PLOTS OF PRISONERS.

HOW THE CONVICTS IN AUBURN PRISON MAKE A PLAN TO ESCAPE.

Bolts and bars and walls built to resist the teeth of time, are not always sufficient to restrain the convicts in the State prison at Auburn. Confinement seems to sharpen the wits of the prisoners, and not only have they been known to devise successful plans to escape, but to invent most ingenious appliances and machinery. Old attaches of the prison could tell stories of the achievements of convicts that would read like fables, and yet be as true as sacred writ. Every morning the contractor drives in through the north gate, and receiving his load of three or four barrels at the kitchen, drives out again. A convict several years ago, thought he saw in the swill-barrel a means of escape, and he proceeded to put his idea into operation. He enveloped his head in cloths and got into a barrel of liquid swill. The gate-keeper is provided with a long iron rod, and is required to probe or examine every load, no matter what it may be, that leaves the prison. When the wagon reached the gate the keeper ran the rod into the barrel in which the convict was concealed. It struck an obstruction, and he plunged it in again with considerable force. He was amazed to see a filthy object emerge from the swill and utter a muffled cry of pain. It did not take the keeper long, however, to determine that it was a convict attempting to escape. The clever plot of the prisoner created a great deal of comment at the time. A prisoner once disappeared, and no trace of him could be found. The officers searched for a week without avail. Finally, after all efforts had been given up, the keeper of the tailor shop one day instructed his men to remove the pieces of cloth, of which there was a great quantity, from beneath the cutting-bench. The bench was entirely closed, with the exception of a small aperture into which the odds and ends were thrown, and while the pieces were being taken out, the missing convict was unearthed. The man had been waiting for an opportunity to get outside the walls, but he waited one day too many it proved. He had been fed regularly by other convicts, who brought him food in their pockets from the mess-room.

Three or four years ago, when the prison was crowded with 1,500 convicts, a great many slept in a large room in the top of the main building, known as the 'old hospital.' These men imagined that liberty was within their reach, and they made an attempt to effect their escape. They cut their way through the wood-work to the roof, and only the tin covering remained to be removed. The night was appointed for the delivery, but when the men put their heads through the opening, they were confronted with a row of revolvers in the hands of officers. Some one had revealed the scheme, and the authorities were forewarned. Had this plan been successful, the population of the prison would have been decreased some 200. Five years ago, a convict employed in the tool-shop, which is no longer operated, made a bold venture. The tools were placed in boxes some 3½ feet wide, and 20 inches deep. The man attached cleats and a button to one of the boards comprising the cover in such a way that he could shut himself in. To conceal the deception, he drove heads of nails into the board so that it looked as if it was nailed down. The contractors had another shop in what is known as 'Hackey,' in the northwestern part of the city, whither all tools were taken before being shipped. The convict ensconced himself in his narrow quarters, and the box was loaded on a wagon with a number of others. He waited until he thought the prison had been left behind, and then raised the cover to survey his surroundings. He was observed by the driver, a young man, who gave a frightened yell and jumped from the wagon. A guard happened to be in a grocery store in front of which the convict made his appearance, and he caught a glimpse of the head in the box. The escaping prisoner recognized him, and leaping from the wagon, ran as fast as his legs would carry him. The guard followed, and, as the fugitive would not stop in response to repeated commands, fired a ball into his leg, which put an end to the chase.

Citizens are employed in the prison-shops in numbers, and they pass in and out without any questions being asked. A convict once embraced the opportunity that this practice affords. He secured a pair of overalls and a blouse, and, shouldering a vise, walked past the guards. When he reached the street he threw down the vise and made for the country. Slipping out of the ranks is one of the practices of convicts as the preliminary step to an escape. One cold Winter's morning, while it was still dark, two convicts left their places in the line. They had previously obtained a long piece of wire, and, attaching a hook to one end, they, tore up their bed-clothing, and wound it tightly about it. This made a stiff rope, and, reaching it up, they caught the hook on the bars of the window in the story above. They climbed up from window to window, until they reached the roof, from which they expected to descend to a low side wall and drop to the ground. Their absence had been discovered, however, and just as they were descending they were detected by the officers who were looking for them. The escape of 'By' Day was planned. He feigned sickness, and was left in his cell. When the keeper shook the cell-door at night, Day did not respond. Instead of compelling the man to answer, as he should have done, he looked through the grated-door, and saw a form lying in bed with a newspaper over the head. He thought Day was sleeping, and supposed the paper was to prevent his being disturbed by flies. The next morning a dummy stuffed with straw was found in Day's cot, but 'By' had disappeared. He had released himself from his cell with a false key, and, getting upon the roof, had gone to the ground. He was afterward recaptured. The 'wheel-horse' is the place where Dan Noble, Dan Kelly, and the rest of the famous gang made their egress. It is where the water from the Owasco River enters the prison to supply power.

