They have one distinct so striking was the difference of the five rows family, the Morgan descended from a little and the remainder of the field."

and we have known farmers use it liberally, years and is as distinguished among them as on their lands as manure, particularly on old Archy in Virginia. steep for corn, under the popular presumpti the above was Sherman Morgano Hardwick, of the crows would be less frequent and fatal. Bradford, Vermont. Steeps for seeds are now quite commonly ducts the farmer can raise, if a solution of n: beautiful trotting mare Mountain Sylph, feathered rascal, the crow, while, at the same of the noted trotoing horses of that daytime, is acts efficiently as a healthy and 11- Americus, Cato. Baker, Julieta, Buckskin, it is to these small, matters that the farmer ning $\uparrow 1-2$ minutes. is indebted for his success. Without attendmantown Telegraph.

Corn Planting.

As the time for Planting corn is now drawing near, we take leave to sav to our procure elsewhere, to manure with,

of any improvement to be undertaken. If hanna county. the land be sandy, 10 loads of clay, made into compost with 10 loads of farm manure will do more good than twenty of the latter. alone .--- Marsh mud, river mud and muck, woods mould, pine shatters, ditch scrapings, . de, composted with lime, marble or ashes, make a reliable manure ; but a bushel of plaster, 10 bushels of pulverized charcoal, or 4 bushels of salt should be mixed with every 20 loads. Manure thus treated, is worth inore than double what other manure is, where no mixer may have been used. A few bushels of bone dust mixed with manure allotted for an acre, adds much to its value. - Whitewashing.

To the Breeders of Good Horses.

The celebrated Horse. Green Mountain Morgan, has been obtained at great pains and

expense, with a view to the improvement of the Stock of Road Horses in Northern Pennome years since, published an account of an sylvania; for all who liave been conversant periment made by Mr. Hart Mussey, of with the subject, will grant that in nearly eveeded as he expected, but there were other er horses in our country, it is hoped that esuits more important, if possible, which he self interest, at least, will prompt the owners

Nitre is by no means an expensive article, races. This family has been cherished for Canadian, famous too, for running quarter

those cultivated in grass and grain ; also as a The three most noted stock-horses got by

Farms for Sale. THE SUBSCRIBER WILL ACT as Agent

As the time is now at hand for whitewashing on a large scale, we will give a receipt which is the best known for outhouses. Take half a bushel of good unslacked lime, slack it in boiling water and keep it covered during the slacking process. Strain the liquid through a seive, and add a peck of clean sait dissolved in warm water, add three pounds of boiled rice or wheat paste, and half a pound of dissolved glue. Add five gallons of water to this mixture, and it is best to put it on hot, but in that case use only old brushes, or make allowance for the spoiling of them.

It has been found that our dry winds bite off, as it were, more of the whitewash than do rains. The salt is to obviate this evil.-For whitewashing the interior of dwellings, do not use any salt, as it absorbs moisture, wand to the above line, add about two pounds 1 of Spanish whiting. It makes the white more clear looking if a little indigo is squeezed through a cloth amongst it. Amougst the lime, Spanish brown or ochre may be stirred to make a colored lime paint. The sulphate of iron (copperas) makes a buff color: the sulphate of copper, (blue vitrol,) bluish color. -Scientific American.

A correspondent of the Albany Cultivafor relates the following experiment with SEED COBN :....

The seed was soaked in a decoction of a pound of tobacco in four gallons of water .---There were plenty of worms in the ground, as I found in planting and hoeing ; but they would not touch the tobacco-sented corn, while there was not a weed to be found and indeed they did no small benefit in destroying the grass and weeds. The field was kept as clear of everything but corn as it well ould be. At the first hoeing I observed a

re mullen plant, the leaves of which were through like a riddle, and upon dig-around it I found over twenty cur-
