HENRY R. COSTAR.—All the summer I have been troubled with Roaches and Mice. I was actually ashamed of the house, for the Roaches were everywhere. I purchased a box of your Exterminator and tried it, and in one week there was not a Roach or Mouse in the house. **JAMES B. GIVENS,** No. 94 Elm St.

HOUSEKEEPERS—troubled with vermin, need no longer, if they use "COSTAR'S" Exterminator. We have used it to our satisfaction, and if a box cost \$5, we would have it. We had tried poisons, but they effected nothing; but COSTAR'S article knocks the breath out of Rats, Mice and Bed Bugs, quicker than we can write it. It is in great demand all over the country.—**Medina (O.) Gazette.**

MORE GRAIN and Provisions are destroyed annually in Grant County by vermin, than would pay for tons of this Rat and Insect Killer.—**Leicester (Wis.) Herald.**

HENRY R. COSTAR—Your Exterminator is received, used, and pronounced a decided success. We used a box of it, and the way the Rats and Mice around our premises "raised Ned," that night was a caution to sleepers. Since then not a Rat or Mouse has been heard to hither or yon.—**Magyar (Iowa) Times.**

I HAVE BEEN SELLING—Your Exterminator for the last year, and find it a sure and every time.
Geo. Ross, Druggist, Cardington, O.

WE ARE SELLING—Your preparations rapidly. Wherever they have been used, Rats, Mice, Roaches, and Vermin disappear immediately. **Boxen & Groceries, Druggists, New Windsor, Md.**

PROSPECTUS
 OF THE
SCIENTIFIC AMERICAN.
 THE BEST MECHANICAL PAPER IN THE WORLD SEVENTEENTH YEAR.
 Volume VI.—New Series.
 A new volume of this widely circulated paper commences on the 4th of January. Every number contains sixteen pages of useful information and from five to ten original engravings of new inventions and discoveries, all of which are prepared expressly for its columns.
 The SCIENTIFIC AMERICAN is devoted to the interests of Popular Science, the Mechanic Arts, Manufactures, Inventions, Agriculture, Commerce and the Industrial Pursuits generally, and is valuable and instructive not only in the Workshop and Manufactory, but also in the Household, the Library and the Reading Room.
 To The Mechanic and Manufacturer!
 No person engaged in any of the mechanical pursuits should think of doing without the SCIENTIFIC AMERICAN. It costs but four cents per week; every number contains from six to ten engravings of new machines and inventions, which cannot be found in any other publication. It is an established rule of the publishers to insert none but original engravings, and those of the first class in the art, drawn and engraved by experienced persons under their own supervision.
 To the Inventor!
 The SCIENTIFIC AMERICAN is indispensable to every inventor, as it not only contains illustrated descriptions of nearly all the best inventions as they come out, but each number contains an Official List of the Claims of all the Patents issued from the United States Patent Office during the week previous to that giving a correct history of the progress of inventions in this country. We are also receiving, every week, the best scientific journals of Great Britain, France, and Germany; thus placing in our possession all that is transpiring in mechanical science and art in these old countries. We shall continue to transfer to our columns copious extracts from these journals of whatever we may deem of interest to our readers.
 Chemists, Architects, Millwrights, and FARMERS!
 The SCIENTIFIC AMERICAN will be found a most useful Journal to them. All the new discoveries of science of chemistry are

given in its columns, and the interests of the architect and carpenter are not overlooked; all the new inventions and discoveries appertaining to these pursuits being published from week to week. Useful and practical information pertaining to the interests of millwrights and mill-owners will be found published in the SCIENTIFIC AMERICAN which information they cannot possibly obtain from any other source. Subjects in which planters and farmers are interested will be found discussed in the SCIENTIFIC AMERICAN; most of the improvements in agricultural implements being illustrated in its columns.