A convict will endure the greatest suffering and privation to secure his liberty. A man from Jefferson county, crowded under a floor and hid in a pit partly filled with water. There he lay, wet to the skin, during one freezing cold day, and at night his hopes were blasted by the appearance of officers with lanterns. One prisoner hid himself in the top of a large pigeon-house, but his place of concealment was discovered before he could scale the walls under cover of darkness. It is necessary to watch the men on the upper tiers of both wings very closely. The roof of the main building has apparently been the most popular avenue of escape ever since the prison was built. From it the north wall is easily reached by taking the rope from the flag staff, and the passage from that point to the ground is an easy one. The halyards have been frequently cut from the pole. If a prisoner is missing, the officers at once proceed to the roof, and the chances are good that he will be found lying in the gutter or behind a chimney waiting for an opportunity to descend. It would be vain to attempt to say how many convicts have been caught on the roof, but the numbers is certainly very large.

If all the tools and appliances used by prisoners in attempting or accomplishing escapes had been saved a museum might be established. How the convicts obtain these tools is a question easily answered. They make them. Instruments weighing as much as 50 pounds have been made under the very eyes of the officers, and they were none the wiser for it. If a man is employed about iron-working machinery, he will find time to manufacture jacks, jimmies, levers, bars, keys, and other implements. Very often these tools are the finest specimens of workmanship, and any artisan might be proud to own them as his handiwork. Complete burglars kits have been manufactured in the prison and smuggled outside to do service in 'cracking' banks. Not long ago an attempt was made by a 'long-term man' to escape in broad daylight. He made a 'jack' and a 'jimmy,' and with them hoped to secure his liberty. But for the breaking of the jimmy he would undoubtedly have been successful. He concealed his tools in his bed, and committed some offense so as to be locked in on the day that he expected to set himself free. While the guard was in another part of the wing, he sprung the bolt in the door of his cell with the jimmy, and stepped into the corridor. His next move was to make an attack on the bars of a window. The man set to work and the barks began to spread, but his haste caused the failure of his plan. A sudden wrench caused the bolt to snap in twain. The noise attracted the guard, who suspected something wrong, and ran in the direction of the sound. The convict could not reach his cell quickly enough to avoid detection, and he paid the penalty of his effort to 'beat' the prison.

One generous-hearted convict proposed to liberate half the prisoners in the institution. He procured a piece of gas-pipe, and from it made a key to fit the locks of the cell doors. He had planned to spring the lever of his cell with a jimmy, thus releasing himself, and to unlock as many doors as he could with the key before he was discovered. Then he anticipated leading the men against the guards and fighting his way to liberty. The key was found in the possession of the sanguine prisoner before he had an opportunity to use it. In the office of the Agent and Warden are two jimmies remarkable for their fine construction. The handles, which can be detached, are turned in fanciful shape, and to any burglar the tools would be a rare prize. Desperate means are not infrequently resorted to in attempting escape. Several times fire has broken out in the prison, and has been found to be the work of convicts. There is a fire brigade composed of picked men, who are supposed to be trustworthy, but it has been shown that they cannot be relied upon. At nearly every fire inside the walls the prisoners have cut the hose and done everything in their power to advance the flames; in the vain hope that the whole institution would burn down. Impossible stories are told of escapes. It used to be related that a desperate criminal serving a life sentence feigned death so successfully that he was put in a coffin, the bottom of which had previously been bored full of holes to admit air. The man, as the story went, was carried out and delivered over to friends, who carried him away to freedom. The most despised creature in the prison is a 'squealer,' as the convicts term a prisoner who learns of plans to escape and reveals them. If he is known to be a tale-bearer, he is not only ostracized by the others; but life is made as miserable for him as possible.

KIDNEY-WORT

THE GREAT CURE FOR RHEUMATISM

As it is for all diseases of the KIDNEYS, LIVER AND BOWELS.

