COURT PROCLAMATION.

WHEREAS the Hon. Robert G. White President Judge, and the Hons. J. Darling and N. Peabody Associate Judges of the Courts of Oyer & Terminer and General Jail Delivery, Quarter Sessions of the Peace, Orphans' Court and Court of Common Pleas for the County of M'Kean have issued their precept, bearing date Friday, the twenty sixth day of June in the year of our Lord one thousand eight hundred and sixty-three; and to me directed, for holding a Court of Oyer and Terminer and General Jail Delivery, Quarter Sessions of the Peace, Orphans' Court, and Court of Common Pleas, in the Borough of Smethport, on Monday, the 28th day of September next, and to continue one week.

Notice is therefore hereby given to the Coroners, Justices of the Peace and Constables within the county, that they be then and there in their proper persons, at 10 o'clock A. M. of said day, with their rolls, records, inquisitions, examinations, and other remembrances, to do those things which their offices appertain to be done. And those who are bound by their recognizances to prosecute the prisoners that are or shall be in the jail of said county of M'Kean, are to be then and there to prosecute against them as will be just.

Dated at Smethport, this 29th day of Aug. 1863, and the 86th year of the Independence of the United States of America.

JAS. E. BLAIR, *Sheriff.*

Orange Judd of the American Agriculturist says of the

UNIVERSAL CLOTHES WRINGER

"A child can readily wring out a tubfull of clothes in a few minutes. It is in reality a CLOTHES SAVER! A TIME SAVER! and a STRENGTH SAVER! The saving of garments will alone pay a large per centage on its cost. We think the machine much more than PAYS FOR ITSELF EVERY YEAR in the saving of garments! There are several kinds, nearly alike in general construction, but we consider it important that the wringer be fitted with Cogs, otherwise a mass of garments may clog the rollers, and the rollers upon the crank shaft slip and tear the clothes, or the rubber break loose from the shaft. Our own is one of the first make, and is as good as new after nearly FOUR YEARS' CONSTANT USE."

Every Wringer with Cog Wheels is Warrantod in every Particular.

NO WRINGER CAN BE DURABDE WITHOUT COG-WHEELS.

A good CANVASSER wanted in every town.

☞ On Receipt of the price from places where no one is selling, we will send the Wringer FREE OF EXPENSE.

Great Improvements in Sewing Machines

EMPIRE SHUTTLE MACHINE!

Patented, February 14th, 1860.

SALESROOM 454 BROADWAY

This Machine is constructed on entirely new principles of mechanism, possessing many rare and valuable improvements, having been examined by the most profound experts and pronounced to be SIMPLICITY, and PERFECTION COMBINED.

The following are the principal objections urged against Sewing machines:

1.—Excessive fatigue to the operator.
2.—Liability to get out of order.
3.—Expense, trouble and loss of time in repairing.
4.—Incapacity to sew every description of material.
5.—Disagreeable noise while in operation.

The Empire Sewing Machine is Exempt all these Objections.

It has a straight needle perpendicular action, makes the Lock or Shuttle Stitch, which will neither Rip nor ravel, and is alike on both sides; performs perfect sewing on every description of materiel, from Leather to the finest Nansook Euslin, with cotton, linen or silk thread, from the coarsest to the finest number.

Having neither CAM nor COG WHEEL, and the least possible friction, it runs as smooth as glass, and is

EMPHATICALLY A NOISELESS MACHINE!

It requires FIFTY PER CENT less power to drive it than any other machine in market. A girl twelve years old can work it steadily, without fatigue or injury to health.

Its strength and WONDERFUL SIMPLICITY of construction render it almost impossible to get out of order, and is GUARANTEED by the company to give entire satisfaction.

We respectfully invite all those who may desire to supply themselues with a superior article, to call and examine this UNRIVADED MACHINE.

But in a more epecial manner do we solicit the patronage of

MERCHANT TAILORS, COACH MAKERS, HOOP SKIRT MANUFACTURERS, SHIRT and BOSOM MAKERS, DRESS MAKERS, CORSET MAKERS, GAITER FITTERS, SHOE BINDERS, VEST and PANTALOON MAKERS.

RELIGIOUS and CHARITABLE INSTITUTIONS will be liberally dealt with.

PRICE OF MACHINES, COMPLETE.

No. 1, Family Machine, with Hemmer,	**$50**
No. 2, Small Manufacturing, with Extension Table,	**65**
No. 3, Large Manufacturing, with Extension Table,	**75**
No. 3, Large Manufacturing, for Leather, with Rolling Foot and Oil Cup,	**85**

One half hour's instructions is sufficient to enable any person to work this Machine to their entire satisfaction!

Your attention is also called to the EMHIRE SHTTTLE, Pattented June 26th, 1860.

It is well known that a Shuttle with a spring centre is preferable to any other—but a great objection against its use, was on account of its spring getting out of order, having then to be put in the the hands of a skillful mechanic to be repaired.

The Empire Shuttle is so simple that any operator can repair it without loss of time or expense.

FINKLE & LYON'S

SEWING MACHINES.

These Machines make the lock stitch alike on both sides, and use less than half the thread and silk that the single or double thread loop stitch Machines do; will Hem, Fell, Gather, Cord, Braid, Bind, &c., and are better adapted than any other Sewing Machines in use to the frequent changes and great variety of sewing required in a family, for they will sew from one to twenty thicknesses of Marseilles without stopping, and make every stitch perfect, or from the finest gauze to the heaviest beaver cloth, or even the stoutest harness leather, without changing the feed, needle, or tension, or making any adjustment of Machine whatever!!!

They are simple in construction, and easily understood; and if any part is broken by accident, it is readily replaced.

