Reports on Winter and Spring Wheat, Oats, Buckwheat and Corn, to be made at the Fair. Competitors on Corn are requested to notify the Judges at least three weeks before the Fair. They are to decide the quantity and quality raised per acre.

Persons competing for premiums on grain, are requested to have the ground measured and the quantity properly certified. It is also desirable that an account be kept of the quantity of corn stalks raised per acre, their value per ton, and, for the information of others, a statement of the best mode of curing and feeding them. It is time farmers counted the cost of their products with a view to find out whether more cannot be produced upon the same ground with the same amount of labor, and for this purpose, the Committee would propose the following questions to the farmers of the county hoping to receive written answers from as many as possible.

1st. How much Hay have you cut the present season?

2d. What is its cost per ton in the barn, counting all the labor and manure used upon it, and the interest on the value of the land; also whether the land is deteriorated or enhanced in value from the crop taken off?

3d. How much Corn, Wheat, Oats and Potatoes have you raised?

4. That is the cost of each of the latter per bushel, estimated in the same way, including the cost of getting in the crops, also the kind of ground used—whether fallow, greensward, or ploughed land?

Hereafter no animal or article will be allowed to take the first premium more than once, but at any subsequent exhibition, where from its merit it would be entitled to the same premium again, a *certificate* to that effect shall be awarded, and the money premiums shall go to the other competitors.

The increased interest of the community in the Society, leads the Committee to believe that the Fair on the coming fall will far exceed any previous one in the quantity as well as the quality of the products and animal exhibition.

DAIRYMEN, TAKE NOTICE!

THE subscribers having secured the sole right to *DAVIS' ADJUSTABLE CHURN AND BUTTER-WORKER*, for Susquehanna and several adjoining counties, respectfully invite all Butter makers to examine and test the merits of this new and valuable invention. We propose to furnish each and all of you with a Churn that will produce as much butter in as short a time as any other churn—one that will *completely expel the buttermilk, wash and work in the salt, diffusing it perfectly through the butter* and fit it for use, without removing it from the churn. This Churn is simple in its construction, scientific in its operation, and easily cleaned and kept in order, and can be easily attached to any propelling power.

For further particulars apply personally or by letter to JAS. C. BUSHNELL and J. N. BROSSON, Ararat, Susquehanna county, Pa.
