condensed account: The project is designated 'The Lancashire Plateway, and the first guarantee fund includes the names of some of the leading shipowners and merchants of Liverpool and several of the great manufacturing firms of interior Lancashire. Broadly, the proposal is to lay out a series of roadways radiating from Liverpool to the centres of manufacturing industry in South Lancashire, to carry along these roadways a double set of ron plates corresponding in breadth with he wheels of ordinary lorries or wagons, to et the loaded wagons on this smooth plateway, and draw them by steam-traction engines to their appointed destination. Passmger traffic is excluded from the scope of the scheme; it is confined entirely to goods

and the anticipation is that it will be possible to carry these at a much lower rate than now charged by the railway companies. "The process of the plateway will be inanitely simpler, and therefore proportionto the appointed wagon at the ship's side or drawn by horses to the nearest station of the Plateway Company, it will be linked on to a long train of other similar wagons, a head of the train, and it will haul the whole train of vehicles along the smooth plateway to the appointed destination. At the further end of the plateway the traction engine will be disconnected, horses will be yoked to the wagons, and they will at once be drawn to the mill-yard. By this treatment all the labor and expense of repeated transhipments will be obviated. The same vehicle that receives the cotton at the Liverpool dock or warehouse will deliver it into the mill without any intermediate handling. This will be a palpable economy; in the case of man-Mactured goods it will also be a great advanage in the avoidance of the damage now inseparable from rough usage on the railway. But the dispensing with frequent handling is not the sole element of economy. It is proposed to carry the plateway into the outtowns of South Lancashire; at each there into each mill-yard without loss of time or Y. Commercial Adzertiser. cumulative charges.

"The wagons or lorries will be similar in construction to those now universally used in Lancashire; the only difference will be in their wheels. The front and rear axles will oe of identical width, and of the same gauge as the plateway, but in all other respects the vehicles will be suitable to ordinary road work. The plateway will consist of two parallel rows of metals running along the prepared highway. The metals or plates will be about five inches in breadth, and along the smooth surface the wagon-wheels will run with ease and freedom. On the onter edge of the plates will be a raised flange, strong enough and high enough to prevent the train from leaving the track In fact, the accustomed railway track is simply reversed. There the rail is flat and the retaining flange is placed on the wheel; in the plateway, the rail or plate carries the flange and the wheel is flat. The origina idea of the promoters was to utilize the ordinary highways for this system of goods | Messra Seabury & Johnson, Hanufacture themselves, and it is now proposed to ac quire land and lay down a special track for the plateway, similar in all respects to the ordinary railways. There will be no necessity, however, to make the permanent way of so substantial construction or to have the levels so exact as in the case of railways.

Piles are frequently preceded by a sense of weight in the back, loins and lower part of the abdomen, causing the patient to sup-pose he has some affection of the kidneys or neighboring organs. At times, symptoms of indigestion are present, as flatuency uneasiness of the stomach, etc. A moisture like perspiration, producing a very disa-greeable itching, particularly at night after getting warm in bed, is a very common at-tendant. Internal, External and Itching Piles yield at once to the application of Dr. Bosanko's Pile Remedy, which acts directly upon the parts affected, absorbing the Tu

PILES.

mors, allaying the intense itching, and effecting a permanent cure where all other remedies have failed. Do not delay until the drain on the system produces permanent disability, but try it and be cured.

PASHIONABLE FURS.

The principal call now is for the fur of the fur-seal and seal-otter. Of the latter about 5,000 are taken yearly. They are only found in the North Pacific islands. The best skins are valued at from one hundred to five hundred dollars, and are especfally affected by the wealthy Chinese. The Russian sable though why so named is an enigma-the choicest specimens coming from Kamschatka-is extremely fashionable throughout the world, the fur being valued for its great beauty, and being unique from the fact that the hairs turn and lie equally well in any position. The animal is related to the weasel, pine and stone marters, mink, etc., but exceeds them all in the \$30 to \$150 a skin, and the lady who would

over 130,000 are captured yearly, valued at 825 per ckin for the best. Of pine martens 200,000 are used. It is a rich brown, being often passed off by dishonest dealers as Russian sable. In this country the better class We have stores in 15 leading Cities. of mink retains its popularity, the dark of mink retains its popularity, the dark from which our agents obtain their supplies quickly.

Our Factories and Principal Unices are at Eric. Pa. Send for our New Catalogue and upon the innocent purchaser as Russian sa. M. N. LOYELL 312 Lackawanna Ave elegant in the extreme and often passed off ole. The dark blue, lustrous shades are

ble. The dark blue, lustrous shades are most admired and come from Maine, Nova Scotia, the Middle and Northwestern States. The trappers realize, or should, from \$5 to \$25 per skin for the 250,000 animals killed yearly.

