TO SATY-MIL OWNERS, town and country; spirited Editorials; and re- Or those who are about to build or repair.

The umdersigned respectfully informs the public that he is duly authorised to sell the Right of the Johnson Re-acting Water wheel, to the counties of Monroe and Pike, patented the 22d day of June, A. D. 1840.

The Johnson re-acting wheel is the best now in use to propel a saw mill; it excels any other wheel in the United States under a low water head;-under a head from 5 to 7 feet is suffiminion type, on fine white paper, done up in hand- cient to cut from 2 to 3000 feet in twelve hours some colored covers, and will compare favorably, of inch or any other boards with ease. The in matter and style, with any publication of the wheels require, under a 7 foot head, 140 inches of water and so in proportion to any other head. Under a 7 foot head, the Saw will make from 200 to 250 strokes per minute. The advantage which those wheels have over any other weekly distribution of the splendid Literary works wheels is, that it requires but four posts to make among its subscribers and purchasers upon the the floom or bulk head; the wheels are hung on following plan: Each copy of every issue is num- the crank shaft. Two wheels are what is required for a Saw mill, and the posts planked inside the same as a pen stock. I have built one fered, which will be given to the holders of the of those mills this season, on the Roaring corresponding numbers. Not less than ten Prizes Brook, in Luzerne county, for Mr. S. P. Temhave been offered with every number, and among plin, under about a 7 foot head, which will cut -- therefore, I can recommend them as the best wheels now in operation. There are several more mills in that part, all under low heads, which answers the same purpose as that of Mr. rope, &c. &c. &c. Each of these works, and a Templins.
