Great Improvements in Sewing Machines EMPIRE SHUTTLE MACHINE!

Pattent d, February 14th, 1860.

SALESROOM 454 BROADWAY This Machine is constructed on entirely new

principles of mechanism, possessing many rare and vuluable improvements, having been examined by the most profound experts and pronounced to be SIMPLICITY and PERFECTION COMBINED. The tollowing are the principal objections

urged against Sewing machines: 1 .- Excessive fatigue to the operator.

2 .- Liability to get out of order. 3 .- Expense, trouble and loss of time in repair

4 -Incapacity to sew every description of material.

- Disagreeable noise while in operation.

The Empire Sewing Machine is Exempt all these Objections.
It has a straight needle perpendicular action, makes the Lock or Shuttle Stitch, which will neither Rip nor ravel, and is alike on both sides; performs perfect sewing on every description o materiel, from Leather to the finest Nansook Easlin, with cotton, linen or silk thread, from the coarsest to the finest number.

Having neither CAM nor COG WHEEL,

and the least possible friction, it runs as smooth as glass, and is
EMPHATICALLY A NOISELESS MA-

CHINE!
It requires FIFTY PER CENT less power to drive it than any other machine in market. A girl twelve years old can work it steadily, without fatigue or injury to health.
Its strength and WONDERFUL SIMPLICE

TY of construction render it almost unpossible to get out of order, and is GUARANTEED bycompany to give entire satisfaction. We respectfully favite all those who may de

size to supply themselves with a superior article, to call and examine this UNRIVADED MA-CHINE.

Solon Rosinson to the farmers Club, Jan. 23: "No larmer who owns a well or cistern can possibly afford to be without an iron pump. It should be at once a suction and force pump—a perfect little fire engine-such a one known as West's Improved Pump. I speak of this pump because I happen to know it to be very simple, durable, powerful and cheap, and it don't freeze un, nor get out of order once a year. I know hie, and think I may be doing the farmers good by speaking of it. A boy 10 years, old can work it, and throw a continuous inch-and--quarter stream. It can be made to work in leep wells as well in as in shallow ones."

From the New York Observer. We have had in use for months past one of West's Pumps, which has given us more satisfaction as a force and lifting pump than any we have ever used. It is one of great power, and well adapted for ship's decks, mines, factories, green houses, graperies, &c.; &c. The Mining

Chronicle and railway Journal says: It is recommended for its extreme simplicity of construction, great strength, and consequen durability and cheapness of repair. There is no stuffing box - the pressure being held by a. cup packing, like that upod the working piston working in a cylinder, fitted for the purpos within the upper air chamber which we think a great improvement, as stuffing is so liable to be deranged, and leak under strong pressure, to say nothing of the loss by friction incident thereto. It has also two air chambers; thus the action of the valve is cushioned upon both much easier than any pump we have ever seen; the 4 inch cylinder being worked by children in wells 100 feet deep, and they are extremely cheap as well as simple and strong, we treely
