VOLUME IX of the SCIENTIFIC AMERICAN commences the 17th of September. Self-sharpening

YANKEE FEED CUTTERS.

THIS Cutter is superior to any now in use, for strength, durability and simplicity of construction; it cuts faster, and is the only self-sharpening Hay, Straw, and Corn Stalk Cutter ever made. It has but *one straight knife*, which any person can grind and set with ease; but in ordinary cases is ground in the machine. Thousands have already been sold, and the demand is daily increasing. In most cases an examination is sufficient to convince one of its superiority. No one after a short trial would part with it for any other.
