

**THE BIRTH PLACE OF ST. PATRICK IS A DISPUTED POINT.**—Some asserting that he was a Frenchman, others that he was a sturdy Englishman, while the majority believe that he was a native of the Emerald Isle. All are equally confident in the expression of their opinions. But the place of his birth is a matter of very little consequence, for all are willing to allow that "St. Patrick was a gentleman, and born of decent people." He certainly was a great man, for he drove the toads and snakes out of Ireland, and it is said that they stay "drove out" up to this present day. He has been a benefactor to that part of the world. We have no St. Patrick's here, but we have equally as great men, and among the number the name of Dr. Sherman will be remembered with posterity with gratitude. His Worm Lozenges banishes the worms at once, and in place of the sickly countenance, gives the ruddy glow of health. His Cough Lozenges allay the irritation of a dry and hacking cough, gives quiet slumbers to those whose rest is disturbed, promote a free and easy expectoration, put a stop to the raising of blood, and in a very short space of time restore to perfect health. His Camphor Lozenges cure Palpitations of the Heart, Headache, and Nervous Affections, raise the spirits of the depressed, and generally invigorate the system. All Dr. Sherman's Lozenges are "tip-top" articles; they are what they profess to be—Specifics. His Poor Man's Plaster has obtained a reputation for cures performed in Rheumatism and Weak Backs, Pains in the Chest and Side, unequalled by any other preparation of the day. One million annually will not supply the demand. Dr. S's preparations have now been five years before the public, they have performed wonders in the way of cures, and have never been known to produce the least injury, or to be productive of bad consequences. We have experienced their good effects, and can conscientiously recommend them.

A fresh supply of the above valuable medicines just received, and for sale at the Republican Office.

**IN PRESS POPULAR LECTURES ON SCIENCE AND ART; DELIVERED IN THE Chief Cities and Towns in the U. S. BY DIONYSIUS LARDNER.**

Doctor of Civil Law, Fellow of the Royal Societies of London and Edinburgh, Member of the Universities of Cambridge and Dublin, and formerly Professor of Natural Philosophy and Astronomy in the University of London, &c. &c.

The publishers announce that Dr. Lardner having brought to a close his public Lectures in this country, they have availed themselves of the opportunity thus presented to induce him to prepare for publication a complete and authentic edition of these Discourses. The general interest which for the last four years they have excited in every part of this country is universally felt and acknowledged. Probably no public lecturer ever continued for the same length of time to collect around him so numerous audiences. Nor has there been any exception to this favorable impression. Visit after visit has been made to all the chief cities, and on every succeeding occasion audiences amounting to thousands have assembled to hear again and again these lessons of useful knowledge. The same simplicity of language, perspicuity of reasoning, and felicity of illustration, which rendered the oral discourses so universally acceptable will be preserved in the published report, which will indeed be, as nearly as possible, identical with the Lectures as they were delivered.

The publishers feel that in the volume now proposed they will present to the American public a most agreeable offering, and an interesting and useful miscellany of general information, which will also afford that large class of persons who have attended the Lectures, an agreeable means of reviving the impressions from which they have already derived so much profit and pleasure.

The subjects which will be included will embrace a variety of topics in the Astronomical and Physical Sciences, and in their application to the arts of life. Among these the following may be mentioned:

The Plurality of Worlds; The Sun; The Moon; The Planets; The Comets; The Solar System; The Atmosphere; Popular Fallacies; Artificial Illumination; Light; Sound; Electricity; Galvanism; The Bridge Water Lecture; Lunar Influences; Weather Almanacs; Babbage's Calculating Machinery; Electric and Magnetic Telegraphs; The Telescope and Microscope; Galileo; Copernicus; Lavoisier; Newton; The Stellar Universe; The Power of Steam; Steam Navigation; Aurora Borealis; Water Spouts; Thunder and Lightning; Theory of Dew; Heat; The Barometer; The Thermometer; &c. &c.

The work will appear in numbers, or parts, will be well printed on good type, and copiously illustrated with engravings on wood. It will be completed in ten or twelve numbers, and the entire volume will be published within six months. The price will be 25 cents for each number.

Any person wishing to procure this valuable work may apply to our agents, or to any of the Booksellers or Country Merchants in any part of the United States. Postmasters remitting one dollar will be entitled to five numbers. Orders are respectfully solicited.

GREELY & McELRATH,

**A NEW BOOT & SHOE ESTABLISHMENT.**

**READY MADE WORK:**

and will devote his best efforts to the accommodation of those who will favor him with their patronage.

With an experience in the business of no inconsiderable length—a determination to adhere strictly to his promises—and a resolution never to make unreasonable charges, he flatters himself that he will receive a fair proportion of the custom of the Borough and neighborhood.

Country produce of all kinds, taken in payment for work, if brought in reasonable time.
