## MASHINC MACHINE Patented Sept. 9, 1856.

BY RILEY SMITH

THE WASHBOARD AND BEATER are the two first and most natural implements ever used in Washing Clothes ... Not withstanding it has been the study of inventors, to do them away, and for that purpose several hundred patents have been issued, yet it has been of no effect. They have failed in their attempt. Their machines have been condemned and thrown away, and the Wash Board and Beater again used in their stead.

This machine combines them together, at tached to a progressive lever in such a manner. as gives great power to the Beater, while either may be used as the operator may desire. The motion of the Beater is quick and easy the pressure gentle and powerful, which gives it the advantage over all other machines, and *College, Phila*. is so decided by competent, judges.
