

AGRICULTURAL.

MONTROSE, FEBRUARY 27, 1851.

Common Salt as a Fertilizer.

I noticed a remark, in a late number of the Farmer, on this subject, I wish to offer the following remarks:

For the superior growth of vegetables, various substances are necessary. It is not enough that most of vegetables have carbon, oxygen, hydrogen and nitrogen—the four grand constituents in their composition. I know that these are often called essential, and that some others are spoken of as accidental or at least not necessary to the perfection of vegetable matter. It seems to me that this is a loose mode of expression, and that the implied notion needs qualification. Thus, chemistry shows that sulphur and phosphorus are essential to the existence of the fibre and albumen of animals, the former being the substance of muscle and the latter of nerve. Lixivio, and others, have proved that vegetable fibre and albumen have the same composition as the animal; and hence it is the necessary inference, that animals obtain these substances ready formed from their food, either animal or vegetable. The vegetable world sustains a direct importance to the animal, in the production of these great vegetable substances, which become by the process of digestion and nutrition and assimilation, the most necessary of animal compounds. The same remark is true of casein, which is an important portion of milk, and abounds in cheese.

THE FROZEN VEGETABLES.—Frozen vegetables, fruits, &c., may be thawed in such a manner that they will receive but very little injury from freezing and thawing.—If the frozen substances be immersed in cold water, whose temperature is but little above that of freezing, the frost will soon be extracted without injury. If frozen vegetables be covered up in the ground, or closely covered with moss, cloths, mats, &c., and laid in a dark cellar, the frost will be gradually extracted without material injury to the article.

By these modes of thawing, the change is gradual; hence it has but little effect. But if a frozen vegetable or fruit be put into warm or hot water, or carried to a warm room, or placed by a fire, the sudden change from a frozen to a thawed state will destroy it as completely as though it had been baked or boiled. Thus it appears that the thawing, rather than the freezing destroys the vegetable.—N. E. Farmer.

SEEDS AND SCIONS.—The farmer and gardener will find the winter a favorable season to look up and procure seeds and scions for use in the spring. When the hurry of planting comes, but little chance will be afforded for making selections of this nature, and he will oftentimes be compelled to use those of a poor kind or of an imperfect quality—a contingency which every good farmer will anxiously wish to avoid. By a little attention now, this event may be avoided. Scions cut at this season may be preserved in damp moss or sand in the cellar, till the period for setting them arrives in the Spring.

SOLAR PHENOMENON.—One day last month the people of St. Paul, Minnesota, witnessed a superb solar exhibition. From sunrise to sunset, three suns of equal brightness, and too dazzling for the naked eye, apparently arose at once in the horizon, and the ground being covered with snow poured forth a deluge of light far more intense than is usually witnessed.

It requires 3500 sheep to be kept a whole year to support the Lawrence, Mass. Mills with wool for one single day. They produce 1500 shawls per day, and consume Cochineal to the value of \$50,000 per annum.—Three years since there was not 5000 inhabitants in Lawrence and now there are 10,000.

Lay it down as a rule never to smile nor in any way show approval nor merriment, at any trait in a child which you should not wish to grow with his growth, and strengthen with his strength.

To promote the health of Stock. Mix occasionally one part of salt with four parts of wood ashes, and give the mixture to different kinds of stock, summer and winter. It promotes their appetite, and tends to keep them in a healthy condition. It is said to be good against bots in horses, murrain in cattle and Pot in sheep.

Horsedraft root is valuable for cattle. It breaks an appetite and is good for various diseases. Some give it to any animal that is unwell. It is good for oxen troubled with the heat. If animals will not eat it voluntarily cut it up fine and mix it with potatoes or meal.

Read all animals regularly. They not only look for their food at the usual time, but the stomach indicates the want at the stated period. Therefore, feed morning, noon, and evening, as near the same time as possible. Guard against the wide and injurious extension of fattening with excess and starving with want. Food should be of a suitable quality, and proportioned to the growth and fattening of animals to their production in young and milk, and to their labor or exercise. Animals that labor need far more food and that which is more nutritious than those that are idle.

Guard all descriptions of stock against cold and exposure, especially against cold storms of rain, sleet and damp snow, and a substituting out on the cold ground in nights in the spring and fall.

In a dry time, see that animals have a good supply of pure water. When the fountains are low, they drink the drainings of fountains, streams, and passages of water which are unwholesome.

If pens and stables are very tight and warm ventilate in mild weather even in winter.

