

**IN PRESS
POPULAR LECTURES
ON
SCIENCE AND ART;
DELIVERED IN THE
Chief Cities and Towns in the U. S.
BY DIONYSIUS LARDNER.**

Doctor of Civil Law, Fellow of the Royal Societies of London and Edinburgh, Member of the Universities of Cambridge and Dublin, and formerly Professor of Natural Philosophy and Astronomy in the University of London, &c. &c.

The publishers announce that Dr. Lardner having brought to a close his public Lectures in this country, they have availed themselves of the opportunity thus presented to induce him to prepare for publication a complete and authentic edition of these Discourses. The general interest which for the last four years they have excited in every part of this country is universally felt and acknowledged. Probably no public lecturer ever continued for the same length of time to collect around him so numerous audiences. Nor has there been any exception to this favorable impression. Visit after visit has been made to all the chief cities, and on every succeeding occasion audiences amounting to thousands have assembled to hear again and again these lessons of useful knowledge. The same simplicity of language, perspicuity of reasoning, and felicity of illustration, which rendered the oral discourses so universally acceptable will be preserved in the published report, which will indeed be, as nearly as possible, identical with the Lectures as they were delivered.

The publishers feel that in the volume now proposed they will present to the American public a most agreeable offering, and an interesting and useful miscellany of general information, which will also afford that large class of persons who have attended the Lectures, an agreeable means of reviving the impressions from which they have already derived so much profit and pleasure.

The subjects which will be included will embrace a variety of topics in the Astronomical and Physical Sciences, and in their application to the arts of life. Among these the following may be mentioned:

The Plurality of Worlds; The Sun; The Moon; The Planets; The Comets; The Solar System; The Atmosphere; Popular Fallacies; Artificial Illumination; Light; Sound; Electricity; Galvanism; The Bridge Water Lecture; Lunar Influences; Weather Almanacs; Babbage's Calculating Machinery; Electric and Magnetic Telegraphs; The Telescope and Microscope; Galileo; Copernicus; Lavoisier; Newton; The Stellar Universe; The Power of Steam; Steam Navigation; Aurora Borealis; Water Spouts; Thunder and Lightning; Theory of Dew; Heat; The Barometer; The Thermometer; &c. &c.

The work will appear in numbers, or parts, will be well printed on good type, and copiously illustrated with engravings on wood. It will be completed in ten or twelve numbers, and the entire volume will be published within six months. The price will be 25 cents for each number.

Any person wishing to procure this valuable work may apply to our agents, or to any of the Booksellers or Country Merchants in any part of the United States. Postmasters remitting one dollar will be entitled to five numbers. Orders are respectfully solicited.
