois, Sept. 18th, 18th, thue Mr. The Analysis of the Sept. Balaan was effecting some estenisblug cures in that they had agont almost all his carnings in puying dectors, and in trying all kinds of medicines but to no purpose. She had trying all kinds of medicines but to no purpose. She had trying all kinds of medicines but to no purpose. She had trying all kinds of medicines but to no purpose. She had trying all kinds of medicines but to no purpose. She had trying all kinds of medicines but to no purpose. She had trying all kinds of medicines but to no purpose. The operative of her disease; but now alter using a frag battles of Brasts Pulmanary Halam, the scould lie and asjoy steps in her bad as well as ever aim could.

FEMALE WEAKNESSES AND COMPLAINTS. No remedy officred to the public has ever been half an ertain and effectual in restoring ALL the incidental weak-messes and irregularities of the sex, as BRANT'S PULNOSANT BALSAN. Is makes no difference whicher the derangement be suppression, excess, or other weakness-it REGULATES. ALL, by strengthening the system, equalizing the circulation, and SOOTHING and ALLAYING NERVOUS IRRITABIL-ITY. See Pamphlets.

CHANGE OF LIFE. From the Girl to the Womm, and the Womm at million age-the one case is accelerated and the other so predeaby suppressed, as to prevent any of the faid discase that the quently arise in consequence of such change.

Nervous Discuses and Derangements Cared without fail. DYSENTERY and SUMMER COLL.

CHOLERA INFANTUM No mother need ever mourn the death of her child by Cholera Infantum, while toething, if BRANT'S PUL MONARY BALSAM bo administered. It should be for such cases, given in larger than the ordinary doese.