In feeding animals on apples or roots, begin with a small quantity and gradually increase it. It would be better to have all changes of food made gradually, when there

is material difference in the nature of the food: as from hay to grass, and the reverse; from much fodder to much grain, and the reverse.—American Veterinarian.

Effects of food on Milk.

Mr. Editor:—Your correspondent, Mr. Weeks wishes to know how to prevent milk tasting of turnips, &c., when cows are fed on them. That the food of cows has an influence on their milk and butter must be conceded. I have known oxen brought from the interior, and on eating freely of salt hay, made the very best of beef. A full and sudden change of food will affect both milk and beef, while a gradual change will not effect on either.

I once fattened a young cow on cabbage. I was told that the beef would taste of the food. A few days previous to slaughtering I fed her on hay, potatoes, and a little Indian meal. The beef was excellent.

A cow or horse may eat any quantity of apples or potatoes, with other food if gradually accustomed to them. But if freely fed on these articles at once they would be ruinous.

By milking cows, and then feeding with turnips, &c., so that they may eat of them as long as possible before milking, there will be less influence of the food on the milk.—The free use of salt on roots fed to cows, will in some measure prevent unpleasant taste in the milk.—N. E. Farmer.

THE FROZEN VEGETABLES.—Frozen vegetables, fruits, &c., may be thawed in such a manner that they will receive but very little injury from freezing and thawing.—If the frozen substances be immersed in cold water, whose temperature is but little above that of freezing, the frost will soon be extracted without injury. If frozen vegetables be covered up in the ground, or closely covered with moss, cloths, mats, &c., and laid in a dark cellar, the frost will be gradually extracted without material injury to the article.

By these modes of thawing, the change is gradual; hence it has but little effect. But if a frozen vegetable or fruit be put into warm or hot water, or carried to a warm room, or placed by a fire, the sudden change from a frozen to a thawed state will destroy it as completely as though it had been baked or boiled. Thus it appears that the thawing, rather than the freezing destroys the vegetable.—N. E. Farmer.

SEEDS AND SCIONS.—The farmer and gardener will find the winter a favorable season to look up and procure seeds and scions for use in the spring. When the hurry of planting comes, but little chance will be afforded for making selections of this nature, and he will oftentimes be compelled to use those of a poor kind or of an imperfect quality—a contingency which every good farmer will anxiously wish to avoid. By a little attention now, this event may be avoided. Scions cut at this season may be preserved in damp moss or sand in the cellar, till the period for setting them arrives in the Spring.

"MEDICAL CARD."

DOCT. PATRICK finds, on examining into the state of financial affairs, a necessity as he believes, for calling on those who are indebted, for a settlement; and although he disclaims any intention of being hasty or inconsiderate, he would beg leave to suggest in the most delicate manner possible to those whose accounts have been standing from three to ten years, the propriety of making some payment, before their available funds have been otherwise appropriated, or exhausted upon the various luxuries of the day. Nov. 7, 46:24:1.

Notice to the Public.

New Seasonable, Full and Wide Goods, at the Great One Price Store. L. S. LENHEIM, GREAT BEND, PA.

BEES leave to take this opportunity of tendering his sincere thanks to his Friends and Customers, for the generous patronage they have extended to him, and at the same time inform them that he has just returned from New York with a large and choice selection of FANCY AND STAPLE DRY GOODS, also a fresh and extensive assortment of Groceries, Provisions, Boots & Shoes, Hats & Caps, Hardware, Crockery, Drugs & Medicines, &c., &c., which will be sold for cash or produce at a very small advance, and prices which defy all competition. Flour, Pork, Fish & Salt, at wholesale and retail. He would also remark that he adheres strictly to the system of always naming the lowest price at first, thereby giving the same advantage to all who may favor him with their patronage.

GREAT BEND CLOTHING STORE.

The largest, best and cheapest assortment of READY MADE CLOTHING in the Village of Great Bend. Cloths, Cassimers and Vestings, of all qualities, suitable for the fall and winter trade, which we offer at such prices as to satisfy any one that this is the place for them to deal.

In consequence of the great increase of his business he has been obliged to greatly enlarge his stock, which he now offers to his friends and the public for examination, confident that in so doing they will find something to their advantage. He has also made arrangements to manufacture clothing in all its various branches, to bear inspection. Custom work and cutting done in the latest style and short notice. All kinds of Tailor trimmings furnished and for sale.