Ermine skins are now rated at about \$150 apiece, and the coat of Louis IX. was probably worth at the time \$2,500. One of the most fashionable furs is that of the silver fox. It is a rich, deep, glossy black, with a bluish tinge. So beautiful are they that \$500 has been given for a single skin, and La Houtan states that in his time the skin of one of these foxes brought its weight in gold. Skins frequently bring \$250. Of the 2,000 caught yearly, about 1,000 are used in 2,000 caught yearly, about 1,000 are used in England, and they are occasionally seen up FIRE AND LIFE INSURANCE on the streets of New York. Cheap grades of furs are made from 81 berian squirrel, muskrats, rabbits, wildcats,

badger, coon and even the common domestic cat, of which 1,000,000 and over are killed yearly; yet the attentive observer about New York is often reminded and forced to observe that the supply exceeds the demand. Other chimals used in trim mings, etc., are lions, tigers and bears. Of the former 500 are consumed by the trade every year, while 20,000 bears, 500 tigers, 100,000 buffalo, 100,000 chinchillas and 6,000,000 squirrels have been and are used having business in their line, and will endeavor yearly in various branches of the trade.—IV.

CONSUMPTION.

It is said that 50,000 people die annually in the United States alone from this disease. In some sections of the country one death in every three is from Consumption. This can be, and should be avoided; our people are too careless about an ordinary cough or skirts of all the principal manufacturing to any extent, as she now has a retinue of cold, and other symptoms of throat and towns of South Lancashire; at each there ninety-four servants. What a field of flirts. You should arrest it while it is in the germ. Two or three doses of Dr. Bosanko's Cough and Lung Syrup will relieve an ordinary cough or cold. It does not dry up a cough like many preparations on the market and leave the disease behind it, but acts directly on the throat and bronchial tubes, removing all the phlegm and morbid matter that accumulates in the throat and lungs. It allays all irritation, and renders the voice clear and distinct. Sold by C. B. Porter's Werd House Drug Store. july271y.

A BRILLIANT SPECTACLE. Passing under the "Rialto" and rounding a curve we suddenly see a spectacle brilliant beyond description. It is the Sunday even-ing "serenade." All the gondolas of Venice seem to have congregated in one spot. Literally, there are acres of them. The whole surface of the canal- is one solid mass of boats in almost inextricable confusion, but, as by a common impulse, moving slowly along. In the centre of this mass, drawn dred feet long, fantastically shaped and resplendent with thousands of lights of every are discharged, rendering the night brilliant and bringing out, for the time being, the beauty and quaint originality of the carvings on the palaces. A fine band and the prominent artists from the theatres execute instrumental and vocal music. The dulcet strains, softened by distance, steal upon the senses, until one nearly loses his individuality and lives only in the harmony that envelops him, exerting its softening and refining influence, and inviting the senses to complete repose. Sometimes the strang procession halts before the palace of some official or patron of the fine arts, and amids silence almost oppressive, the clear notes of some noted soprano will warble forth in rippling music or the deep tones of a bass voice thrill the hearts of the listeners with sympathetic emotion. Such is the Venice

From spoils of nations, and the exhaustless Four'd in her lap all gens in sparkling showers.

of to-day, though but a remnant of her

former grandeur, when "Her daughters had their dowers

Delicate Females. The exactions of society, added to the cares of maternity and the household, have tested beyond endurance the frail constitutions which have been granted the majority of women. To combat this tendency to emature decline, no remedy in the world ossesses the nourishing and strengthening operties of Malt Bitters. They enrich the blood, perfect digestion, stimulate the liver and kidneys, arrest ulcerative weakness, and purify and vitalize every function of the female system.

PAY OF RAILROAD MEN.

Engineers on the Central-Hudson road are paid three cents a mile and fireman receive ust one half that rate. Passenger conductors are paid \$80 a month, and, in some instance, \$10 more. As the engineer has brakemen is displaced by "trainmen," who help ladies to seats and also assist them in coming and going. These men receive \$50 month, but the man on the last car has \$5 additional, as his responsibility is greater. In case of any delay he must go back on the track to flag approching trains, and may be left behind. Baggagemen are paid \$60, though in some instances, where the route s of unusual length, it is increased to \$70. Station agents are paid \$60, and ticket agents (except in cities) \$50. This class are they are closely confined and serve long hours; but there are so many women ready to accept such work that women's, pay becomes the standard. The track boss is paid have only \$36, and yet this is one of the safe in saying most responsible positions on the road.-Buffalo Express.
