GREAT EXCITEMENT.

The January Nos. of the Periodicals of Philadelphia, are creating a great excitement; but the following article, from the Daily Chronicle, settles the fact of which is the best periodical of the day.

"We have been favored with an early copy of Godey's Lady's Book, and it is, without any exception, the most wonderful production of the age. We understand that the Mezzotints are by Mr. Warner, the gentleman who took at the last exhibition of the FRANKLIN INSTITUTE, a society composed of the most celebrated artists of the day—

"THE PREMIUM FOR MEZZOTINTING." CROOME, the celebrated artist, has furnished an embellishment which will be hereafter known as

CROOME'S VASE.

This is conceded, by artists and amateurs, to be the prettiest embellishment ever furnished by a periodical.

FANCY BALL DRESSES

are just in season. These we believe are the first of that kind of embellishment ever published.

We will now mention one embellishment in preparation, that we know will give the greatest satisfaction to our numerous readers—

A FULL LENGTH PORTRAIT OF MISS E. LESLIE, The celebrated contributor to Godey's Lady's Book. The embellishments alone in this number cost near \$7000.

Our Contributors are the best in the country. We annex the names of those who contribute to the January No.

William Cullen Bryant, N. P. Willis, C. F. Follen, Hoffman, Joseph C. Neal, Mrs. L. H. Sigourney, Prof. John Sanderson, W. H. Burleigh, Alice Hervey, Miss A. D. Woodbridge, Mrs. S. J. Hale, T. S. C. W. DEWITT. Milford, Dec. 8, 1842

NOTICE

TO SAW-MILL OWNERS, Or those who are about to build or repair.

The undersigned respectfully informs the public that he is duly authorized to sell the Right of the Johnson, Re-acting Water wheel, to the counties of Monroe and Pike, patented the 22d day of June, A. D. 1840.

The Johnson, re-acting wheel is the best now in use for a saw mill; it excels any other wheel in the United States under a low water head;—under a head from 5 to 7 feet is sufficient to cut from 2 to 3000 feet in twelve hours of inch, or any other boards with ease. The wheels require, under a 7 foot head, 140 inches of water and so in proportion to any other head.

Under a 7 foot head, the Saw will make from 200 to 250 strokes per minute. The advantage which those wheels have over any other wheels is, that it requires but four posts to make the floor or bulk head; the wheels are hung on the crank shaft. Two wheels are what is required for a Saw mill, and the posts planked inside the same as a pen stock. I have built one of those mills this season, on the Roaring Brook, in Luzerne county, for Mr. S. P. Temple, under about a 7 foot head, which will cut from 3 to 4000 in twelve hours of inch boards;—therefore, I can recommend them as the best wheels now in operation. There are several more mills in that part, all under low heads, which answers the same purpose as that of Mr. Temple's. For further information, please call on the subscriber.
