Dr. James Lull, of Potsdam, N. Y., says: I have cured the most deplorable costiveness of the bowels with Brandreth's pills, when every other remedy had failed, and the natient was given up to die. Skin diseases of an inveterate and painful character, such as erysipelas, salt rheum, tetter and summer-heat, I have seen eradicated by their use. I have cured the rheumatic, epileptic, the paralytic and the con-sumptive with these excellent pills alone."

In settling here the emigrant has many advantages. He is within a few hours' ride of England; he is in a settled country, where every improvement and comfort of civilization is at hand; he is in a healthy place, and is not subject to the certainty of loosing the greater part of his family and his own health by those malignant fevers which make the graves of so many millions of the young and hardy in far off regions away from home and friends. Be sids, he has a mild climate and an open winter There are three trains daily to Philadelphia

The reader will at once be struck with the advantages here presented, and ask himself why the property has not been taken up before. The reason is, it was never thrown in the market; and unless the statements were correct, no one would be invited to examine the land before purchasing. This all are expected to do. They will see the land under cultivation they will meet porsons, no doubt, from their own neighborhood; they will witness the im provements, and can judge of the character of the population. Persons should come prepared to purchase, as many are locating, and loca

Washing Machine. Patented Sept. 9, 1856. BY RILEY SMITH

THE WASHBOARD AND BEATER are the two first and most natural implements ever used in Washing Clothes. Notwithstanding it has been the study of inventors to do them away, and for that purpose several hundred patents have been issued, yet it has been of no effect. They have failed in their attempt. Their machines have been condemned and thrown away, and the Wash Board and

Beater again used in their atead. This machine combines them together, atached to a progressive lever in such a manner as gives great power to the Beater, while either may be used as the operator may desire. The motion of the Beater is quick and easy, the pressure gentle and powerful, which gives it the advantage over all other machines, and

is so decided by competent judges.