Don't forget the place. Store nearly opposite the Mansion House. L. S. LENHEIM, Great Bend, Sept. 25, 1850. 39:1f.

TO BOUNTY LAND CLAIMANTS.

THE undersigned has been appointed by the Commissioners of Susquehanna county, Agent for the said county, in pursuance of the recommendation of the Pension Department at Washington, to supervise the preparation of the application and proofs of Claimants for Bounty Lands, which have been appropriated to all classes of officers and soldiers who have served one month and upwards, in any of the wars in which our country has been engaged. He has been furnished from the Department with a full and complete set of the necessary forms of application, proofs, &c. All therefore, who have claims to Bounty Lands, by application to him, at his office, in Montrose, either by letter or in person, can have their business arranged with promptitude. J. H. DIMOCK, Montrose, Nov. 7, 1850.

Sole Leather.

ISAAC L. POST, Sole Agent for the sale of Messrs. E. A. & O. Brown's celebrated sole leather, a superior article on hand constantly at New York City prices. We can sell Sole Leather from one to one thousand pairs at prices altogether unheard of in Susquehanna County. Dealers will find it to their interest to call on us. Oct. 1.

ESTRAGED.

CAME into the enclosure of the subscriber on or about the 25th of August last, a red, two years old heifer. The owner is requested to prove property, pay charges and take her away. JOHN TRUMBULL, Bridgewater, Oct. 2, 1850. 40:3w

Wagon Maker Wanted.

WANTED by the subscriber, a good Wagon Maker to manage the business at the well known stand in Wyalusing. A man with a small family is desired, one making himself useful will find employment for several years. References will be required. EDWIN LEWIS, Wyalusing, Sept. 18, 1850.

Life Insurance.

United States Life Insurance, Annuity and Trust Company of Philadelphia;—Charter Perpetual CAPITAL—\$250,000.

B. S. BENTLEY, Agent for said Company.

Insurance will receive applications for and give all necessary information to any persons desiring to make application. Montrose, Oct. 16th, 1850.

Stationery.—Foot-caps and Letter Paper, Quills, Black and Ink, Envelopes, Washers and stamps, sealing Wax and seals, Gold and steel Pens, Pen Holders, Pocket and Table Ink-stands, Goggles & Friendship cards, Pencils, slates, Water color, &c.

Boots, shoes, whips, candle Wick, Twine, shoe Thread, Bells, spoon stands, Whale Bone, shoe Pins, Trays, candlesticks, Lamps, Oil Blacking, sponges, Princes Polish for scouring, Rotten stone and Bath Brick for same, Black Lead, Patent Pails, Tubs, clothes Pins, Half Bushels, Ax-helves, crucibles, candy, Hemlock Gum, window ash, Ploughs, &c. &c.

Drugs and Medicines.—Turkey gum opium, rad, and pulv. genuine turkey opium, cast India rad, morphia sulphas and aceta, veratrin, atrychnia, potass hydriod, creosote, red and white precipitate, sulfate de quinine, calcined magnesia, Russian castor, red oxide of iron, nax vomica, leucoria, carb, iron, gamboge, turkey gum myrrh, sulphate potass, colobal, cera alba, colocyth, gum mastich, cal rad, tart. emetic, rad and pulv; Oria, oxalic acid, rad and pulv, columb. sulphate of zinc, saffron blood-soms, prepared chalk, calcium acid, coriander seed, dust, gum kino, truce, scammonium, floe, zinc, corrosive sublimate, calamine lapna, fos. Martiales, french chalk, bismuth subnit, antim, sulphur aurat, dovers powder, fos benzoin, arsenic, castor oil, tumeric, sem fenigeeck, bayberry bark, rochell, sep, gum and glauber salts, senna, pink root, salts of ni-cel, (pelt) wormseed, pulv; galls allepo; refined gum camphor, rad ginger, african and american cayenne, pulv; cubeba, pulv; cantharis, golden seal, cream of tartar, tart. acid, amp carb soda, sal-so-lia, jalapa, ipecacuanha, aunes seed, tang glass, guaiacum bark, pulv; orange peel, white glass, arabic squilla, diltir, vitriol, unguentum, balsam of fir, vesic. turpentine, hyoscyb talow, virginia snake root, mal ammoniac, awoyer bag, spermoceti, blood root, juniper Berries, rasped quass, gum benzoin, dragon's blood, pyra, chamomile flowers, gum elem, gum aloes, gum fetida, gum ammoniac, hyop, vesica snake root, rad valerian, eng and dith

orange peel and down, capsella alba, radised basia, ura, ura, nut galla, gum tragacanth, rad Getitum gum guaiac, gum galbanum, india, cockle, dyachlam salve, emp. cantharis, dry veridigris, crude or black antimony, elm bark, (ground and unground) prickly ash bark, fol, digitalis, hore-hound, white belladonna, carb. magnesia, lyttam, sem cholochium, iceland moss, rad saponite, gold thread, crocus martius, savin leaves, hoadias sarsaparilla root, blue pill mass adhesive plaster, crocus oil, Tannin, Buchu Leaves, Figs, Genuing cod Liver Oil, nitrate of Iron, etc.

