THE WASHBOARD AND BEATER are the two first and most natural implements ever used in Washing Clothes. Notwithstanding it has been the study of inventors to do them away, and for that purpose several hundred patents have been issued, yet it has been of no effect. They have failed in their attempt. Their machines have been condemned and thrown away, and the Wash Board and Beater again used in their stead.

This machine combines them together, atached to a progressive lever in such a manner as gives great power to the Beater, while ither may be used as the operator may desire. The motion of the Beater is quick and easy. the pressure gentle and powerful, which gives t the advantage over all other machines, and

it the advantage over an is so decided by competent judges.

It gives me pleasure to add my testimony to the professional ability of the Author of the Modical Manual." Numerous cases of disases of the Genital Organs, some of them o long s'anding, have come under my notice, in which his skill has been manifest in restoring to perfect health, in some instances where the patient has been considered beyond medical aid. In the treatment of Seminal, weakness, or disarrangement of the functions produced by Selfibuse, or Excess of venery, I do not know his superior in the profession. I have been acquainted with the Author some thirty years, and deem it no more than justice to him as well as a kindness to the unfortunate victims of early indiscretion, to recommend him as one in whose professional skill and integrity they may safely confide themselves.