It cleanses the system of the acrid poison that causes the dreadful suffering which only the victims of Rheumatism can realize.

THOUSANDS OF CASES

of the worst forms of this terrible disease have been quickly relieved, in a short time

PERFECTLY CURED.

KIDNEY-WORT

has had wonderful success, and an immense sale in every part of the Country. In hundreds of cases it has cured where all else had failed. It is mild, but efficient. CERTAIN IN ITS ACTION, but harmless in all cases.

☞ It cleanses, Strengthens and gives New Life to both of the important organs of the body. The natural action of the Kidneys is restored. The Liver is cleansed of all disease, and the Bowels move freely and healthfully. In this way the worst diseases are eradicated from the system.

As it has been proved by thousands that

KIDNEY-WORT

is the most effectual remedy for cleansing the system of all morbid secretions. It should be used in every household as a

SPRING MEDICINE.

Always cures BILIOUSNESS, CONSTIPATION, PILES and all FEMALE Diseases.

Is put up in Dry Vegetable Form, in tin cans, one package of which makes 6 quarts medicine.

Also in Liquid Form, very Concentrated for the convenience of those who cannot readily prepare it. *It acts with equal efficiency in either form.*

IMPORTANT To Grocers, Packers, Hucksters, and the General Public

THE KING FORTUNE-MAKER,

OZONE!

A New Process for Preserving all Perishable Articles, Animal and Vegetable, from Fermentation and Putrefaction, retaining their Odor and Flavor.

"OZONE—Purified air, active state of oxygen."—WEBSTER.

This Preservative is not a liquid, pickle, or any of the old and exploded processes, but is simply and purely *OZONE*, as produced and applied by an entirely new process. Ozone is the antiseptic principle of every substance, and possesses the power to preserve animal and vegetable structures from decay. *There is nothing on the face of the earthliable to decay or spoil which OZONE, the new Preservative, will not preserve for all time in a perfectly fresh and palatable condition.*

The value of OZONE as a natural preserver has been known to our ablest chemists for years, but until now no means of producing it in a practical, inexpensive, and simple manner have been discovered.

Microscopic observations prove that decay is due to septic matter, or minute germs that develop and feed upon animal and vegetable structures. OZONE, applied by the Prentiss method, seizes and destroys these germs at once, and thus preserves. At our offices in Cincinnati can be seen almost every article that can be thought of preserved by this process and every visitor is welcome to come in, taste, smell, take away with him, and test in every way the merits of OZONE as a preservative. We will also preserve, free of charge, any article that is brought or sent prepaid to us, and return it to the sender, for him to keep and test.

EGGS can be treated at a cost of less than one dollar a thousand dozen, and be kept in an ordinary room six months or more, thoroughly preserved, the yolk held in its normal condition, and the eggs as fresh and perfect as on the day they were treated, and will sell as strictly "choice." The advantage in preserving eggs is readily seen; there are seasons when they can be bought for 8 or 10 cents a dozen, and by holding them can be sold for an advance of from one hundred to three hundred per cent. One man with this method can preserve 5,000 dozen a day.

FRUITS may be permitted to ripen in their native climate, and can be transported to any part of the world. The juice expressed from fruits can be held for an indefinite period without fermentation—hence the great value of this process for producing a temperance beverage. Milk and cider can be held perfectly sweet any length of time.

VEGETABLES can be kept for an indefinite period in their natural condition, retaining all their odor and flavor, treated in their original packages, at a small expense.

All grain, flour, meal, etc., are held in their normal condition.

FRESH MEATS, such as beef, mutton, veal, pork, poultry, game, fish, etc., preserved by this method, can be shipped to Europe, subjected to atmospheric changes, and return to this country in a state of perfect preservation.

BUTTER AFTER BEING TREATED BY THIS PROCESS will NOT become RANCID.

Dead human bodies, treated before decomposition sets in, can be held in a natural condition for weeks, without puncturing the skin or mutilating the body in any way. Hence the great value of Ozone to undertakers.

There is no change in the slightest particular in the appearance of any article thus preserved, and no trace of any foreign or unnatural odor or taste.

The process is so simple that a child can operate it as well and as successfully as a man. There is no expensive apparatus or machinery required.

A room filled with different articles, such as eggs, meat, fish, etc., can be treated at one time, without additional trouble or expense.

