J. D. WEST & Co. :- We are pleased to state that the Pumps we had of you, about a year age have been in constant use, 12 hours each day and raise for the use of our Woolen Factory about 130 gallons per minute. They work with but little power, compared with pumps we have used before, and do not get out of repair, an are satisfactory in all respects. Yours, &c., DUNLAP MANUFATURING COMPANY

Solon Robinson to the farmers Club, Jan. 20: "No laimer who owns a well or cistern can cossibly afford to be without an iron pump. It should be at once a suction and force pumpperfect little fire engine—such a one known as (West's Improved Pump.) I speak of this pump because I happen to know it to be very simple durable, powerful any cheap, and it don't freeze up, nor get out of order once a year. I know this, and think I may be doing the farmers good by speaking of it. A boy 10 years old can work it, and throw a continuous inch-andaquarter stream. It can be made to work in deep wells as well in as in shallow ones."

From the New York Observer. We have had in use for months past one o West's Pumps, which has given us more satisfaction as a force and lifting pump than any we have ever used. It is one of great power, and well adapted for ship's decks, mines, factories, green houses, graperies, &c., &c. The Mining Chronicle and railway Journal says:

It is recommended for its extreme simplicity of construction, great strength, and consequent durability and cheapness of repair. There is no stuffing box—the pressure beidg held by a cup packing, like that upod the working piston, working in a cylinder, fitted for the purpo within the upper air chamber—which we think a great improvement, as stuffing is so liable to be deranged, and leak under strong pressure, to say nothing of the loss by friction incident thereto. It has also two air chambers; thus the action of the valve is cushioned upon both sides by air-preventing water hammer, and vacum thump. The valves are very accessible, and simply and cheaply repaired. They work much easier than any pump we have ever seen; the 4 inch cylinder being worked by children in wells 100 feet deep, and they are extremely cheap as well as simple and strong, we freely ecommend them.

I ne undersigned having been restored to health in a few weeks, by a very simple reme dy, after having suffered several years with a severe lung affection, and that dread disease, Consumption—is anxious to make known to his fellow sufferers the means of care. Gt. Neck L. I., 1860. H. B. McIlvain. with great ease.

The undersigned, havinh to use West's Improved Pumps, cheerfully recommend them as simple, durable and powerful in raising and throwing water, and for their ease of action, security against frost, and low price, we be-Prescription is to benefit the afflicted, and spread information which he conceives to be
