### IN PRESS POPULAR LECTURES

SCIENCE AND ART: DELIVERED IN THE

Chief Cities and Towns in the U. S. BY DIONYSIUS LARDNER.

Doctor of Civil Law, Fellow of the Royal Societies of London and Elinburgh, Member of the Universities of Cambridge and Dublin, and formerly Professor of Natural Phi-losophy and Astronomy in the University of London, &c. &c. The publishers announce that Dr. Lardner hav-

ing brought to a close his public Lectures in this country, they have availed themselves of the opportunity thus presented to induce him to prepare for publication a complete and authentic edition of these Discourses. The general interest which for the last four years they have excited in every part on Elizabeth street, in the room formerly occu- of this country is universally felt and acknowledged. Probably no public lecturer ever continued for the same length of time to collect around Importers & Dealers in Hosiery, Gloves, Trimhim so numerous audiences. Nor has there been after visit has been made to all the chief cities, and on every succeeding occasion audiences amounting to thousands have assembled to hear again and again these lessons of useful knowledge. The same simplicity of language, perspicuity of reasoning, and felicity of illustration, which rendered the oral discourses so universally acceptable will be preserved in the published report, which William H Love will indeed be, as nearly as possible, identical with J Godley Spry & Co the Lectures as they were delivered.

The publishers feel that in the volume now proposed they will present to the American public a most agreeable offering, and an interesting and useful miscellany of general information, which will also afford that large class of persons who have attended the Lectures, an agreeable means of reviving the impressions from which they have already derived so much profit and pleasure.

The subjects which will be included will embrace a variety of topics in the Astronomical and Maslin & Pepper, Physical Sciences, and in their application to the Faust & Winebrener arts of life. Among these the following may be

The Plurality of Worlds; The Sun; The Moon; The Planets; The Comets; The Solar System; The Atmosphere; Popular Fallacies; Artificial Illumination; Light; Sound; Electricity; Galvanism; The Bridge Water Lecture; Lunar Influences; Weather Almanacs; Babbage's Calculating Machinery; Electric and Magnetic Telegraphs; The Edward P Moyer 38, also 252 Market street. Telescope and Microscope; Galileo; Copernicus; Dried Peaches, Lavoisier; Newton; The Stellar Universe; The Power of Steam; Steam Navigation; Aurora Borealis; Water Spouts; Thunder and Lightning; Theory of Dew; Heat; The Barometer; The Thermom-

The work will appear in numbers, or parts, will of the best and cheapest qualities always on be well printed on good type, and copiously illushand, and will suit those who may favor him trated with engravings on wood.
