DR. SMITH'S (SUGAR COATED) "IMPROV.

ED INDIAN VEGETABLE PILLS." Are daily effecting some of the most astonishing and wonderful cures that have ever been known, in consequence of which they have now become a shining mark against which all the arrows of disappointed hope, envy and uncharitableness are levelled without distinction. The town and country are alike filled with their nraise. The palace and the poor-house alike echo with their virtues. In all clima es, under all temperatures, they still retain their wonderful powers, and exert them unahered by age or situation. They are simple in their preparations, mild in their actions, thorough in all their operations, and unrivalled in their results .-They are anti-bilious, anti-dy-peptic, and antimercurial; and they are peculiarly beneficial in the following complaints: fever and ague, vellow and bilious fevers, dyspepsia, croup, liver complaint, sick headache, jaundice, asthma, dropsy, spieen, piles, colic, obstructions, heartdurrhes, costiveness, loss of appetite, sallow complexion, colds, and in all cases of torpor of the bowels where a cathartic or an aperient is

FARMERS' LIBRARY.

Prospectus of the Farmer's Library, and Monthly Journal of Agriculture. John S. Skinner, Editor. None can well have studied the true sources of National welfare, without perceiving the natural and friendly connexion existing between Manufactures. Commerce and Agriculture. The policy which strikes at the prosperity of the Manufacturing consumer, must damage the Agricultural producer, and neither can be injuriously affected without detriment to the Merchant, at once consumer and carrier for both. As, however, the elements of manufacturing and commercial industry must be derived chiefly from the soil, is it not the obvious interest of all other classes that the one which gives to all their employment and subsistence, should be encouraged and benefitted with every advantage that science can confer and the most enlightened industry make available! Yet it has not been until comparatively a late period in Europe, and still later in America, that the public mind has been made properly sensible of the necessity of science to Agriculture, and so to respect Farming as essentially an intellectual and dignified pursuit-one which should imply for its followers high mental cultivation and various attainments. Happily, however, educated young men are now betaking themselves to Farming, as a business, which, like the learned professions, has its own principles and will have its literature; and truly it may be asked what subject has lately given rise to memoirs and works more profound and instructive, or been fruitful of more interesting results of scientific investigation, than Agriculture? Who, among modern Literati, enjoy more enviable distinction than Liebig and John- him, and respectfully announces that he is ston, and Boussingault and Candolle? The taste prepared to execute all orders in his line of for Agricultural Literature in a r country, thanks business in the best manner and with despatch. are indebted thereto, are requested to make imto the able journals that encourage it, keeps pace He will manufacture with its progress in Europe. The more fully to meet the demand thus created, we have decided to publish on the first day of July, and monthly thereafter, the Farmer's Library and Monthly Journal of Agriculture, to be edited by John S. Skinner, late Assistant Postmaster General and Stroudsburg, and the public generally, founder of the first Agricultural periodical published in this country.

they may supply the Farmer's table with lighter

Each number will consist of two distinct parts,

I. The Farmers' Library, in which will be published continuously the best Standard Works on Agriculture, embracing those which, by their cost or the language in which they are written, would for two or three dollars the choicest European nished to order at the shortest notice. treatises and researches in Agriculture, costing ten times as much in the original editions, not easily obtained at any price, and virtually out of will be done on the most reasonable terms, and the reach of men who live by following the plough. all kinds of smith work, In the Farmers' Library they will be accompanied by notes from the Editor, explaining what may be obscure to American readers, or calculated to mislead the beginning in Farming, owing to differences of Soil, Climate, &c. The works published in the Library will form a complete series, exploring and exhibiting the whole field of Natural Plough makers. Science, and developing the rich treasures which Chemistry, Geology, and Mechanics, have yielded Stroudsburg, March 13, 1845. and may yield to lighten the labors and swell the harvests of the intelligent husbandman. The work will be so arranged that the Farmer's Library may be bound up by itself, forming a mammoth volume of 600 pages at the end of each year; or each work contained therein may be bound se-

II The Monthly Journal of Agriculture will likewise contain about 50 pages per month, and will comprise, 1. Foreign: Selections from the Invite the attention of Merchants, Manufactu higher class of British, French and German periodicals devoted to Agriculture, with extracts from new books which may not be published in the Library, &c. &c. 2. American: Editorials. communicated and selected accounts of experiof the best and cheapest qualities always on ments, improved processes, discoveries in Agrihand, and will suit those who may favor him culture, new implements, &c. In this department alone will ours resemble any American work ever yet published. It can hardly be necessary to add that no Political, Economic, or other controverted doctrine, will be inculcated through this magazine.

Each number of the Library will be illustrated by numerous engravings, printed on type obtained ertions to make his establishment an agreeable expressly for this work, and on good paper—the whole got up as such a work should be. If it does not prove the best as well as the amplest and most age of merchants, manufacturers and dealers. comprehensive Agricultural work ever published in this country, the fault shall not rest with the Parasols. publishers, and we are sure it will not fall short for want of industry or devotion in the Editor. IN PRESS POPULAR LECTURES

SCIENCE AND ART;

DELIVERED IN THE Chief Cities and Towns in the U.S. BY DIONYSIUS LARDNER. Doctor of Civil Law, Fellow of the Royal Societies of London and Edinburgh, Member of the Universities of Cambridge

and Dublin, and formerly Professor of Natural Phi-losophy and Astronomy in the University of London, &c. &c. The publishers announce that Dr. Lardner having brought to a close his public Lectures in this country, they have availed themselves of the opportunity thus presented to induce him to prepare or publication a complete and authentic edition of these Discourses. The general interest which for the last four years they have excited in every part of this country is universally felt and acknowledged. Probably no public lecturer ever continued for the same length of time to collect around him so numerous audiences. Nor has there been any exception to this favorable impression. Visit after visit has been made to all the chief cities, and on every succeeding occasion audiences amounting to thousands have assembled to hear again and again these lessons of useful knowledge. The same simplicity of language, perspicuity of reasoning, and felicity of illustration, which rendered the oral discourses so universally acceptable will be preserved in the published report, which will indeed be, as nearly as possible, identical with

the Lectures as they were delivered. The publishers feel that in the volume now proposed they will present to the American public a most agreeable offering, and an interesting and useful miscellany of general information, which will also afford that large class of persons who have attended the Lectures, an agreeable means of reviving the impressions from which they have

already derived so much profit and pleasure. The subjects which will be included will embrace a variety of topics in the Astronomical and Physical Sciences, and in their application to the arts of life. Among these the following may be mentioned:

The Plurality of Worlds; The Sun; The Moon; The Planets; The Comets; The Solar System; The Atmosphere; Popular Fallacies; Artificial Illumination; Light; Sound; Electricity; Galvanism; The Bridge Water Lecture; Lunar Influences; Weather Almanacs; Babbage's Calculating Machinery; Electric and Magnetic Telegraphs; The Telescope and Microscope; Galileo; Copernicus; Lavoisier; Newton; The Stellar Universe; That Power of Steam; Steam Navigation; Aurora Borealis; Water Spouts; Thunder and Lightning; Theory of Dew; Heat; The Barometer; The Thermoni-

eter; &c &c. The work will appear in numbers, or parts, will be well printed on good type, and copiously illustrated with engravings on wood. It will be completed in ten or twelve numbers, and the entire volume will be published within six months. The

price will be 25 cents for each number. Any person wishing to procure this valuable work may apply to our agents, or to any of the Booksellers or Country Merchants in any part of the United States. Postmasters remitting one dollar will be entitled to five numbers. Orders are respectfully solicited.

GREELY & MOELRATH, Tribune Ruildings.