Extracts of gentian, conium, belladonna, henbane, dandelion, deadly night shade, thorn apple, colocyth, comp; &c.

Essential Oils.—oil of peppermint, lemon, cinnamon, Tansy; wintergreen, sassafras, origanum, lavender, hemlock, cloves, bergamot, aune, cedar, wood, Juniper, rosemary, amber, caraway, cummin, savin, cajuput, spruce, tar, cubeba, &c., and all the essences from the above oils.

Tinctures.—tinct. rhubarb, myrrh, cantharis, carium, gnic, digitalis, tolu, iodine, cayenne; curiaria tincture of iron, &c.

Laudanum, paregoric, Hives' syrup, chloroform, colodion or liquid adhesive plaster, spirits of nitre dote, aqua ammonia, sulphuric ether, spirits of Lavender, comp., salts of tartar, antimonial wine, oil of spike, balsam capiva, brimstone sulphur, pulv charcoal, quicksilver, demijon, bottle and vial corks, etc.

In short, a whole newspaper might be filled in the vain attempt to enumerate the one half of the articles kept for sale at TURRELL'S. This is the right place to buy Goods, and to buy them cheap.—The best kind of Drugs are kept here, and from the variety and quality of them, great inducements are offered Physicians to make it their place of regular purchase. The public generally are invited to call and examine the quality of our Goods.

October, 1850.] ABEL TURRELL.

Valuable Property for Sale.

THE following Real and Personal Estate, as hereinafter described, situate in New Milford, Susquehanna County, Pennsylvania, will be sold at a great bargain to any one who may choose to purchase. The real estate consists of seven hundred acres, five hundred of which are under improvement, and on which are four dwelling houses and a barn. The farm is well designed for a Dairy, and is capable of feeding one hundred Cows during summer and winter, and every part of it well watered with springs and streams. The buildings and land are in good condition, and on the premises are about five miles of good Stone Wall, and the other fences are also good, and on the wood land are large quantities of Chestnut Timber, which will supply the farm for many years to come, and which will also be valuable for building the Railroad which is soon to be very pleasant and desirable location about seven miles from Great Bend, through the New York & Erie Railroad passes, and about one mile from the probable Depot on the Martins Creek Railroad, which will lead from the Luckawanna Canal and Iron Mines to intersect the New York & Erie Railroad at the Great Bend. It can be very advantageously divided into five farms, on four of which would be the necessary Dwellings and Out-houses, Fruit Trees, &c.

With the above will be sold a very large stock of Cattle, Horses, &c., including Durham Cows, Working Oxen and young Cattle, and also all necessary implements of husbandry for carrying on said farm or farms.

The Terms of Sale will be as follows:—One-fourth of the purchase money for the Real estate will be required at the time of purchase, and for Stock, Farming Utensils, &c., half down and the residue to be paid in equal annual instalments, with interest annually on the whole sum unpaid, to be computed from the full delivery of possession, the first instalment payable in three years from the delivery of possession, and the whole amount to be paid within ten years from the sale, to be secured by Bond and Mortgage. Full possession to be given on the first day of April, 1851, with the privilege of putting in crops next Fall if desired. A good and indisputable title given.

The above described property belongs to the estate of S. MEYLER, late of said county, deceased, and a more desirable property has not at any time, in this section of country, been offered for sale, and no greater inducements offered to purchasers. Persons wishing to invest money in Real Estate and in good Stock, cannot do better than to call and examine for themselves. Other tracts or lots of land lying in said county, are also offered for sale. Applications can be made to M. Meyler at New Milford, or to B. S. Bentley at Montrose, in said county, and any further particulars that may be required will be given.

MICHAEL MEYLER, Executors of S. MEYLER, late of said county, deceased, and a more desirable property has not at any time, in this section of country, been offered for sale, and no greater inducements offered to purchasers.