These are peculiar facts, and will go further to determine the choice of any intelligent buyer.

THE WEEKLY JOURNAL OF COMMERCE.

TO OUR SUBSCRIBERS.

The commencement of a new year is a good time for renewing subscriptions and increasing the circulation of the Journal of Commerce.—We address ourselves to the old readers of the paper, with entire confidence to their willingness to aid us, and extend the influence of the sound conservative principle and morals which have hitherto characterized and will hereafter characterize this paper. EVERY SUBSCRIBER to the Journal of Commerce might do a great service to these principles, and strengthen us in our ability to support and circulate them, by sending us the name of at least one new subscriber in his town.

Devoted firmly as we have been to our country's interests, and having long been called "Union Savers" as a term of reproach, we are and shall be the firm upholders of

THE UNION AND THE CONSTITUTION

opposing with heart and pen every man, South or North, who is an enemy to either. Every form of disorganization and revolution will find us ready for the combat. Among the foes of the American Union and American principles, we rank side by side

ABOLITIONISM AND SECESSIONISM,

and we propose with all our strength to defend the nation against the attacks of both.

A LIBERAL OFFER.

To encourage those who may volunteer to aid in the organization of Clubs, we hereby offer an extra copy of the Weekly to every person who shall forward twenty new subscribers with the money.

CLUBS

may be organized in communities with great advantage. The present is the best period for their commencement. The terms on which we can furnish the paper are as follows:—

To companies taking

20 copies or upwards	ONE DOLLAR each
13 copies	FIFTEEN DOLLARS.
8 copies	TEN "
4 copies	SIX "
3 copies	FIVE "
Under 3 copies	TWO each

The papers will be addressed to different persons at the same Post Office, if desired, except in cases of clubs of 13 or more copies, which will be mailed to one address.

ADDITIONS TO CLUBS

may be made at the following rates:—Papers added to a club during the first quarter of the club's year will pay the full rate of the original club for a year, during the second quarter three-fourths of the original year's rate, during the third quarter one half, and during the last quarter one-fourth, and all such subscriptions will terminate with the year of the original club.

From Holbrook's U. S. Mail.

Where packages of *newspapers* or periodicals are received at any post office directed to one address, and the names of the club of subscribers to which they belong, with the postage for a quarter in advance, shall be handed to the postmaster, he shall deliver the same to their respective owners.

But this does apply to weekly newspapers which circulate free in the county where printed and published.

We say this knowingly, and give the testimony of our own accord, without the knowledge or request of the proprietors."—*N. Y. Evening Post, July 1st,* 1863.

This may certify that I have been using, at my manufactory, for the last four years, West's Improved Pumps.' I now have in use three of said pumps, one of which is kept constantly at work, 24 hours each day (except Sundays) and pronounce them, unhesitatingly, the best pumps that have been brought to my notice, having used many others previously. They are simple in their construction, and not easily disarranged. JAMES A. WEBB.

J. D. WEST & Co.:—We are pleased to state that the Pumps we had of you, about a year ago have been in constant use, 12 hours each day, and raise for the use of our Woolen Factory, about 130 gallons per minute. They work with but little power, compared with pumps we have used before, and do not get out of repair, and are satisfactory in all respects. Yours, &c.,

SOLON ROBINSON to the farmers Club, Jan. 23:

"No farmer who owns a well or cistern can possibly afford to be without an iron pump. It should be at once a suction and force pump—a perfect little fire engine—such a one known as 'West's Improved Pump.' I speak of this pump because I happen to know it to be very simple, durable, powerful and cheap, and it don't freeze up, nor get out of order once a year. I know this, and think I may be doing the farmers good by speaking of it. A boy 10 years old can work it, and throw a continuous inch-and-a-quarter stream. It can be made to work in deep wells as well in as in shallow ones."

From the New York Observer.

We have had in use for months past one of West's Pumps, which has given us more satisfaction as a force and lifting pump than any we have ever used. It is one of great power, and well adapted for ship's decks, mines, factories, green houses, graperies, &c., &c. The Mining Chronicle and railway Journal says:

It is recommended for its extreme simplicity of construction, great strength, and consequent durability and cheapness of repair. There is no stuffing box—the pressure beidg held by a cup packing, like that upod the working piston, working in a cylinder, fitted for the purpos within the upper air chamber—which we think a great improvement, as stuffing is so liable to be deranged, and leak under strong pressure, to any nothing of the loss by friction incident thereto. It has also two air chambers; thus the action of the valve is cushioned upon both sides by air—preventing water hammer, and vacum thump. The valves are very accessible, and simply and cheaply repaired. They work much easier than any pump we have ever seen; the 4 inch cylinder being worked by children in wells 100 feet deep, and they are extremely cheap as well as simple and strong, we freely recommend them.

Gt. Neck L. I., 1860.

I have used this pump for one summer and winter, exposed to the North West wind coming over Long Island sound, being the coldest possible exposure, and at no time did it freeze, nor were we unable at any time to pump water with great ease. H. B. MCILVAIN.

The undersigned, havinh to use West's Improved Pumps, cheerfully recommend them as simple, durable and powerful in raising and throwing water, and for their ease of action, security against frost, and low price, we believe them superior to all others.

Cambridge Mine, N. C., June 15, 1863.

J. D. WEST & Co.:

Gents—The pump which I ordered for our Mine is received and put to work in our underlay shaft, which we are sinking. We find that one man will with ease lift 50 gallons per minute. We lifted in three and a half hours all the water in the shaft, which measures seven by twelve feet and 30 feet deep, and it was full when we commenced. It answers our expectations in every respect, and our workmen are highly pleased with it. It will do great service with but trifling expense for repairs.

Yours, respectfully,

BURR HIGGINS
