A MIXTURE OF SALT AND LIME has been found to prove very valuable in raising wheat the most sanguine expectations in many places. \_Turnips also prove with this composition strewed upon the soil. Sulphate of soda (Epsom Salts) has been of equally great value to potatoes. This, with an equal quantity of nirate of sods, is thought by some even better.

A PINE Log, twelve feet long, sawed in the St. Clair mills last week, which made two thousand two hundred and fifty-seven feet of one inch boards; 1663 feet of it being clear and 954 of it common lumber; making it worth, at our mill prices, the snug little sum of twenty-one dollars.

The Philadelphia postages for the third quarter of 1845, are given as \$19,795. Ditto for 1844, \$34,136.

#### More Mormon Troubles.

Notwithstanding the sacred promises made in their recent treaty with the State authorities of Illinois, the Mormons still continue their depredations upon the inhabitants of the adjacent country. The house of Mr. Crawford, near Warsaw, was recently entered, during the famile's absence, and every thing of a portable nature stolen from it. Col. Warren, in an account of the affair, says :

" About the same time, two splendid horses, the property of L. Chandler, and several heads of Cattle, were stolen from the neighborhood. Other robberies of similar character were also committed. A man who was driving a herd of cattle towards Nauvoo, and a noted Mormon, was encountered by General Hardin, who finding that he was unable to account for them in as satisfactory a manner as he could have de- of according to law. sired, sent him a prisoner to Quincy. Wilcox, whose disappearance while on a visit to a friend in Nauroo, created so much excitement, has not yet been heard from. A German named Dabenheyer had also disappeared, and his body was found in a ditch near the house of a Mor-

#### MEASLES. Dr. Smith's Advice.

The Measles appeared in Europe about the same time with the small pox, and have a great affinity

to that disease. They both came from the same quarter of the world, are both infectious, and seldom attack the same person but once. The Measles are most common in the spring season, and generally disappear in summer. The disease itself, when properly managed, seldom proves fatal; but its consequences are often very troublesome. eroption. Blood-letting is almost certain death.