☞ In fact, there is nothing that Ozone will not preserve. Think of everything you can that is liable to sour, decay, or spoil, and then remember that we guarantee that Ozone will preserve it in exactly the condition you want it for any length of time. If you will remember this, it will save asking questions as to whether Ozone will preserve this or that article—it will preserve any thing and every thing you can think of.

There is not a township in the United States in which a live man cannot make any amount of money, from $1,000 to $10,000 a year, that he pleases. *We desire to get a live man interested in each county in the United States, in whose hands we can place this Preservative, and through him secure the business which every county ought to produce.*

A FORTUNE awaits any man who secures control of OZONE in any Township or County.

A. C. Bowen, Marion, Ohio, cleared $2,000 in two months. $2 for a test package was his first investment. Woods Brothers, Lebanon, Warren County, Ohio, made $6,000 on eggs purchased in July and sold November 1st. $2 for a test package was their first investment.

F. E. Raymond, Morristown, Belmont County, Ohio, is clearing $2,000 a month in handling and selling Ozone. $2 for a test package was his first investment.

D. F. Webber, Charlotte, Eaton County, Michigan, has cleared $1,000 a month since August. $2 for a test package was his first investment.

J. H. Gaylord, 80 LaSalle Street, Chicago, is preserving eggs, fruit, etc., for the commission men of Chicago, charging 1½c. per dozen for eggs, and other articles in proportion. He is preserving 5,000 dozen eggs a day, and on his business is making $3,000 a month clear. $2 for a test package was his first investment.

The Cincinnati Feed Company, 498 West Seventh Street, is making $5,000 a month in handling brewers' malt, preserving and shipping it as feed to all parts of the country. Malt unpreserved sours in twenty-four hours. Preserved by OZONE it keeps perfectly sweet for months.

These are instances which we have asked the privilege of publishing. There are scores of others. Write to any of the above parties and get the evidence direct.

Now, to prove the absolute truth of every thing we have said in this paper, we propose to place in your hands the means of proving for yourself that we have not claimed half enough. To any person who doubts any of these statements, and who is interested sufficiently to make the trip, we will pay all traveling and hotel expenses for a visit to this city, if we fail to prove any statement that we have made.

HOW TO SECURE A FORTUNE WITH OZONE.

A test package of Ozone, containing a sufficient quantity to preserve one thousand dozen eggs, or other articles in proportion, will be sent to any applicant on receipt of $2. This package will enable the applicant to pursue any line of tests and experiments he desires, and thus satisfy himself as to the extraordinary merits of Ozone as a Preservative. After having thus satisfied himself, and had time to look the field over to determine what he wishes to do in the future—whether to sell the article to others, or to confine it to his own use, or any other line of policy which is best suited to him and to his township or county—we will enter into an arrangement with him that will make a fortune for him and give us good profits. We will give exclusive township or county privileges to the first responsible applicant who orders a test package and desires to control the business in his locality. THE MAN WHO SECURES CONTROL OF OZONE FOR ANY SPECIAL TERRITORY WILL ENJOY A MONOPOLY WHICH WILL SURELY ENRICH HIM. Don't let a day pass until you have ordered a Test Package, and if you desire to secure an exclusive privilege, we assure you that delay may deprive you of it, for the applications come in to us by scores every mail—many by telegraph. "First come first served" is our rule.

If you do not care to send money in advance for the test package, we will send it C. O. D.; but this will put you to the expense of charges for return of money. Our correspondence is very large; we have all we can do to attend to the shipping of orders and giving attention to our working agents. Therefore we cannot give attention to letters which do not order Ozone. If you think of any article that you are doubtful about Ozone preserving, remember we *guarantee that it will preserve it, no matter what it is.*

REFERENCES: We desire to call your attention to a class of references which no enterprise or firm based on any thing but the soundest business success and highest commercial merit could produce.

We refer, by permission, as to our integrity and to the value of the Prentiss Preservative, to the following gentlemen: Edward C. Boyce, Member Board of Public Works; E. O. Eshelby, City Comptroller; Amor Smith, Jr., Collector Internal Revenue; Wulsin & Worthington, Attorneys; Mrtin B. Harrell and B. F. Hopkins, County Commissioners; W. S. Cappeller, County Auditor; all of Cincinnati, Hamilton county, Ohio. These gentlemen are each familiar with the merits of our Preservative, and know from actual observation that we have without question

THE MOST VALUABLE ARTICLE IN THE WORLD.

