HENS EATING THEIR EGGS.—Pen your fowls up for fattening as soon as you please after they have once commenced eating their eggs. There is no cure for them. We speak from experience, says the editor of the Boston and South Guardian. Two years ago our entire ornithological establishment, consisting of a dozen Dorkings, was condemned manner. We feared we had taught their ways, each satisfied with what he had the fowls habits of cannibalism by giving them the shells of their own eggs to cat. We tried mild curatives at first. We gave them boiled eggs, scalding hot, and after a first taste they cooled their bills in the gravel, turned the egg over and over a few times with their feet, and then, when it was ready for eating, fought and scratched over the dainty morsel and swallowed it before our eyes. The cock erel, who, as a father of a family ought to have known better and set a good example. strutted about as if he highly approved the transaction, and occasionally selected a dainty morsel of the yolk for himself, thus becoming worse than an accomplice in the infanti-" cide. After this we adopted another expedient. We got an egg blown, and filled the shell with a composition of mustard, vinegar, aloes, salts, and other horrible associations. The fowls got one good dose and ran up and and to injure me; from which designs I have heads with an expression of intense disgust, by refusing to open correspondence forwardwhich was very ludicrous to witness. FAMILY PHYSIC. THERE has long existed a public demand for an et. Glassa Bonnet Bearing and perfect in its operation. This has been An wool Delaines, prepared to meet that demand, and an extensive tri-al of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all nilla—one which should have none of the objections, but all the advantages, of every other.—
This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto—that lmost every purgative medicine is acrimonious and irritating to the bowels. This is not. Many of them produce so much griping pain and revulsion in the sistem as to more than counterbalance the good to be derived from them. These pills produce no irritation or pain, unless it arise from a previously existing obstruction or derangement in the bowels. Being pure-ly vegetable, no harm can arise from their use in anh quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the box. Among the complaints which have been speedily cured by them, we may mention Liver Complaint, in its various forms of Jaundice, Indigestion, Languor and Loss of Appetite, Listlesness, Irritability, Bilious Headache, Bilious Fever, Fever and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an apprient, they afford prompt and sure relief in Cositiveness, Piles, Cholic, Dysentery, Humors, Scrofula and Scurvy, Colds with soreness of the body, Ulcers and impurity of the blood; in short, any and every case where a purgative is required. They have produced some singularly successful cures in Rheumatism, Gout, Dropsy, Gravel, Erysipe-las, Palpitation of the Heart, Pains in the Back, Stomach and Side. They should be freely taken in the oring of the year, to purify the blood and prepare he system for the change of sensons. An occasional lose stimulates the stomach and bowels into healthy action, and restores the appetite and vigor. They pu rify the blood, and, by their stimulant action, on the culatory system, renovate the strength of the body, and restore the wasted or diseased energies of the whole organism: Hence an occasional dose is advantigeous, even though no serious derangement exists; but unnecessary desings should never be carried too far as every purgative medicine reduces the strength when taken to excess. The thousand cases in which WOODEN WARE—Patent Pails, Cedar Pails aphysic is required cannot be enumerated here, but and Wash Tubs, Cocoa Nut Dippers, Butter they suggest themselves to the reason of every body, and it is confidently believed this pill will answer a better purpose than anything which has hitherto been available to mankind. When their virtues are once of known, the public will no longer doubt what remedy to employ when in need of a cathartic medicine. Being sugar-wrapped they are pleasant to take, and being purely vegetable, no harm can arise from their

Ayer's Cherry Pectoral. For the rapid Cure of Coughs, Colds, Hourseness, Bronchitis, Whooping-Cough, Croup, Asthma, and Consumption.
This remedy has won for itself such notoriety from s cures of every variety of pulmonary disease, that is entirely innecessary to recount the evidences of is virtues in any community where it has been employed. So wide is its field of usefulness, and so nuerous the cases of its cures, that almost every secdon of the country abounds in persons publicly known who have been restored from alarming and even des-perate diseases of the lungs by its use. When once ried its superiority over every other medicine of its kind is too apparent to escape observation, and where s virtues are known the public no longer hesitate what antidote to employ for the distressing and danterous affections of the pulmonary prgates which are attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hourseness, &c. ; and for Children it s the pleasantest and safest medicene that can be ob-
