PROCLAMATION.

Whereas, the Honorable William Jessup, President Judge of the 11th Judicial district of Pennsylvania, composed of the counties of Susquehanna, Wayne, Monroe and Pike, and Joseph Keller and John T. Bell, Esqs. Associate Judges of the courts of Common Pleas of the county of Monroe, and by virtue of their offices, Justices of the Courts of Oyer and Terminer and General Jail Delivery, and Court of General Quarter Sessions in and for the said county of Monroe, have issued their precept to me, commanding that a Court of Quarter Sessions and Common Pleas, and General Jail Delivery and court of Quarter Sessions of the Peace, for the said county of Monroe, to be holden at Stroudsburg, on Tuesday, the 13th day of December next, to continue one week.

NOTICE

Is therefore hereby given to the Coroner, the Justices of the Peace, and Constables of the said county of Monroe, that they be then and there with their rolls, records, inquisitions, examinations and other remembrances, to do those things which to their offices are appertaining, and also that those who are bound by recognizance to prosecute and give evidence against the prisoners that are or shall be in the Jail of the said county of Monroe, or against persons who stand charged with the commission of offences, to be then and there to prosecute or testify as shall be just.

OLIS B. GORDON, Sheriff. (God save the Commonwealth.) Sheriff's Office, Stroudsburg, Nov. 9, 1842.

NOTICE

TO SAW-MILL OWNERS, Or those who are about to build or repair.

The undersigned respectfully informs the public that he is duly authorized to sell the Right of the Johnson Re-acting Water wheel, to the counties of Monroe and Pike, patented the 22d day of June, A. D. 1840.

The Johnson re-acting wheel is the best now in use to propel a saw mill; it excels any other wheel in the United States under a low water head,—under a head from 5 to 7 feet is sufficient to cut from 2 to 3000 feet in twelve hours of inch or any other boards with ease. The wheels require, under a 7 foot head, 140 inches of water and so in proportion to any other head. Under a 7 foot head, the Saw will make from 200 to 250 strokes per minute. The advantage which those wheels have over any other wheels is, that it requires but four posts to make the floor or bulk head; the wheels are hung on the crank shaft. Two wheels are what is required for a Saw mill, and the posts planked inside the same as a pen stock. I have built one of those mills this season, on the Roaring Brook, in Luzerne county, for Mr. S. P. Templin, under about a 7 foot head, which will cut from 3 to 4000 in twelve hours of inch boards;—therefore, I can recommend them as the best wheels now in operation. There are several more mills in that part, all under low heads, which answers the same purpose as that of Mr. Templin's. For further information, please call on the subscriber.
