A new potato-digger was recently exhibited in operation at Salem, N. J. It threw out upon the ground, with two horses, at the rate of five or six acres per day, and as fast as thirty hands could pick up and carry them away. The soil produced 400 bushels of potatoes per acre by the use of compost muck.

An Immense Horse.

Carter, the Lion King, "has purchased the largest horse in England. He has named him General Washington.' He is twenty hands high, and looks as large as an elephant. He is a black gelding, beautifully dappled-his mane is nearly four feet long; his tail sweeps the ground; he is perfectly formel, and is reearded as one of the finest specimens of the horse ever seen in Great Britain. He is only six years old : he will be exhibited shortly in London, and then sent to the United States,-A most splendid covering of blue silk velvet. fringed with a deep border of gold, is being made for him."

MEASLES. Dr. Smith's Advice.

The Measles appeared in Europe about the same time with the small pox, and have a great affinity to that disease. They both came from the same quarter of the world, are both infectious, and seldom attack the same person but once. The Measles are most common in the spring season, and generally disappear in summer. The disease itself, when properly managed, seldom proves fatal; but its consequences are often very troublesome. Our business is to assist nature to throw out the eruption. Blood-letting is almost certain death.

Nothing ever discovered has done the work so cently and effectually as DR. SMITH'S (Sugar Coated) "Indian Wegetable Pills." You need not force them down either.
