JEFREY'S DOUBLE-ACTING SUCTION & FORCE PUMP
 WITH
India Rubber Ball Valves.

THE SUBSCRIBER having purchased the right to make and sell this New Pump, feels a confidence that his efforts to bring it into general use, in this county, will be seconded by all who see its construction and operation.

Among the many advantages secured by the use of this Pump, the following may be enumerated:

1. A double action, by which twice the water can be raised at the same time.
2. Great ease in working, thus adapting the Force Principle to common wells.
3. The transformation, in a moment, of the Pump into an efficient fire engine, thus rendering the loss of dwellings by fire, totally unnecessary.
4. Capability of watering gardens, Lawns, or sprinkling walks, washing windows, &c., with the utmost ease and thoroughness.
5. Its compactness, with slight labor to any reasonable height, as in supplying chambers &c.
6. The convenience of having the Pump in a kitchen, or other rooms of your dwelling, without regard to the location of the Well or Cistern.
7. The easy protection of the instrument against Frost.
8. The ease with which it may be mounted on wheels, or in other ways be made portable.
9. A simplicity which ensures great durability, protects it from being thrown out of order, and makes any repairs easy and of little cost.
10. Great Cheapness: for the first time bringing the cost of the Force Pump into the neighborhood of the common Suction and Chain Pumps, while it is immeasurably superior to both.

Manufactured and for sale by the subscriber, only, at his shop in Mechanicsburg.

WASHING MACHINE.
 Patented Sept. 9, 1856.
BY RILEY SMITH

THE WASHBOARD and BEATER are the two first and most natural implements ever used in Washing Clothes. Notwithstanding it has been the study of inventors to do them away, and for that purpose several hundred patents have been issued, yet it has been of no effect. They have failed in their attempt, and their machines have been condemned and thrown away, and the Wash Board and Beater again used in their stead.

This machine combines them together, attached to a progressive lever in such a manner as gives great power to the Beater, while either may be used as the operator may desire. The motion of the Beater is quick and easy, the pressure gentle and powerful, which gives it the advantage over all other machines, and is so decided by competent judges.
