FARMERS' LIBRARY.

Prospectus of the Farmer's Library, and Monthly Journal of Agriculture. John S. Srinner, Editor. None can well have studied the true sources of National welfare, without perceiving the natural and friendly connexion existing between Manufactures, Commerce and Agriculture. The policy which strikes at the prosperity of the Manufacturing consumer, must damage the Agricultural producer, and neither can be injuriously affected without detriment to the Merchant, at once consumer and carrier for both. As, however, the elements of manufacturing and commercial industry must be derived chiefly from the soil, is it not the obvious interest of all other classes that the one which gives to all their employment and subsistence, should be encouraged and benefitted with every advantage that science can confer and the most enlightened industry make available! Yet it has not been until comparatively a late period in Europe, and still later in America, that the public mind has been made properly sensible of the necessity of science to Agriculture, and so to respect Farming as essentially an intellectual and dignified pursuit-one which should imply for its followers high mental cultivation and various attainments. Happily, however, educated young men are now betaking themselves to Farming, as a business, which, like the learned professions, has its own principles and will have its literature; and truly it may be asked what subject has lately | venient given rise to memoirs and works more profound and instructive, or been fruitful of more interesting results of scientific investigation, than Agriculture! Who, among modern Literati, enjoy to the able journals that encourage it, keeps pace He will manufacture with its progress in Europe. The more fully to meet the demand thus created, we have decided to publish on the first day of July, and monthly thereafter, the Farmer's Library and Monthly Journal of Agriculture, to be edited by John S. Respectfully informs the citizens of Skinner, late Assistant Postmaster General and Stroudsburg, and the public generally, founder of the first Agricultural periodical published in this country.

ing journals of less price and wider circulation, they may supply the Farmer's table with lighter pied by Joseph L. Keller, as a Grocery, where and more agreeable refreshment, while in the Lihe is prepared to accommodate the public with brary he may may find more solid as it will be

March 6, 1845. IN PRESS

POPULAR LECTURES

SCIENCE AND ART; DELIVERED IN THE

Chief Cities and Towns in the U. S. BY DIONYSIUS LARDNER. Doctor of Civil Law, Fellow of the Royal Societies of London

and Eduphurgh, Member of the Universities of Cambridge and Dublin, and formerly Professor of Natural Phi-losophy and Astronomy in the University of London, &c. &c. The publishers announce that Dr. Lardner having brought to a close his public Lectures in this country, they have availed themselves of the opportunity thus presented to induce him to prepare for publication a complete and authentic edition of these Discourses. The general interest which for Ploughs of the most approved plan will be the last four years they have excited in every part ued for the same length of time to collect around him so numerous audiences. Nor has there been any exception to this favorable impression. Visit after visit has been made to all the chief cities, and on every succeeding occasion audiences amounting to thousands have assembled to hear again and again these lessons of useful knowledge. The same simplicity of language, perspicuity of reasoning, and felicity of illustration, which rendered the oral discourses so universally acceptable will be preserved in the published report, which will indeed be, as nearly as possible, identical with

the Lectures as they were delivered. The publishers feel that in the volume now proposed they will present to the American public a most agreeable offering, and an interesting and useful miscellany of general information, which will also afford that large class of persons who have attended the Lectures, an agreeable means of reviving the impressions from which they have

already derived so much profit and pleasure. The subjects which will be included will embrace a variety of topics in the Astronomical and Physical Sciences, and in their application to the arts of life. Among these the following may be

mentioned: The Plurality of Worlds; The Sun; The Moon; The Planets; The Comets; The Solar System; The Atmosphere; Popular Fallacies; Artificial Illumination; Light; Sound; Electricity; Galvanism; The Bridge Water Lecture; Lunar Influences; Weather Almanacs; Babbage's Calculating Machinery; Electric and Magnetic Telegraphs; The Telescope and Microscope; Galileo; Copernicus; Lavoisier; Newton; The Stellar Universe; The Power of Steam; Steam Navigation; Aurora Borealis: Water Spouts; Thunder and Lightning; Theory of Dew; Heat; The Barometer; The Thermometer; &c &c.

The work will appear in numbers, or parts, will be well printed on good type, and copiously illustrated with engravings on wood. It will be completed in ten or twelve numbers, and the entire volume will be published within six months. The price will be 25 cents for each number.

Any person wishing to procure this valuable work may apply to our agents, or to any of the Booksellers or Country Merchants in any part of the United States. Postmasters remitting one dollar will be entitled to five numbers. Orders are respectfully solicited,

GREELY & MCELRATH, Tribune Buildings.