The $2 you invest in a test package will surely lead you to secure a township or county, and then your way is absolutely clear to make from $2,000 to $10,000 a year.

Give your full address in every letter, and send your letter to

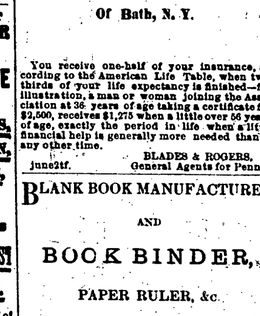
june1 tf BRINK & BUCK LeRaysville, Pa.



THE GREAT APPETIZER TONIC, AND COUGH CURE FOR COUGHS, COLDS, CONSUMPTION, BRONCHITIS, ASTHMA, AND All Diseases OF THE THROAT, CHEST AND LUNGS.

The BALSAM of TOLU has always been one of the most important weapons wielded by the Medical Faculty against the encroachments of the above Diseases, but it has never been so advantageously compounded as in LAWRENCE & MARTIN'S TOLU, ROCK and RYE. Its soothing BALSAMIC properties affords a diffusive stimulant, appetizer and tonic, to build up the System after the cough has been relieved.

GREEN, B. RAUM, Commissioner of Internal Revenue, Washington, D. C., Jan. 26th, 1880, says: "TOLU, ROCK and RYE is an agreeable Remedy in Pectoral complaints and is classed as a Medicinal preparation under the U. S. Revised Statutes, and when so stamped, may be sold by DRUGGISTS, GROCERS, and other persons, without special tax," or license.

CAUTION! Don't be deceived by dealers who try to palm off Rock and Rye for LAWRENCE & MARTIN'S TOLU, ROCK and RYE—which is the only MEDICATED article made—the genuine has their name on the Proprietary Stamp on each bottle.

Put up in Quart Size Bottles. Price $1.00.

TOLU, ROCK & RYE CO., Prop'rs.

CHICAGO, ILL.

Sold by DRUGGISTS and GENERAL DEALERS Everywhere.

—THE—

Chicago & North-Western

RAILWAY

Is the OLDEST! BEST CONSTRUCTED! BEST EQUIPPED! and hence the

LEADING RAILWAY

OF THE

West and Northwest!

It is the short and best route between Chicago and all points in

NORTHERN ILLINOIS, IOWA, DAKOTA, WYOMING, Nebraska, California, Oregon, Arizona, Utah, Colorado, Idaho, Montana, Nevada, and for

Council Bluffs, Omaha, Denver, LEADVILLE, SALT LAKE,

San Francisco, Deadwood, Sioux City,

Cedar Rapids, Des Moines, Columbus, and all Points in the Territories, and the West. Also for Milwaukee, Green Bay, Oshkosh, Sheboygan, Marquette, Fond du Lac, Watertown, Houghton, Neenah, Menasha, St. Paul, Minneapolis, Huron, Volga, Fargo, Bismarck, Winona, LaCrosse, Owatonna, and all points in Minnesota, Dakota, Wisconsin and the Northwest.

At Council Bluffs the Trains of the Chicago & North-Western and the U. P. R'ys depart from, arrive at and use the same joint Union Depot.

At Chicago, close connections are made with the Lake Shore, Michigan Central, Baltimore & Ohio, Ft. Wayne and Pennsylvania, and Chicago & Grand Trunk R'ys, and the Kankakee and Pan Handle Routes.

☞ Close connections made at Junction Points.

It is the ONLY LINE running

Pullman Hotel Dining Cars

BETWEEN

Chicago and Council Bluffs.

Pullman Sleepers on all Night Trains.

Insist upon Ticket Agents selling you Tickets via this road. Examine your Tickets, and refuse to buy if they do not read over the Chicago & North-Western Railway.

You need not Die to Win

IN THE

MUTUAL ENDOWMENT

AND

ACCIDENT ASSOCIATION

Of Bath, N. Y.

You receive one-half of your insurance, according to the American Life Table, when two thirds of your life expectancy is finished—for illustration, a man or woman joining the Association at 36 years of age taking a certificate for $2,500, receives $1,275 when a little over 56 years of age, exactly the period in life when a little financial help is generally more needed than at any other time.
